THE GENTLEMAN'S

JOCKY,

AND

Approved Farrier:

INSTRUCTING,
In the Natures, Causes, and Cures of
all Diseases incident to

HORSES.

WITH

An Exact and Easie Method of Breed-

ing, Buying, Dieting and otherwise ordering all forts of Horses, as well for common and Ordinary USE; as the HEATS and COURSE.

With divers other Curiofities collected by the long practice, Experience and Pains of J. H. Esquire; T. D. N.S. R. B. J. W. and others.

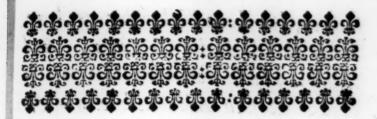

Never before Publish'd.

London, Printed for Hen. Twyford in Vine Court Middle-Temple, and Nath. Brook at the Angel near the Royal Exchange in Corn-bill. 1671.

.

To the

READER.

Fter so many Essayes, and some of them not of the meanest, which have been made concerning this point, let it not be thought

a presumption to offer known Experiments: For although there have been many great Masters who have in many points offered their knowledge in publick to the World in this matter, yet have not altogether said

To the Reader.

so much, but that a Well-wisher may have liberty to cast in his Gleanings. And though it is said, Facile est inventis addere, yet such Additions have wrought that high improvement of Arts, whereof in this Age the World boasseth. Esculapius who by the Ancients was Deified for his. first Practice in Physick; yet was after undone by Galen, whose Works are still famous even beyond Esculapius name; yet bath later Learning queried much in Galen, and Paracelsus not afraid even to Arraign him. If these in that so renowned Art of Pharmacenty have thus varied and amended by Practical Experiments, why may not this little Manual (as it makes a Supplement) be looked upon with an impartial eye: If the subjest of it in Prastice bath been worth the Experimenting by such able hands, it can-

not

To the Reader.

not be less worth thy Reading. And though you expect more than you find, yet I dare say you shall find more than you expect. Who ever is a Gentleman, or a Souldier that loves his Horse, will find the Advantage thereof in any Experiment; and the honest Countryman, whose habitation perhaps may be some miles distant from a Farrier, having this Book, may at an easie charge Cure his own Cattle. Use it with the same Freedom I offer it; And I dare believe you will find no less Advantage than many Honourable persons have done, upon occasion as these Medicines and Experiments have been applied, and well Approved; and therein your satisfaction will be an a- . mends for all our past Care and Labour.

I

J

Will not dispute the several opinions of men in this Kingdom, touching the keeping of the Runing Horse, because I know many are idle and frivolous, some uncertain, and a few in the right way:

Only in this I would clear one Paradox, which is frongly maintained, and infinitely pursued by many of our best Professours. And that is the limitation and length of time, for the preparing or making ready of an Horse for a Masch or great Wager.

There

LIMI

Tet as Heretiques cite Scriptures, so these find

reasons to defend want of knowledge.

As the danger of so early exercise.

The offence of grease too suddainly broken.

The moving of evil humors too hastily, which leads

to mortal sickness.

And the moderation or helping of all these by a slot proceeding, and bringing of the Horse into order by degrees and times, or as I may say, by an ignorant sufferance.

These Reasons I know have the shew of a good ground, for the early exercise is dangerous, but not if

free from violence.

To break grease too suddainly is an offence unsufferable, for it puts both the Limbs and the Life in hazard: But not if purged away by Scowrings.

The hasty stirring up of humors in a Body where they superabound, and are generally dispersed, and not

setled, cannot but breed sickness.

But not where discretion and judgment evacuateth

them in wholfome sweats and moderate stirrings.

And for the moderation of all these by the tediousness of time, as two Moneths for the first, two Moneths for the second, and as much for the last. It is like

the covering of the Gangreen in an old man, better to dye than be dismembred, better loose the prize, than bear the charge; for I dare appeal to any noble judgment, (whose purse hath Experience in these actions) if six Moneths preparation, and the dependences belonging to it, and his person, do not devour up an hundred pound wager.

But you will demand of me, what limitation of time I will allow for this purpose of preparation; And I answer, that two Moneths time is sufficient at any time of the year what sever; and he that cannot do it in two Moneths, shall never do it in fif-

teen.

But reply they, No Scowring is to be allowed, for they are Physical, then unnatural; they force nature, and so hurt nature, they make sickness, and so impair health. Because nature worketh every thing her self, and though she be longer, yet she hath less danger.

I confess that slibbersauce scowrings, which are stuft up with poysonous Ingrediants, cannot choose but bring forth insirmity; but wholesome scowrings that are composed of beneficial and nourishing Simples, neither occasion sickness, nor any manner of insirmity, but bring away grease, and all manner of foulness in that kind, that one week shall effect and cleanse away more, then two Moneths of delitory and doubtful forbearance.

Because no man in this lingring course can certainly tell which way the grease and other foulness will avoid. As whether into his Ourdre, which is the safest, into sweat, which is hazardous, into his lymbs, which is mischievous, or remain and putrisse in his body, which is mortally dangerous; since the issue of all these falling out according to the strength and

B 2

estat

The state of the s

eftate of the Horses body, and the diligence of the keeper; and if either the one fall in power or the other in care, farewell Horse for that year; all this envy cannot choose but confess, only they have but one broken Cruch to support them, which is, they know no scowring, therefore they will allow of no scowring. Against Barbarism I will not dispute, only I appeal to art and discretion, whether purgation or sufferance (when nature is offended) be the better doers.

To conclude, Two Moneths I allow for preparation, and according to that time, I have laid directions. My humble suit is, out of a sincere opinion to truth and justice, so to allow or disallow, to refrain or imitate.

not formerly Published.

The first ordering of the Runing Horse, according to the leveral estates of their Bodies.

Hen a Horse is matched (or to be matched) for a runing Courfe, you are principally to regard the estate of the body, in which the Horse is at the time of his matching, and this

estate of body I divide into three several kinds.

1. The first is, if he be very fat, foul, and either newly taken from grass or foil.

2.The

F

f the be othis bus they

onrga-

tion. ZKO

ruth n or 2. The second, if he be extream lean and poor, either through over riding, disorder, or other infirmity.

3. The third, if he be in a good and well liking estate, having had good usage and mode

rate exercise.

dy, you shall take longer time for matching keeping, and bringing into order, as two Moneths at the least, or more as you can con-

clude your wager.

If your Horse be in the second estate of Body, that is, very poor, then you shall also take as long time as you may, yet you need not so much as in the former, both because great cannot much offend, and exercise may go hand in hand with seeding.

If your Horse be in the third estate of Body (which is a mean betwixt the other extreams) then a Moneth or six weeks may be time sufficient

to diet him for his Match.

Now as you regard these general estates of bodies, so you must have an eye to certain particular estates of bodies, as if a Horse be sa and soul, yet of a free and spending nature, apquickly to consume and loose his stell. The Horse must not have so strict an hand, neither can be endure so violent exercise, as he that so a hard disposition, and will feed and be supportable means and all exercises.

Again, if your Horse be in extream poverty through disorder or misusage, yet is by nature very hard and apt, both soon to recover his flesh and long to hold it, then over this Horse you shall by no means hold so liberal and tende

Ò

ſ

t

1

0

n

9

18

an hand, nor forbear that exercise, which otherwise you would do to the Horse, which is of a tender nature, a weak stomack, and a free spirit. Provided alwaies, you have regard to his limbs, the impersection of his lameness.

Thus you fee how to look into the Estates of Horses bodies, and what time to take for your matchings.

I will now descend to their several orderings and dyetings, and because in the fat Horse, is contained both the lean Horse, and the Horse in reasonable estate of Body, I will in him shew all the secrets and observations which are to be imployed in the dieting and ordering of all three, without any omission or reservation whatsoever. For truth Sir, I have Vowed unto you, and cruth I will present you.

How to Diet an Horse for a Match that is fat, foul, and either newly taken from Grass, or Soil, being the first Fortnight.

I you match an Horse that is sat and soul either by runing at Grass, or standing at Soil, or any other means of rest, or too high keeping, you shall for the first fortnight at least, rise early in the morning before day, or at the spring of day, according to the time of the year, and having put on his Bridle washt in Beer, and tied to the Rack, take away the dung and other soulness of the Stable, then you B 4

hall drefs the Horfe exceeding well, that is to

You shall first curry him all over from the head to the tail, from the top of the shoulder to the knee, and from the top of the buttock to the hinder Cambril; then dust him all over, either with a clean dusting cloath, or with an horses tayl, or fuch like thing; made fast to an handle, then curry or rub him all over with the French brush, beginning with his forehead, temples, and theeks, fo down his neck, shoulders, and foreleggs, even to the fetting on of his hooves, fo along his sides, and under his belly; and lastly, all about his buttocks, and hinder leggs, even to the ground. Then you shall go over all those parts which the bruft hath touched with your wet hand, and not leave, as near as you can, one loofe hair about him; nor one wet hair; for what your hands did wet, your hands must rub dry again : you shall also with your wer hands cleanse his sheath, his yard, his stones or codds, and his Tuel; and indeed not leave any fecres place uncleansed, as ears, nostrils, fore-bowels, and between his hinder thyghs. Then you shall take an hair-cloath, and with it rub the Horse all over in every part, but especially his face, eyes, cheeks, between the chops, on the top of his forehead; in the nape of the neck, and down his legs, fetlocks, and about his patterns.

Lastly, You shall take a clean wollen cloath, and with it you shall rub the Horse all over, begining with his head and face, and so passing through every part of the Horses body or lymbs, which hath been before mentioned; then take a wet Mane combe, and combe down mane and tail.

D

When this work is finished, take a fair large body-cloath, of thick warm housewives Kersey, (if it be in the winter feafon, or of fine cotten, or other light ftuff, if it be in the Summer feafon) and fold it round about the Horfes body; then clap on his Saddle, and girt the foremost girth pritty ftraight, and the other girth fomewhat flack, and wifpe it on each fide the Horfes heart, that both the girths may be of equal ftraightness, then put before his breft a warm brest cloach, and let it cover both his shoulders.

When the Horse is thus accoutered and made ready, you shall take a little beer into your mouth and spirt it into the Horses mouth, and to draw him out of the Stable, and take his back, leaving some ordinary Groom behind you, to trim up your Stable, to carry forth dung, and shake and tofs up your litter. For you are to understand, and it is a general principle, that your Horse must stand upon good store of fresh dry Litter continually, both night and day; and it must ever be of Wheat straw if possible, or Ooat straw if forced by necessity. As for Barley straw, and Rye straw, they are both unwholesome and dangerous; the one doth heart, burn, the other caufeth scowring.

When you are thus mounted, you shall walk forth your Horse foot-pace, (which we call raking) for you must neither amble, nor trot, at least a mile or two, or more upon smooth and found ground, and as neer as you can to the steepest hills you can find : there gallop your Horse very gently up those steep hills, and rack or walk him foftly down, that he may coole as much

raking

much one way, as he warmeth another. An when you have thus exercised him a pretty space then seeing the Sun beginning to rise; or prettily risen, you shall walk your Horse down sther to some fresh River, or some clear Pondisted with a sweet Spring, and there let you Horse drink at his pleasure.

After he hath drunk, you shall Gallop and exercise him moderately as you did before, the walk him a pretty space, and after offer him mon water: If he drink, then gallop him again, is he refuse, then gallop him to occasion thirst, and thus alwaies give him exercise both before and

after water.

When he hath drunk, (as you think sufficient. ly) then bring him home gently, without a we hair about him; when you are come to the stable dore (before which your Groom shall throw all his foul litter continually from time to time) you shall there alight from his back, and by whistling stretching the Horse upon the straw, and arising the straw up under the Horse, see if you can make him piss, which if at first he do not, yet with a little custome he will soon be brought unto it, and it is an wholesome action, both for the Horses health, and for the cleanly keeping of the stable.

When these things are performed, you shall then bring the Horse into his stall; and first tye his head up to the rack in his bridle, then with hard wisps rub all his four legs down with as great strength as you can, then unlose his breast cloth; rub his head, neck, and breast, exceeding much with a dry cloath; then take off his Saddle, and hang it by, and after take off his

body

ft

Ä

C

b

body cloath; then rub over all the Horses body and lymbs, especially his back where the Saddle stood, and then cloath him up first with a linmen sheet, then over it a good strong housingcloath, and above it, his woollen body cloath, which in the winter is not amis to have it lined with some thin cotton, or other woollen stuff, but in the hear of Summer, the Kerfey it felf is fufficient.

When you have girt thefe Cloaths about him, ftop his furfingle round with reasonable big, soft, and thick wifps; for with them he will lie at best ease, because the small hard wifps are ever

burtful.

dy

After your Horse is thus cloathed up, you to stop # shall then pike his feet and stop them up with Teet cowdung, and then throw into his rack a little bundell of hay, fo much as a half penny bottle in a dear Inn, well dusted, and hard bound up together, and this he shall tare out as he standeth on his bridle?

After the Horse hath stood on his bridle more then an hour, or an hour and half, you shall then come to him, and first rub his head, face, and the nape of his neck with a clean rubber, made of new ruff hempen cloath, for this is excellent for the head, and dissolveth all gross and filthy humors, and then you shall draw his bridle. and with a very clean cloath, make the manger to clean as may be; And if he hath scattered any hay therein, you shall gather it up, and throw it back into his rack; then you shall take the quantity of a quart, or better, of sweet, dry, old, and clean dreffed Oats, of which the heaviest and the whitest are the best, as those which we call

call the Poland Oats, or the cut Oats, for those only are wholesome, the other which are unsweet breed infirmity, those which are moist, cause swelling in the body, those which are new, breed worms, and pain in the belly, and they which are half dressed, deceive the stomack, and bring the Horse to ruine. As for the black Oats, though they are tolerable in the time of necessity, yet they make full dung, and hinder a mans knowledge in the state of the Horses

body.

This quart of Oats you shall put into a Sieve that is somewhat less then a Riddle and a thought bigger then a Reeing sieve; such a one as will Jet a light Oat go through, but will keep a full Oat from scattering. In this Sieve you shall ree, drefs, and tofs your Oats very much, that there may be neither dust, nor any other foul thing in them: And so give them to the Horse to eat, and if he eat them with a good stomack, you may then lift, and give him as much more; and fo let him reft, till it be near eleven of the clock. Then come to the Stable again, and having rubbed the Horses head, neck, and face, you shall then take another quart or better of Dats, and as before, tofs and ree them through your Sieve, and so give them the Horse. closing up your windows and light, that the Horse may remain so dark as is possible, leave hm till one of the clock. And here you are to understand, that the darker you keep your Horse in your absence, the better it is, and it will occasion him to feed, lye down and take his rest; where otherwise be would not. And therefore we commonly use to arm the stalls wherein

in those Horses stand, round about, and a lost, and over the rack with strong canvas, both for darkness warmth, and that no filth may come near the Horfe.

At One a clock or thereabouts come to the Horle again, and fift and drefs him another quarter of Oats, as before shewed, and give them him: after you have rubbed well his face; head, and nape of the neck, then putting away his dung and making the stable clean and fweet. give him a little knob of hay, and for heave him till four of the clock in the evening, if it be in the Summer, after three if it be in the Winter and fhort Season.

At four a clock in the evening come again to the Stable, and having made all things clean, then bridle up the Morfe, having wet the fnaffel with beer, and tyed him up to the rack, then take off his cloathes and drefs him in all points, and every way as was shewed you in the morning. After he is dreffed, then cloath and Saddle him as was also shewed for the morning; then bring him forth and do your best to make him piss and dung upon the foul Litter at the Stable door: then mount his back, and ride him forth as you did in the morning, but not to the hills if possible you can find any other plain and level ground, as Meadow, Patture, or any other earth, especially if it lye along by the River. But in this case you can be no chooser, but must take the most convenient ground you can find, to make a vertue of necellity. There air your Horse in all points in the Evening, as you did in the Morning, galloping him both before and after his water, then raking him gently up and down;

in your raking you must observe even from the acc Stable door in all your passages, especially when ver you would have your Horse to empty himself, par to let him fmell upon every old and new dung you meet withall, for this will make him empty ly

his body, and repair his stomack. After you have watered your Horse, and flet fpent the Evening in airing till within night, for (for nothing is more wholesome or sooner con- ad fumeth foulness then early and late airings) you shall then air him home to the Stable door; there alight, and whatsoever you did in the morn. ing either within dores or without, do the fame also now at night, and so leave the Horse on his bridle an hour or an hour and half. Then come to him again, and as you did in the forenoon, fo do now, rub well, draw his bridle, cleanse the manger, put up his fcattered hay, lift him a quart and better of Oats, and give them him, and fo let him rest till nine of the clock at night.

At nine of the clock at night, which is bedtime both for your Horse and your felf, come th unto him, and first rub down his legs hard with hard wifps, then with a clean cloath rub his face, head, chaps, nape of the neck and foreparts. Then turn up his cloathes, and rub over his fillers, buttocks, and hinder parts: then put down his cloathes and lift him a quart of Oats, and give them him. Then put into his Rack a little bundell of hay (as hath been before shewed) toss up his Litter and make his bed fost, and fo betake both him and your felf to your refts till the next morning.

The next morning (as the morning before) come to the Horse before day, or at the break;

according

F

the eccording to the feafon of the year, and do ethen very thing, without the omission of any one felf, particular, as hath been formerly declared.

ung And thus you shall keep your Horse constantopty ly for the first fortnight; in which by this double daily exercise, you shall so harden his and flesh, and confume his foulness, that the next ght, fortnight (if you be a temperate man) you may on. adventure to give him gentle heats. you

Now touching his heats, you are to take to your self these four Considerations.

ome, TIrst, That two heats in the week is a sufficion, condition or state of body soever.

the Secondly, That one heat should ever be given upon that day in the week on which l fo he is to run his match. As thus, for Example.

If your match is to be run upon the Munday, ome then your fittelt heating dayes, are Mundayes and Fridayes, and the Munday to be ever the his sharper heat; both because it is the day of his ore- match, and there is three dayes respite betwext it 00and the other hear.

If the match-day be on the Thursday, then the heating-dayes are Tuesdayes and Saturdayes.

If it be on Wednesday, then the heating dayes are Wednesdayes and Saturdayes by reafon of the Sabboth. as loon as ne hat rear n

If on the Thursda, then the hearing dayes are Thursdayes and Mundayes, and so of the reit.

Thirdly,

here orn.

ame

uart

ed-

vith

hen

t of

his

ore

oft,

our

e)

ak;

PILI

Thirdly, You shall give no heat (except in ho case of Extremity) in very rainy and foul weally ther, but rather to differ hours, and change ou times, for it is unwholesome and dangerous, fir And therefore in case of showers and uncertain w weather, you shall be fure to provide for your ffa Horse a warm lined hood with linnen ears, and w the nape of the neck lined to keep out rain mi for nothing is more dangerous then cold wer bi falling into the ears, upon the nape of the neck Th andthe fillets.

Fourthly and Lastly, Observe to give your du heats, (the weather being feasonable) as early in the morning as you can, that is by the fpring of the day: but by no means in the dark, for it no is to the Horse unwholesome and unpleasant, to the man a great testimony of folly, and to both

an act of danger and percipitation.

The second Fortnights keeping.

Ow to descend to your second Fortnights keeping, touching your first approach to the Stable, and all other by respects ; as cleansing, shaking up of Litter, and the like : you shall do all things as in the first fortnight. Only before you put on his Bridle, you shall give him me a quart or better, of clean fifted Oats, which as foon as he hath eaten, you shall then bridle di him up, and drefe him in all points as was declared in the first formight, you shall cloath him; Sadle him, air, water, and bring him th Home

ce

th

at

fir

ba

m

fu

W:

to

W

ar

pt in home in all points, as in the first fortnight; onwes ly you shall not put any Hay in his Rack to tear ange out, but only draw with your hand, as much ous, fine sweet hay (which you shall toss and dust tain well) as you can well gripe, and let him as be your standeth on the bridle tear it out of your hand, and which if he do greedily and earnestly, then you ain, may give him another and another, and fo let wer him stand on the bridle, an hour or more after. neck Then come to him, and after rubbing and other ceremonies before declared performed; fift and your dust up the quantity of a quart of Oats, and fee arly them by: Then take a Loaf of bread, that is ring at least three days old, made after this manr it ner.

The First Bread.

Take three Pecks of clean Beans, and one Peck of fine Wheat, and mixe them toge-

ther, and grind it to pure meal.

Then fearce and bolt it through a reasonable fine rang, and knead it up with great store of ghts barm and lightning, but with as little water as n to may be; labour it in the Trough with all paininf- fulness, tread it, brake it, and after cover it you warm, and let it lye a pretty space in the Trough nly to swell: then after knead it over again, and him mold it up into big Loaves, and so bake them nich well, and let them toak foundly; after they are idle drawn from the Oven, turn the bottoms upward de- and let them cool.

ath At three days old you may adventure to give him this bread, but hardly fooner, for nothing doth occalion

ome

ooth

occasion surfeit, or is more dangerous then new hi bread; yet if necessity compell you that you must di fooner give this bread, or that the bread be as danck and clammy, fo as the Horse taketh diftafte thereat: then cut the Loaf into thin shives, and bi lay it abroad in a Sieve to dry, and then crum. he bling it small amongst his Oats you may give it he without danger.

But to return to my purpose where I left ! when you have taken a loaf of this bread of withree days old, you shall chip it very well, then the cut it into thin shives, and break three or four mi shives thereof (which may countervail the quan-lab tity of the Oats) very fmall, and mix it with the Oats you had before sifted, and so give them to fr

the Horfe.

About Eleven of the Clock you shall come to fre the Horse, and having performed your by-Ce. fr remonies before spoken of, you shall give him the same quantity of bread and Oats as you did in an the morning, and so let him rest till the after ar noon.

At One of the Clock in the afternoon (or af. lie ter, if you intend not to give him an heat the far next day) you shall feed him with bread and an Oats as you did in the forenoon, and fo con-fo sequently every meal following for that day, bo observing every action and motion as hath been before declared.

But if you intend the next day to give him an th heat (to which I now bend mine aim) you shall fo then only give him a quart of sweet Oats, and th as foon as they are eaten, put on his bridle, and w tye up his head, not forgetting all by-Ceremo. ah nies before declared. Then drefs him, cloath ne

him

B

new him, faddle him, air, and water him, as before mult shewed : also bring him home, and order him ed be as before shewed, only give him no hay at all.

staffe After he hath stood an hour on the bridle, give and him as before, a quart of clean lifted Oats, when rum he hath eaten them, you shall then put on his ve it head a sweet clean washt muzzel, and so fer him rest till Nine of the Clock at night.

est: Now touching the use of the Muzzel; and d of which is the best, you shall understand, that as then they are most useful, being good and rightly four made; fo they are dangerous and hurtful, being uan- abused or fally made.

the The true ufe of them, is to keep the Horse n to from eating up his Litter, from knawing upon Boards and mud Walls, and indeed to keep himne to from eating any thing, but what he receiveth Ce. from your hand.

These muzzels are sometimes made of Leather, the d in and stampt full of holes, or elfe close, but they fter are unfavory and unwholesome; for if it be allam'd Leather, the allome is offenlive ; if it be af. liquord the greafe and ouze are full as unpleathe fant : belides, they are too close, and too hot, and and both make a Horse sick, cause him to on forbear reft, and retain his dung longer in his day, body, then otherwise he would do.

Deen The best Summer muzzel, is the net muzzel made of ftrong packthread, and knit exceeding n an thick, and with small mashes in the bottom, and shall so enlarged wider and wider up to the middle of and the Horses head, and then bound about the top and with strong tape, upon the near side a loope, mo. and on the far side a long string of tape to be fast-

oath ned unto the horfes head.

im.

The best Winter Muzzel, is that which is made of strong double Canvas, with a round bottome, and a square Lattis window of small tape, before both his nostrils, down to the very bottom of the Muzzel; this must also have a loop and a string to fasten it about the Horses head.

At nine of the Clock at night coming to the Horse again, after your by-Ceremonies before taught are performed, give him a quart of clean sifted Oats; and as soon as he hath eaten them, put on his Muzzel, toss up his Litter, and leave

him to his rest.

The next day early in the morning before day come to the Horse (if he be standing on his feet) but if he be laid, by no means disturb him.

Now whilest he is lying, or if he be standing, take a quart of clean Oats well sifted, and rub between your hands, and wash them in a little strong Ale or Beer, and let them not be too moil for fear of offence, and so give them to the

Horfe.

As foon as he hath eaten them, Bridle him up, and hang by his muzzel in some sweet place, then uncloath him, and dress him as hath been before shewed; after put on his Body cloath, and Brest cloath, and Saddle him: then being ready to go forth with him, take his Bridle rain and draw it over the top of the rack, so as you may draw his head a loft. Then take a new laid Egg, washt clean, and breaking it in his mouth make him to swallow it down, then wash his tongue and mouth with a little beer, and so lead him forth of the stable.

At the door see if he will piss or doung, then take his back and rake him gently to the Course,

ever

H

2

le

y

u

t

t

2

ŀ

t

d

n

V

t

h

a

1

ever and anon making him fmell upon other Horfes dung, whereby he may empty himfelf the better.

When you are come within a mile or thereabouts, of the flarting Post; you shall alight from the Horses back, and take off his Body-cloath, and Breft cloath; and then girt on the Saddle again : then fending away your Groom both with thoseCloaths, and the clean dry rubbing Cloaths let him stay at the last end of the race till you come. Then your felf rake your Horse gently up to the starting Post : and beyond make your Horse smell to that Post as you shall also do at the first Post, which we call the waighing Post, that he may thereby take notice of the beginning and ending of his Course. And there start your Horse roundly and sharply at neer a three quarters speed, and according to his strength of Body, ability of wind and chearfulness of Spirit; run him the whole course through. But by no means do any thing in extremity and above shis wind and strength; but when you find him a little yield then give him a little ease, so that all he doth, may be done with pleasure and nor with anguish; for this manner of training will make him take delight in his Labour and so increase it, the contrary will breed discomfort and make exercise irksome.

Also during the time that you thus course your Horse, you shall with all carefulness note upon what grounds he runeth best; as whether upon the hill, whether on the smooth earth, or on the rough, whether on the wet, or on the dry, or whether on the level, or the earth that is somewhat rising, and according as you find

his nature and disposition, so maintain him for who

When you have thus coursed the course over to fromply and fwiftly, and after a little fleightly his gallop him up and down the field, to rake his the wind and chear his fpirits, you shall then (your fen Gridon being ready with your cloaths and o. Ho ther necessaries) ride into some warm place, a thi under the Covert of fome hedge, bulkes or trees, into fome hallow dry dirch, pit, or other de. fence from the air, and there alight from bis back, and first with a grafing knife, or scraping knife as fome call it, made either of fome broken Sword blade, some old broken Sythe, or for want of them, a thin piece of old hard Oaken wood, fashioned like a broad long knife with a sharp edge: And using this with both your hands scrape off all the swear from your Horse in every part of him, wherefoever you find any wet: And thus do till you find there will no more Sweat arife, and ever and anon move and fir the Horse up and down, and then with dry cloaths rub, the Horse all over exceedingly, Then take off the Saddle, and having glafed, feraped and rubbed his back, put on his bodycloath and his breaft-cloath, and then fet on the Saddle again and girt it; then gallop the Horse gently forth, and again a little space ever and anon rubbing his head, neck, and body, as you fitt on his back; then walk him about the Fields and Downs to cool him, and when you find that he drieth apace, then rake him gently homeward, fometimes raking and fomerimes galloping. But by no means bring him to the Stable, till you find he have not one wet hair about him, when

of when you have brought him to the Stable door dry; there dismount, and having enticed him over to piss and empty himself, then lead him into bily his stall, and there tye his head gently up to the the Rack with his Bridle; which done, preyour fently, as having prepared it before, give the do. Horse this Scowring following, and made in this manner.

The First Scowring. Marcham's Faithfull harries

for Ake a Pint of the best sweet Sack, and put Take a Pint of the best sweet Sack, and put thereto better than an ounce of the clearest and purest Rossen, bruised to a very fine dust. and brew them together exceeding much; then when the Sack and it is incorporated together, put thereto half a Pint of the best Sallet Oyl, and brew them also well together: then laftly, take a full Ounce and an half of brown Sugar-Candy beaten to Powder, and put it in also : then mull all upon the fire, and being luke-warm, and the Horse newly come in from his heat, as before I shewed you, draw his head up to the rack, and with an horn give him this Scowring; for it is a strong one, and this taketh away, and avoideth all manner of moulten greafe, and foulness what soever.

The Ordering of the Horse after this Scowring.

A S foon as you have given the Horse this Scowring, presently let your Groom fall to rubbing of his Legs, and do your self take off his Saddle and cloathes, and finding his Body dry, run sleightly over it with your Curry-Comb, after with the brush. Then dust well, and lastly, rub all his body over exceedingly well with dry cloathes, especially his head, nape of the neck, and about his heart; then cloath him up warm, as at his other ordinary times, and wisp him round with great warm wisps, and if you throw over him a little loose blancket, it will not be amiss in these extraordinary times, especially if the season be Cold.

Your Horse must fast full two hours after the receipt of his Scowring; but yet depart not your felf, or your Groom out of the Stable, but stay and keep the Horse stirring and walking, partly by extraordinary noise and clamour, and partly by action about him, or makeing him move up and down, as he standeth, There is nothing more hurtfull to the Horse, or working of the Medicine, then sleep, stilness, and rest, and nothing better or more available to the working of the Medicine then action and motion, for they make the Spirits, and stir up those humors which should be removed, when rest keeps the Spirits dull, and the humors fo inrlofed and referved, that nature hath nothing to work upon.

After your Horse hath fasted upon his Bridle two hours, or more, then you shall take an handfull of wheat ears, being your Pallard, that is, without rough beards, and coming to the Horse first handle the roots of his ears, then put your hands under his cloathes against his heart. upon his Fillets, Flancks, and on the neather part of his Thighs, and if you find any new fweat to arife, or any coldness of sweat, or if you fee his body beat or his breath move fast, then forbear to give him any thing; for it is a pregnant fign, that there is much foulness stirred up, on which the Medicine working with a conquering quality, the Horse is brought to a little heart lickness. Therefore in this Case you shall only take off his Bridle, and put on his Coller, then tofs up his Litter that he may lye down, and then absent your self (having made the Stable dark and still) for two hours more at the leaft, which is the utmost end of that sickness.

But if you find no such offence, then you shall proffer him the ears of Wheat by three or four together, and if he eat this handfull, then give

him another.

After he hath eaten the Wheat ears, you shall then give him a little bundell of Hay, such as hath been before declared, and draw his Bridle,

rubbing his head well.

An hour or better after he hath had his Hay, you shall lift him a quart of the best Oats, and to them you shall put two or three handfulls of spelted beans, which you shall cause to be reed and dressed so clean as is possible from all manner of hulls, dust, and sith whatsoever, so as there may be nothing but the clean spelted

beans

beans themselves. To these Oats and Beans you wishall break two or three good thick shives of of bread, clean chipt, and give all unto the Horse, you and so leave him to his rest for near three hours be or thereabouts.

At evening, before you dress your Horse, give The him the like quantity of Oats, spelted beans and who bread; and when he hath eaten them, then bridle him up and dress him as before shewed: the after he is drest, cloath him up, for you shall neither Saddle him, nor ride him forth; for you shall understand that this Evening after his heat, the Horse being inwardly foul, and the Scowring yet working in his body, he may not receive any water at all.

After the Horse is drest, and hath stood as hour and half upon his Bridle, you shall then take three Pints of clean sifted Oats, and wash them in strong Ale or Beer, and so give them to the Horse; for this will inwardly cool and

refresh him, as if be had drunk water.

After he hath eaten all his washr meat, and rested upon it a little space, you shall then at his feeding times, which have been spoken of before; with Oats and spelt Beans, or Oats and Bread, or all together, or each several and simple of it self (as you shall find the stomack of the Horse best addicted to receive it) feed him that night in plentiful manner, and leave a Know of Hay in the Rack when you go to your bed.

The next day, very early as may be; first feed, then dress, atter cloath, saddle, then air him abroad, and water him, as hath been before shewed: after bring him home and feed him

with

ing

ts, ake our heat five daies before his Match at the leaft no only you shall give him long and strong Air to ing to keep him in wind.

You shall not need this Fortnight to give him Ho

any Scowring at all.

If this Fortnight, Morning and Evening, you to burn upon a Chaffendish and coals in your in Stable, of the pureft Olibanum or Frankenfence for mixt with Storax and Benjamina, to perfume the and sweeten the room, you shall find it exceed an ing wholesome for the Horse, and he will take the wonderfull delight therein.

In this Fortnight, when you give your rel Horse any washt meat, wash it not in Ale or un Beer ; but in the Whites of Eggs or Muskadine, lo for that is more wholesome and less pur no

fey.

This Fortnight give your Horse no hay at of all, but what he taketh out of your hand after De his hears, and that must be in little quantity, and the clean dufted and dreft, unless he be an exceed. I d ing evil feeder, and marvellous tender, and a ig great belly loofer.

The last week of this Fortnight, if your Horse an be a foul feeder, you must use the Muzzel con- de rinually, but if he be a clean feeder and will on touch no litter, then three daies before your ne Match is a convenient time for the use of the to

Muzzel.

The morning the day before your Match, wh feed well both before and after Airing, and ra Water, as at other times, before noon and the after noon, scant his proportion of meat a ha little.

Before and after Evening Airing, feed as at goon,

or

na

tak

east noon, and water as at other times, but be fure

Ait. to come home before Sun fet.

This day you shall cool the Horse, shoe the nament about him : Provided there be nothing you to give him offence, or to hinder him in feedyour ing, or any other material or beneficial action ; ence for I have heard some Horsemen say, that when fume they had shooed their Horse with light shooes, seed and done other actions of Ornament about them take the night before the Courfe, that their Horfe hath' taken such especial notice thereof, that they have our refused both to eat and lye down. But you must or understand that those Horses must be old, and ine, long experienced in this exercise, or they canour. not reach at these subtile apprehensions; for my part touching the nice and straight platting up of Horses tails in the manner of Sakers or fter Docks (which is now in general use) howsoever and the ornament may appear great to the Eye, yet red. I do not much affect it, because I know if an nd a ignorant hand have the workmanship thereof, he may many waies give offence to the Horse, orse and in avoiding cumbersomeness breed a great on-deal of more cumber; therefore I with every vill one rather to avoid curiofity, which they call our necessary ornament, than by those false graces the to do injury to the Horfe.

Now for the necessary and indifferent things in, which are to be done unto the Horse, I would not rather have them done the day before then on the morning of the course, because I would a have the Horse that morning to find no trouble

or vexation.

The next morning which is the Match day,

at

n,

come to your Horse before day, take off his Muz. an zel, rub his head well, and give him a pretty quan a stity of Oats washt in Muskadine, if he will eas withem, or else in the Whites of Eggs; or if he refuse both, then try him with fine drest Oats ge dry, and mixt with a little Wheat, or with to your lightest bread : as for Beans forbear them em of any of these foods give him such a quantity tag as may keep Life and Soul together: then if he in be a Horse that is an evil emptier, and will re. and tain meat long, you may walk him abroad, and hel in the places where he used to empty, there en and tice him to empty, which as foon as he had use done, bring him home, put on his Muzzel, and you let him rest till you have warning to mak him ready and lead forth : but if he be a good and free emptying Horse, then you need not six foa him, but let him lye quiet.

When you have warning to prepare for lead car

ing out, then come to your Horse, and having you washed his fnaffel in a little Muskadine, take of the his Muzzel and bridle him up : But before you bridle, if you think the Horse too empty you for may give him three or four mouthfulls of the his walht meat laft spoken of, then bridle up, the ind dress; after having pitcht your Saddle andim Girths with Shoemakers wax, fet it on his bad refe and girt it as gently as may be, so as he marker have a feeling but no straightness. Then lays very white sheet over the Saddle next his skin and over it his ordinary cloaths, then his body cloath and brest-cloath, and wisp them round about with foft wifps : then if you have a coun terpane or cloath of State for braveries fake let it be fastned above all; when this is done

ha

and you are ready to draw out, then take half uan a pint of the best Muskadine, and give it him les with an Horn, and so lead him away. If he In all your leadings upon the Course, of

Date gentle and calm motions, suffering the Horse with to fmell upon every dung, that thereby he may nem empty himself; and in special places of advantity tage, as where you find rushes, long grass, fh ling, or heath, or the like, walk your Horse re and intice him to pifs : But if you find no fuch and help, then in special places upon the Course, hat used the same means before, break some of ,an your wifps under the Horfes belly, and fo make nak him pifs.

an Alfo in your leading, if any white or thick ftis foam or frost arise about the Horses mouth, you hall with a clean handkercheif wipe it away, ead carrying a small bottle of clear water about vin you, wash your Horses mouth now and then

you When you come to the place of Starting, beyor fore you uncloath the Horse, rub and chase the his Leggs with hard wisps, then pick his feet, the and wash his mouth with water, then uncloath andim; mount his Rider, Start fair, and then ban refer all the rest to Gods good will and pleama fure,

General

General Observations, Helps and Advertise. ments, for any man when he goeth about to buy an Horfe.

nc Here is nothing more difficult or intricate in in all the Arts of Horsemanship, than to he fet down constant and uncontrolable Resolutions; by which, to bind every mans mind to an unity of consent in the buying of an Horse of For according to the old Adage, That which is a one mans meat, is another mans poyson; what one al, affects another dislikes. But to proceed according ding to the Rule of Reason, the Precepts offer the Ancients, and the Modern practice of ourniti present conceived Opinions; I will as freelyind as I can, shew you those Observations and Adarst vertisements, which may strengthen and for-First therefore, you are to observe, that if T

you will elect an Horse for your hearts contake tentment; you are to take to your felf this edg principal consideration: Namely the end and A purpose for which you Elect him; as whether di for the Wars, for Kuning, Hunting, Travellean Draught, or Burthen, every one having theirs feveral Characters, and their feveral faces, bothe

of beauty and uncomelyness.

ne But because there is but one Tooth, and one of perfection, I will under the description of the A perfect Horse, that is untainted, shew all thour imperfections and attaintures that either naten ture or mischance can put upon the Horse wite greatest deformity. el

Let me then advise you that intend to buy a tife. Torfe, to acquaint your felf wel with all thierue bont lapes and excellencies which belong to an lorfe, whether it be in his natural and true roportion, or in any accidental or outward increase or decrease of any Limb or Member. cate and from their contraries, to gather all things

olu-ence.

d to To begin therefore with the first Principals
orse: f Election, you shall understand that they are ich invided into two special heads, the one gene-

oneal, the other particular.

cor The general Rule of Election, is first the end ts of r which you buy, then his breed or geneouritions, his colour, his face and his statute; eely and these are said to be general; because the Aderst, which is the end for which you buy, for a thing shut up onely in your own

at i The other which is his breed, you must either contake it from faithful report, your own knowthis dge, or from some known and cerrain Chaand ters, by which one strain or one Countrey ether distinguished from another: As the Neapo-avel han is known by his hook nose, the Spaniard by thein's small Limbs, the Barbary by his fine head, bottle Dutch by his rough leggs, the English by his meral strong knitting together, and so forth

one divers others.

f the As for his colour, although there is no conatien good of all, yet there are fome better rese onited than others, as the Daple gray for beauty. be brown Bay for fervice, the black filver hairs Ld

D 2

for courage, and the Lyard or true mixt Roa for countenance: as for the Sorrel, the black without white, and the unchangeable Iron gray, they are reputed chollerick; the bright bay, the fleebitten, and the black with white marks, are Sanguinists; the blank-white, they ellow-dun, the kite-glew'd, and the Pide bald, are Flegmatique; and the chesnut, the mouse-dun, the red-bay and the blew-gray, and the blew-gray and the blew-gray, and the blew-gray

Mow for his pace, which is either Trot and Amble, Rack, or Gallop, you must refer it the end also for which you buy; as if it be so the Wars, Hunting, Runing, or your own private disposition, then the trot is most to lerable. And this motion you shall know be a cross moving of the Horses Limbs, as who the far fore-leggs and the near hinder-legg or the near fore-legg and the far hinder-legg or the near fore-legg and the far hinder-legg his move and go forward in one instant. And in this motion, the neater the Horse taketh his motion, the neater the Horse taketh his motion, the neater the Horse taketh his motion, the ground, the opener, the evener and the shorter he treadeth, the better his pace for to take up his feet sturnly, shews tumbling and lameness, to tread narrow or cross, she enterfairing or falling, to step uneven, she with toil and weariness, to tread long, shews over the reaching.

Now if you elect for ease, great Person him seats or long travel, then Amble is required and this motion is contrary to trotting, so now both the seet on one tide must move and qually together, that is, his far fore-legg as wit the near hinder-legg, and this motion must girl large, smooth and nimble; for to treat and

fall oth

alse takes away all ease, to tread short rids no round, to tread rough shews roling, and to read nimbly, shews a false pace that never continueth, as also lameness.

If you elect for Buck-hunting, for galloping on the High-way, for Post, Hackney, or the ske, then a Racking pace is required, and this solution is the same that Ambling is, only it is in swifter time and shorter tread, and though it is do not so much ground, yet it is a little more asset.

Now to all these parts, must be joyned (which waturally every Trotting and Racking Horse with the Ambler is a little unapt thereunto, we because the motions are both one, so that being who but to a greater swiftness of pace, than naturally he hath been acquainted withall, he handles legs his leggs confusedly and out of order; but belegs his leggs confusedly and out of order; but bend his leggs confusedly and out of order; but bend his leggs confusedly and made to know, and
his inderstand the Motion, he will as well unener dertake it, as any Trotting Horse whatsoever.
Now in a good gallop, you are to observe
here here here vertues.
There here high, that the Horse which taketh his feet
them high, that neither rolleth, nor beats himless that stretcheth out his fore-leggs, follows

felf, that stretcheth out his fore-leggs, follows rion himbly with his hinder, and neither cutteth ired under the knee, (which we call the swift cut) nor crosseth, nor claps one foot upon another, and ever leadeth with his far fore-feet, and not with the near.

This Horse is said ever to gallop most comely and most true and is the fittest for speed, or any other like imployment.

If

Roa

If he gallop round, and raise his fore-see the is then said to gallop strongly, but no fwiftly, and is fittest for the great Saddle, to Wars, and strong encounters.

If he gallop flow, yet fure he will fervest the high-way, but if he labour his feet con fusedly, and gallop painfully; then he is go for no galloping service, besides it shews so

obscure lameness.

Lastly, touching his stature, it must be referred to your own judgment, and the end so which you buy him; ever observing, that it biggest and strongest are sittest for strong of calions, as great burthens, strong draught and double carriage, the middle size for plassure, and general employments, and the least for ease, street walks, and Summer Hadney.

Now touching the particular Rule of election, it is contained in the Discovery of Natural deformities, accidental, outward or inward hidden mischiefs, which are so many, are infinite, that it is a world of works to explain him; yet for satisfactions sake, I will, in a methodical manner as I can, briefly and according to the best conceited Opinions, shown of

can be observed in this occasion

First therefore, When an Horse is brough unto you to buy, being satisfied for his breed his pace and colour, then see him stand nake before you, and placing your self before his face, take a strict view of his countenance and the chearfulness thereof, for it is an excellent Glass, wherein to see his goodness. At thus, If his Ears be small, thin, tharp, pricked an

and moving, and if they be long, yet well fet on, and well carried, it is a mark of beauty, goodness, and mettle, but if they be thick, laved or lolling, wide set on, and unmoving; then are they signs of dulness, doggedness and ill nature.

If his face be clean, his forehead swelling outward, the mark or feather in his face fet high; as above his Eyes, or at the top of his Eyes, if he have a white star, or a white rache of an indifferent fize, and even placed, or a white fnip on his Nose; all are marks of beauty and goodness; but if his face be fat, cloudy or scoulding, his forehead flat as a trencher, which we call marefaced, the mark in his forehead stand low, as under his eyes; if his star or Rach stand awry, or in an evil posture, or inflead of a fnip, his Nose be raw and unhairy, or his face generally bald, all are figns of deformity; if his Eyes be round, bright, black, thining, staring, or starting from his head, if the black of the Eye fill the pit, or outward circumference, fo that in the moving none (or very little) of the white appeareth, all are figns of beauty, goodness and mettle, but if his eyes be uneaven and of a wrinckled proportion; if they be little (which we call Pig-eyed) both are uncomely figns of weakness: if they be red and fiery, take heed of Moon eyes, which is the next door to blindness; if white and walled it shews a weak fight, and unnecessary starting or finding of boggards, if with white specks, take heed of the pearl-pin and websif they water or shew bloudy, it shews bruses, and if they matter, they show old over-riding and feastred

b

2

Ħ 0

t

r

e

a

look and courage; but if his nostrils be straight, his wind is little, if his muzzel be gross his spirit is dull, if his mouth be shallow he will newer carry a bit well, and if his upper lip will not reach his neather, old age or infirmity hath marked him for carrion; and if his nose and he moist land dropping, if it be clear water, it is a cold, if foul matter, then beware the glanders, if both nostrils run, it is hurtful, but if one, then most dangerous.

Touching his teeth, and their vertues, they are at large set down in another Chapter, touching the Horses age; only remember you never buy an Horse that wanteth any, for as good

hey buy an Horse that wanteth any, for as good

age loofe all as one.

the From his Head look down to his Breast, and een look that it be broad, out-swelling, and the adorned with many feathers; for that flews and frength and endurance : the little breft is und full comely, and shews weakness, the narrow brest igle is apt to stumble, fall and enterfair before, and out the breft that is hidden inward, and wanteth the beauty and division of many feathers shews rel- a weak armed heart, and a brest that is unwilral, ling and unfit for any toyl or strong Laind bour.

rel. Next look down from his Elbow to his Knee. et. and fee that those fore-thighs be rush-brown, her well horned within finnowy flesh, and without fwelling, for they are good figns of strength, the contrary shews weakness and are unnatural.

Then look on his knees, that they carry an equal and even proportion, be clean, finowy, and close knit, for they are good and comely,

y Break

Knees

ge, rds

be

lly

Ith

ind

Legge

Horse hath received mischief; if they be groß the Horse is gouty, and if they have scars of hair broken, it is a true mark of a stumbling

Jade, and a perpetual faller.

From his Knees look down his Leggs to his Pasterns; and if you find his Leggs clean, fat and finowy, and the inward bougth of his knee without a feam, or hair broken, then he shew good shape and foundness; but if on the in dide, they are excressions, if under his knee be Scabs, on the infide, it is the fwift cut, and he will ill endure galloping; if above his Pafterns on the infide you find Scabs, it fhem enterfairing. But if the Scabs be generally o. ver his Leggs, it is either extream foul keeping or a spice of the mangy; if his Leggs be fat round and fleshy, he will never endure labour if on the inward bougth of his knee you find feanis, scabs, or hair broken, it shews a mallander, which is a cankerous ulcer.

Look then on his Pastern, the first must be clean and well knit together, the other must be short, strong, and upright standing, for if the first be big or sweld, take heed of sinnew strains and gurding, if the other be long weak or bending, the Limbs will hardly carry the Body

without tyring.

For the hooves in general, they would be black, smooth, tough, rather a little long than round, and hollow, and full sounding, for a white hoove is tender, and carries a shoe ill, a rough gross seamed hoove; shews old age or over-heating, brittle hooves will carry no shoe, an extraordinary round hoove is ill for soul

waies

HOOVE

1

1

waies or deep hunting, a flat hoof that is pummissed, shews foundering, and an hoof that is empty and hallow-sounding, shews a decaied inward part, by reason of some wound or dry founder. As for the Crownet of the hoof, if the hair be smooth and close, and the slesh fat and even, all is perfect; but if the hair be staring, the skin scabbed, the slesh rising, then look for a ring bone, a Crown scab, or like mischief.

After this, stand by his fide, and first look to the fetting on of his head, and fee that it stand neither too high nor too low, but in a direct line; and that his neck be small at the setting on, and long growing deeper and deeper, till it come to the shoulders with an high, strong, and thin Creft, and his Mane thin, long, foft, and somewhat curling, for these are beautiful Characters; whereas to have the head ill fet on, is the greatest deformity, to have any bigness or swelling in the nape of the neck, shews the Pole evil, or beginning of a Fistula: to have a short thin neck like a Bull, to have it falling at the withers, to have a low, a weak, a thick, or falling creft, shews want both of strength and mettle, and to have much hair on the mane, shews intolerable dulness; to have it too thin, shews fury, and to have none, or too fled, shews the worm in the mane, the itch, or elfe mangies.

Look then to the chine of his back, that it be broad, even and straight, his ribs well compasfed, and bending outward, his fillets upright, strong, and short, and not above four singers between his last rib and his huckel-bone, let poch

his body be well let down, yet hidden without from his ribs, and let his stones be close trust up to his body, for all thefe are marks of good perfection. Whereas to have his chin narrow, he will never carry a Saddle without wounding, and to have it bending or Saddle backt, Thews weakness; to have his ribs fat, there is no liberty for wind : to have his fillers hanging long or weak, he will never climb an hill well. nor carry burthen, and to have his belly clung up and gaunt, or his stones hanging down close or lide, they are both ligns of fickness, tenderness; or foundering in the body, and unaptness for labour. Then look upon his buttock, and fee that it be round, full, plump, and in an even level with his body; or if long, that it be well raifed behind, and fpread forth at the fetting on of the tail, for thefe are comely and beautiful: the narrow pin buttock, the Hog or Swine rump, and the falling or downlet-buttock are full of deformity, and shew both an injury in nature, and that they are neither fit nor becoming for Pad, Foot-cloath, or Pillow.

Then look to his hinder thighs, or gafcoyns, that they be well let down, even to the middle foint, thick, browny, full and fwelling, for that is a great argument of ftrength and goodnels; whereas the clean, lanck, thender thigh, shews disability and weakness. Then look upon the middle joint behind, and fee if it be nothing but skin and bone, veins, and finews, and rather a little bending then too ftraight, then it is perfect as it should be; but if it have chops or foars in the inward bougth or bending, then it is a Sellander.

h

Ó if

j

C t

ŧ

t

h

If the joynt be swel'd generally all over, then he hath gotten a blow or bruse, if the swelling be particular, as in the plot or hollow part, or on the inside, and the vein full and proud; if the swelling be short, it is a blood spaven, if hard, it is a bone spaven, but if the swelling be just behind, below the knuckle, then it is a curb.

Then look to his hinder leggs, and if they be clean, fat, and finowy, then all is well, but if they be fat, they will not endure labour; if they be swel'd the grease is molten into them, if they be scabbed above the Pasterns, he hath the Scratches, if he have chaps under his pasterns, he hath the Pains, and none of these but are dangerous and noisome.

Lastly, For the setting on of his tail, where there is a good buttock, there the tail can never stand ill, and where there is an ill buttock, there the tail can never stand well, for it ought to stand broad, high, stat, and a little touched inward.

Thus I have shewed you true shapes, and true deformities, you may in your choice please your own fancy.

Certain Infallible Helps and Cures for those Infirmities which are most dangerous, and do commonly attend all Horses; especially the Runing Horse.

First of Sickness in General.

thensoever upon any occasion, you shall find your Horse to droop in Countenance, to forsake his meat, or to shew any apparent sign of sickness; if they be not great, you may forbear to let blood, because where blood is spent, the spirits are spent also, and they are not easily recovered; but if the signs be great and dangerous, then by all means let bloud instantly, and for three mornings together, the Horse being fasting, give him half an ounce of the powder called Diahexaple, brewed either in a pint of the purest

and finest sirrop of Sugar, being two degrees above the ordinary Molosses, or for want thereof Molosses will serve the turn, or where all are wanting, you may take a pint either of Cardus water, or else Dragon water, or a quart of the sweetest and strongest Ale-wort; and this must be given him in a Horn, and if the Horse have ability of body, ride him in some warm place after it, and let him fast near two hours more.

At noon give him a sweet Mash, cloath warm,

and let him touch no cold water.

赤

es

nd

ng

u

in

y

e

y e

d

Now for the exact and true making of this powder, which I call Diahexaple, because no man that I know, either Apothecary or other, doth at this day make it truly, partly because it is an experiment lately come to my knowledg, by conference with Learned Physitians, and partly, because our Medicin-makers are in Horse-Physick less curious then they should be; through which errors there is produced to the world abundance of false mixtures; which both deceive the honest Horse-master, kills the harmless Horse, and disgrace the well meaning Farrier.

To repair all which, I will here set down at large the true manner of making this admirable powder, together with the vertues and operations

thereof.

Take of it arounds of Paradife, of Jurry + Myrrh, of irody

I chala tampana, of Turmerick + lenhan, of each a like quent Diahexaple

to; then beat + searle them into a subtile Powder, + sive it that

who a quentity, as is before or rected. This refished it paintfection of

unors, construit + broughters is invosed parts, open and into

structions, helps is Lungs, + it taken in time, not only recover

k is troops, but preventely many other distempers.

Certain necessary Observations and Advan tages for every Keeper to observe in funda accidents.

Here is no unreasonable Creature of pleas I fure, subject to so many disafterous chances of Fortune as the Horse, and especially the Runing Horse; both by reason of the multiplian city of Diseases belonging unto them, as all the violence of their exercise, and the nice ten of derness of their keeping. And therefore it be jud hoveth every Keeper to be armed with fuch Ob differentions as may different mischiefs, and those fed, helps which may amend them when they happen.

Observations for Sickness and Health.

He first Observation thererefore that I vill would arm your Keeper withall, is to in So discern sickness from health. As thus.

If you find in your Horse heaviness of countervell nance, extream loosness, or extream costiveness, vel imperfect eyes, rotten or dry cough, staring hair, a or hair unnaturally discover d, a staggering pace and frantique behaviour, yellowness of the eyes and its ing down or beating, or looking back at his or l

body,

nd her ody, alteration of qualities and gestures, not asking his coat, leaness, hide-bound, and the ike; all these are apparent signs of distempeature or sickness.

Observations from the Dung.

plea han

v the

Horses dung, for it is the best till troth ten of an Horses inward parts, yet he must not be udge it by a general opinion, but a private Ob- liscourse with himself, how the Horse hath been those ted, because food is the only thing.

As Thus.

If the Dung be clear, crifpe, and of a pale and whitish-yellow complexion, lianging together without separation, more then as the vaight breaks it in the falling, being neither so thin that it will run, nor so thick, but it at will a little flat on the ground, and indeed both to in savour and substance, somewhat resembling sound mans ordure. Then is the Horse clean, note well sed, and without impersection; if it be sels, well coloured, yet sall from him in round knots and a pellets: But if all his dung be alike, then it air, a sign of soul feeding, and he hath either too are much Hay, or ears too much Litter, and too and little corn.

ly. If his Dung be in round pillets and blackish his or brown, is shows inward heat in the body; if dy,

it be greafe it shews foulness, and that greafe if molten but cannot come away ; if he doth tra void greafe in grofs substance with his dung He if the greafe be white and clear, then it come for away kindly and there is no danger; but if be yellow and putrified, then the greafe hat it lain long in his body, and sickness may fol fee low if not prevented : if his dung be red an hard, then the Horse hath had too strong hears bo and costiveness will follow; if it be pale an loofe, it shews inward coldness of body or to ul much moist feeding.

Observations from the Urine.

A S the Keeper hath thus a principal respective to the Horses dung, so he shall take fome little Notes from the Urine also, and though they be not altogether so materials if Physitians Vrina est Meritrix, Urine is a deceine ver, yet it hath some true faces. As thus, Theor Urine which is of a pale yellowish colour, rate ther thick then thin, of a strong smell and rel good Urine; but if you find any note or combe plexion contrary to these, then in the Horse is some impersection. As thus, If the Uring in the of an high and ruddy complexion, either in like blood or inclining to blood, then hath the ni Horse either had too fore heats, been over worked ridden, or ridden too early after winter grass is

ty.

transparant, like old March beer, then the Horse is inflamed in his body, and hath taken fome surfeit.

If the Urine carry a white cream on the top,

hat it shews a weak back and consumption of

d and A green Urine shews a consumption of the

leats body.

an An Urine with bloody ftreaks, shews an r to ulcer in the Kidnies, and a black thick cloudy Urine, shews Death and Mortality.

Observations in Feeding.

foed Take A Gain, Our Keeper must observe, that if there be any meat drink or other nourials rishment which he knoweth good for the Horse, on o if the Horse resuseth to take it; in this case the Horse refusets to take it, in this case be shall not violently thrust it upon the Horse, The or by force cram him therewith, but by gentle iegrees and coming enticements, and by proan tess of time win him thereunto; tempting him dan when he is most hungry or most thirsty, and if come get but a bit at a time or a sup at a time, Horse t will soon increase to a greater quantity, dring and ever let him have less then he desireth. ithe and that he may the sooner be brought to it, the bix the meat he loveth best with that he loveth over worst, the drink he loveth the best, with that rass te loveth the worst, till both be made like familiar. E 2

familiar, and so shall the Horse be a stranger to nothing that is good or wholsome.

Observations in Case of Lameness.

A Gain, Our Keeper must observe if his Horse be subject to lameness or stifness of joints or sinows, subayting or tenderness of feet, first to give him his heats upon soft and smooth carpet earth; and to forbear stony ground, hard high-ways, cross surrows, till extremity compell him.

Observations from the state of the Horses Body.

IT is good for our Keeper to observe, that the strongest estate of body, (which I account the highest and fullest of sless, so it is good, hard, and without inward foulness) to be the best and ablest for the performance of Wagers; yet he must herein take to himself two considerations; the one the shape of the Horses body, the other, his inclination and manner of feeding.

For the shape of Horses bodies, there be some Horses that be round plump and close knit to gether; so that they will appear fat and well shaped, when they are lean and in poverty

other

qi oi do

gr

at

Æ

m

in

ja

others are raw-boned, flender and loofe knit together, and will appear lean, deformed, and in poverty, when they are fat, foul, and full of gross humors.

So likewise their inclinations, some Horses (as the first before named) will feed outwardly, and will carry a thick rib, when they are inwardly as clean as may be, and without all man-

ner of foulness.

er to

his

fness

s of

it be

) to

e of

nfelf

the

and

ome

ty:

There be others (as the latter) that will appear clean to the eyes, and shew nothing but skin and bone, when they are full of inward fatness, and have guts as full as may be. In this cafe, the Keeper hath two helps to advantage his knowledge, the one outward, the other inward.

The outward help is the outward handling and feeling of the Horses body, generally over all his ribs, but particularly upon his thort and hindmost ribbs ; if his flesh generally handle foft and loose, and your fingers fink into it as into down; then is the Horse foul without question: But if generally it be hard and firm, only upon the hindmost rib it handleth foft and downy. Then it is a pregnant sign, there is greafe and foul matter within the Horfe, which must be avoided, how lean or poor soever he appear in outward speculation.

The inward help is only sharp exercise and strong scowrings, the first will dissolve and melt the foulness, the latter will bring it away

in abundance.

t to. If your Horse be fat and thick, and as it well were closed up between the chaps, or if his jaws handle fleshy and full, it is a fign of much hen ES foulness

Observations concerning

foulness both in the head and body, but if he handle thin, clean, and only with some lump or small kirnels within his chaps, then it is only a figne of fome cold or poze newly taken.

Observations from the Privy Parts.

T is good for our Keeper to observe his Horses stones, if he be stoned, or if they hang down side or long from his body, then is the Horse out of lust and heart, and is either lick of greafe or other foul humors, but if they be close couched up, and lye hid in a very small room, then is the Horse in health and good plight.

Observations from the Limbs.

IT is good for our Keeper to observe every night, before he runs either match or heat, to bath his Horses legs well, from above the Knees, and above the Cambrels downwards, with either Dogs grease, which is the best, or Trotters oyl which is the fecond, or the purel clarified Hogs-grease that can be got, which is most tolerable, and to work it in with his hands and not with melting at the fire; and what he gets not in the first night, will be got in the

f he next morning, and what he gets not in the next morning, will be got in when he comes to un-it is cloath at the end of the Course, so that you hall need to use ointment but once, but the Fricals or Rubing, as often as you find oppor-Call R Meener for tunity.

Observations for the giving of Water.

Our Keeper shall observe, that albeit I give no directions for the watering of his r if Horse in the Evening after his heat, yet he d is may in any of the three latter fortnights, (finding his Horfe clean, and his greafe confumed or gone away) somewhat late at night, as about fix of the Clock give his Horse water in reasonable quantity, being made milk-warm, and faiting an hour after it.

Also if the weather be unseasonable, then you shall at your watering hours, water in the house with warm water, putting a little quanvery tity of hot water into a greater of cold, and fo make it milk-warm; if you throw a handful of wheat-meal, bran, or oat-meal finely pounded,

but oat-meal is the best.

the plant in

gralfe and bleered to morve, a she fivere son that all to B4 Observations

Observations in the choice of Ground to Run on.

UR Keeper shall observe, that if the ground whereon he is to run his match be dan gerous and apt for strains, slips, over-reached and the like, that then he is not to give all hi heats thereon; but having made his Hors acquainted with the nature thereof, then either to take part of the course, as a mile, two three, according to the goodness of the ground and fo to run his Horse forth and back a gain, which we call turning heats : Provide alwaies, that he end his heat at the waighing post, and that he make not his course less bu rather more in quantity then that he must run! but if for some special occasions, he like not an part of the Course, then he may many times, be (but not ever) give his heats upon any other in good ground, either forth right and turning or where the Horfe may lay down his body, and et run at pleafure.

Observations from Sweating.

UR Keeper shall take special regard in all his airing, heating, and all manner of Exercise and Motion whatsoever, to the sweating of his Horse, and to the occasions of his his sweating: as if an Horse sweat upon little

or fii rei wa as

fw

is

ex

WE

H

fo

ar re

or no occasion, as walking foot-pace, standing fill in the Stable, or the like; it is then apparent that the Horse is faint, foul fed, and wanteth exercise; but if upon good occasion, as strong hears, and the like, he sweat, if his sweat is white, frothy, and like foap suds, then is the Horfe inmardly foul and wanteth alfo exercise; but if the Iweat be black, and as it were only water thrown upon him, then is the Horse in good lust and good case.

Observations from the Horses Hair.

VUR Keeper shall observe well his Horses Hair in general, but especially his neck not and those parts which are uncovered, and if they be fleek, smooth, and close, then is the Horse ther in good cafe; but if they be rough and staring, ing or any way unnaturally discoullered; then is eld, the Horse inwardly cold at the heart, and wantand eth cloaths and warm keeping, or elfe there is fome fickness creeping upon him.

Many other Observations there be, but these are most material, and I hope sufficient for any

reasonable understanding.

MATHEW HODSON'S

Medicines.

A Medicine for the Glanders.

Ake a quart of red Vinegar, being mo Wine Vinegar, put it over the fire, and put thereto two spoonfulls of English the Hony, two spoonfulls of Allicompane, beater into fine Powder, and Cerse it through a fine Cercer, and as much Roach-Allum as the bigness of an Egg, beaten into fine Powder, halfa Pint of Sallet Oyl, put in your Sallet-Oyl after all these have boiled together one quarter of an hour; then take it off the fire, and let it stand untill it be Milk-warm, then give your Horse six spoonfulls in each nostril with a little horn: after you have given this drink, ride him two or three turns and no more, then tye his head down to his foot for the space of four hours; then let him fast four hours, you must give this

vet

nd

his drink at nine several times being three dayes etwixt every drink; every second day after hath had his drink, give him chickens guts harm rolled in beaten Bay-Salt, and put them lown his throat, giving him warm water and wet hay all the time you give him this drink, nd this will amend the Glanders, and the fourning in the Chine. Probatum eft.

A Medicine for any Cold that is not the Glanders.

TAke two spoonfulls of Pepper well beaten, two spoonfulls of mustard, four spoonfulls of Sallet Oyl, four roafted Onions roaftd very foft, and cut them very small; then g no uke two spoonfuls of Alicompane made into fine and powder, mingle all these together, and make glil them into Balls with fresh butter, and give your Horse three Balls at a time; Nine Balls given fine three times will cure him, fo you travel him roots, of each two ounge, ai noque

For a Strain in the Shoulder.

and orfe Ake two Ounces of Oyl of Pumpillion and two ounces of Oyl of Spike, two ounces of Lint-seed-Oyl, rub these Oyles well together upon his shoulder, and warm it in with an hot iron, then let him be blooded in the shoulder, and hopple his forefeet together, and this will cure him.

fter

f an

S

60 Deberal Excellent Devicines.

A Cure for a Sinew Sponge Horfe.

Ake a Pint of Lint-feed-Oyl, and boyli then put in three penny worth of Aqui Vitæ, and stir them together, then anon your Horses Leg with it, and this will cu him.

The true manner of making those Balls which her Cure any violent Cold or Glanders, which prevent heavy Sickness, which purge am tre all molten greafe, which recover a toofe for 701 mach, which keep the heart from faintin he with exercise, and make a lean Horse fa Markham juddainly.

Ake of Annifeeds, of Cumingleeds, of Fen and greek feeds, of the fine cearfe powder of the Ellecompane roots, of each two ounces bearen by and cearst to a very fine dust; then add a them two ounces of brown Sugar-Candy beatte de to powder, and two ounces of the flower of we Brimstone: then take an ounce of the fire is girle of Licoras, and dissolve iron the fire is girle of Licoras, and dissolve iron the fire is girle of Licoras, and dissolve iron the fire is girle of the done it takes half a pint of white wine; which done; take an ounce of the best Chymical Oyl of Anni to feeds, and three ounces of the firrop of Colting and the purest sirrop of Sugar or Mollosses, of

ch er ow

or ull ull:

ot,

ot OT

re

h

ch half a pint : then mix all this with the forer powders, and with as much fine wheatork them into a stiff past, and make thereof ulls, fomewhat bigger then French Wall-nuts, oyli ulls and all; and so keep them in a close Galli-Aqui ot, for they will last all the Year; yet I do anois of mean that you should keep them in the I cur of in Balls, for because they cannot lye close, he Air may get in and do hurt, as also the frength of the Oyles will sweat outward, and reaken the substance ; therefore knead the. whole lump of past into the gallipot, and nake the Balls as you have occasion to use hem.

which hem.

Now for the use of these Balls, because they

ami tre Cordial, and have divers excellent vertues, re Cordial, and have divers excellent vertues, ou shall understand, that if you use them to revent sickness; then you shall take one of hese Balls and anoint all over with sweet buter, and so give it the Horse in the morning in the manner of a pill: then ride him a little ster, if you please, otherwise you may choose, and feed and water him abroad or at home, in the feed and water him abroad or at home, in the feed and this done where or four mornings.

If you use them to cure either cold or glanders, then use them in the same manner for a week together.

If you use them to fatten an Horse, then give them for a fortnight together.

But if you use them in the nature of scowrings

But if you use them in the nature of scowring to take away molten grease or soulness, then sittle instantly after his heat and in his heat you must use them:

Again,

ach

g.

Again, if you find your Horse at any time ther hath taken a little cold, as you shall perceive for by his inward ratling; if then you take one other these Balls, and dissolve it into half a pinto will Sack, and so give it the Horse with an Homitisa present remedy.

Also to dissolve the Ball in his ordinary water being made milk-warm, it worketh the like

effect, and fatneth exceedingly.

To give one of these Balls before travel, prevents tyring; to give it in the height of travel it refresheth weariness, and to give after travel, it saves an Horse from surfeits and inward sickness.

An approved Cure for the Botts, and all to manner of Worms, of what nature for kill ver.

Ake a quart of new milk, and as much of the purest clarified Hony as will make it extraordinary sweet; then being lukewarm, give it to the Horse very early in the morning, he having fasted all the night before; which done, bridle him up, and let him stand tyed to the empty Rack for more then two hours.

Then take half a pint of White-wine, and Ey dissolve into it a good spoonful or more of mobile Soap, and being well incorporated toge-

ther

tim ther (the Horse having stood two hours as tein foresaid) give it him to drink, and let him fast new other two hours more after it, and the worms nto will avoid in great abundance.

another most Excellent Receipt for the Botts or any Worms, which is most easie and most certain without sickness.

TAke the foft downy hairs which grow in an in the Ears of an Horse, and which you clip away when you coul him, and the little hort tuft which grows on the top of his forehead, underneath his foretop, and having a pritty quantity of them, mix them well with a pottle of sweet Oats, and so give them to the Horse to eat, and there is not any thing that will for kill worms more affuredly.

> An uncontrolable way how to know the Age of any Horse.

THere are Seven outward Characters by and I which to know the age of every Horse, as namely; his Teeth, his Hoofs, his Tail, his and Eyes, his Skin, his Hair, and the Barrs of his of mouth.

ne Sood two Louis as

If you will know his Age by his Teeth, you year must understand that a Horse hath in his head just forty teeth; that is to say six great wans nee teeth above, and six below, on one tide, and a gro many on the other, which makes twenty four at and are called his grinders. Then six above the and six below in the forepart of his mount which are called gatherers, and make thirty fir their Then four Tushes, one above and one below of lest one side, and one above and one below on the other fide, which is just forty.

Now the first Year he hath his Foals Teeth ing which are only grinders and gatherers, but no be n Tuftes, and they be small, white, and bright to

look upon.

The Second Year he changeth the four year foremost teeth in his head, and they will A appear browner and bigger than the of tul you ther.

At three Years old he changeth the Teeth ever next unto them, and leaveth no apparent his Foals teeth before, but two of each fide above, A and two below, which are also bright and exce fmaH.

At four Years old he changeth the Teet tire next unto them, and leaveth no more Foals in teeth, but one on each fide, both above and vell below.

At five Years old his foremost Teeth will be Tee all changed, but then he hath his Tulhes on A each side compleat, and the last Foals Teeth wor which he cast, those which come in their and place

The Master Medicine of all Medicines, for a Back Sinew Strain, or any grief, pain, straightness, shrinking, or numness of joynts or sinews.

Take a fat sucking Mastive whelp, slay it, and bowel it, then stop the body as full as it can hold, with gray Snails, and black Snails; then roast it at a reasonable fire, when it begins to warm, baste it with six ounces of the oyl of Spike, made yellow with Sassron, and six ounces of the oyl of Wax; Then save the drippings, and what moisture soever fals from it, whilest any drop will fall from the Whelp, and keep it in a Gally pot.

With this owntment amoint the strain, and work it in very hot, holding a hot bar of iron, before it; And thus do both Morning and Eve-

ning, till the Cure be finished.

St. Antayne his only Excellent Medicine, for any strain or Swelling.

Take Cummin Seeds, and bruise them gross, and boil it with the oyl of Camomile, then add to it so much yellow Wax, as will bring it to the body of a Cerrot or Plaister, and spread it on either Cloath or Leather, and very hot apply it to the grief. It is wonderful soveraign for any man also.

24 Several Excellent Bedicines.

with as much fine Bean-flower, or Wheat-flow er, but Bean-flower is the best as will thicken it, bring it to a stiff Salve, then spread it a bout the grieved place, and renew it as it drieth.

A perfect Cure for any Sinem strain.

Ake a live Cat, either wild or tame, and cut off her head and tayl, then cleave he down the chine, and clap her hot, the bowd and all upon the strain, and remove it not for forty eight hours, and the effect is great.

Markham's own Balm, which bath never falled him, for any strain in the Shoulder, a other part, hidden or apparent; Or an Wind-gall, Pain or Swelling what soever.

Ake ten ounces of the best and purest Peers grease, and melt it on the fire, then take it off, and put it into sour ounces of the oyl of Spike, and one ounce of the oyl of Origanum stir them very well together, then put it up is to a Gallipot.

With this Oyntment anoint the grieved part the Oyntment being made exceeding hot; and rub and chafe it in with all painfulness, holding an hot bar of iron before it, and thus anoin once in two dayes, but rub and chafe it in, twit or thrice a day at the least, and give the Horse moderate Exercise.

This is approved and infallible.

For swell'd or Gourded-legs, whether it be by reason of the Grease failing into them, other accident, as Scratches, Pains, Mules, &c.

TF your Horses Legs be swell'd only, because the Greafe is faln into them, and that there is no other outward Ulcer; neither will the bathing with cold water, and other outward helps affwage it. Then you shall take a piece of strong course woollen cloth, and thereof make him an hofe, a pretty deal larger than his leg, to reach from the lower part of his pastern, up to the Cambrel, or to the Knee, and make it close and straight at the pastern, and wide above. Then take a pottle of Wine Lees (if you can get them) or else the Grounds or Lees of ftrong Ale or Beer, and fet them on the fire, and boyl them well; then put to them a pound of clarified Hogs grease, and when it is melted. and stirred well together, take as much wheat Bran as will thicken it, and bring it to the body of a Pultus, with this Pultus as hot as the horse can suffer it (only you must not scald) fill the hofe or hofes, and then close the hofe at the top.

With this Pultus let the Horse stand two dayes, then the third day open the hose at the

top,

hold anoin twice

top, but ftir not the Pultus, only take molten Hogs-greafe, hot as the horse can suffer it, and with a spoon powr it unto the Pultus on every side, till it will receive no more, for this will renew the strength of the Pultus. Then close up the top of the hofe, and fo let the Horfe stand other two dayes, or three. Then you may open the Leg and rub it down, and if you find ftrong occasion, you may apply another new Pultus, if not, your cure is wrought.

Now, if besides the swelling of his Legs, your Horfe hath Ulcers, or Chaps, or Scratches, Pains,

Mules, or the like.

ForChang

Copperas water

Then you shall first apply the former Pultus, in ghed, in all respects as aforesaid; then after five or fix dayes application, when you take the Pultus away, you shall take a quart of old Urine, and put to it half a handful of Salt, as much of Allom, and half an ounce of white Copperas, and boil it till all be mixt and incorporated together; then with this water very hot, wash the fores once or twice a day, and after a little drying, anoint them with the oyntment called A. gyptiacum, and is made of Vinegar, eight ounces, of honey, twelve ounces, of Verdigreafe two ounces, of Allom one ounce and an half; boil to that height, till it come to a red Salve; and it will both kill the malignant humours, and also heal and dry up the fores.

Ano-

Another approved Cure for the Scratches, or any Disease of that Nature,

TAke of Hogs greafe eight ounces, of Brimftone, of Lime, of Gunpowder, of each three Ounces, of black Soap eight ounces, and of foot as much as will furfice to bring the reft to a Salve, boyl the Hogs greafe and Soap together, and bring the other hard simples to a fine powder, and so mixe all together, and make a black ointment; with this annoint the fores once a day, after they are cleanfed and made raw.

For any Splint, Spaven, Ringbone, Curb, or any other hard Knot or Excres-Gion.

First, having taken view of the Excression, clip away the hair as far as the Excression goeth, and a little thought more; then take a a piece of Allom'd Leather, made as big just as the place you have bared, and fit it to the fame proportion. Then take a little Shoo makers Wax, and spread it round about the very Edge or Verge of the same ; Leaving all the inward or middle part empty, and not touched with the Wax, according to this Figure O. Then take of the herb called Sparegras, which hath the vertue to raise blisters, and bruising it in a Mor-

tar,

day, lean. the e the oon, ng. nout ons; ble: the

Neither wash your Horse nor walk him ; for the first endangereth foundering in the body or feet, and breedeth all furfeits; the latter is the ground of all ftrong colds, which turn to Glanders and Rotenness : but if necessity compel you to either, as foul ways and long stays, then rather wash your Horses legs with pails of water at your stable door, than to endanger him in any Pond or River.

And for Walking , rather fit on your Horses back to keep his spirits stirring, then to lead him in hand, and with dull spirits to receive all

manner of mischief.

This I think fufficient for clean and Ordinary keeping.

An Order how to breed Horses.

The choice of your Stallion and Studd Mares.

Irst and principally you must foresee, that your Stallion and Studd Mares be both of good and lively nature, and not subject to any natural diseases. For as heavy Horses and Mares will breed Colts of roilish and heavy nature, so if they be insected with any natural disease, their Colts for the most part shall be troubled with the same disease.

Wild Mares be not best to keep for the Race.

Stud Mares, and make them tame and easie, whereby, besides the commodity you may have of their work, which cannot hurt their taming if they be soberly handled, you may be sure at all times to remove them from one Pasture to another, to bring them to be covered, and to take their Colts from them without great trouble; whereas wild Mares be not only combertion to keep, but also oftentimes do destroy the colts in their beslies with their rashness, when you should handle them or any of their fellows.

Y fi Y L L L

1

*

1

At what age your Mare is first to be handled and covered.

The best age to take up your Mare to make her tame, and to break her, is, when she shall be two years old and the vantage, and so you may the year following, when she shall be fully three years old and upward, put her to your Horse to be covered, which in my opinion is the best age to put her first to the Horse. Although some Writers be of opinion, that it is best that she be first covered at two year old.

How to inforce your Mares to come to be strained.

Ou may most conveniently bring her to be covered of your Stallion, if sour or sive days before you will bring her to your great Horse, you cause to be put to her in some close Pasture kept and senced for that purpose, some small stoned Nag to wo her, that she may abide your great horse, foreseeing that he be in no wise unsettered longer than some diligent man doth look on, for if the Nag be at liberty at any time after she is disposed to take the horse, she will be sure to be covered of him, though he be lower than she by a cubit.

The Order of covering.

W Hen you do perceive that your Mare will abide the Nag, and doth shew other tokens that she is desirous to be covered, you must cause

that

n of

any

, lo

bled

the

s. At cause your great horse that shall cover her to be provendred, and not to drink much the night before he shall cover her. Then in the morning following at the Sun rising, you may bring him to your Mare, or her to him in some such place, as neither of them can leap out of, where when he hath covered her twice or thrice, set her remain feeding on Grass with her Cost kept by her without water, but let your horse be taken up, well rubbed and well provendred to the next evening. And then put him to your Mare again where you lest her, and let him cover her as often as he will that night, except you see your horse chase so much that he will marr himself.

How to use your Mare which is covered.

And so must you of force be driven to take him from her the second time till the morning sollowing, at which time (except your Mare be satisfied with that which was done before) you must put to your horse the third time, and when he hath covered her as often as he will, between four of the clock in the morning and eight of the clock before noon, take up your horse, and let your Mare be led into some water to the myd side at least, where she may drink water, but not too much, and then let her be led and turned to the whole studd, where no other Horses must come for a whole Month at the least to beat her.

57

How to make that no Mare fhall go barren.

A Nd when you have thus feverally caused to be covered all your Mares, you must about Lammas in the month of July or begining of Anguft, get a Mare or two which have not been covered that year before, and inforcing them to be horsed by such means as before appointed, when they shall be ready to be covered, you must rurn them with some other Stallion, whom you effeem not as your best horse among your stud of Mares, and so he covering that Mare or Mares you turned in with him unto the fludd, shall cause the reft (if any of them have not conceived at their first covering) to come to that horse again, whereby you shall be fure to keep no Mare barren all the year, but to have of every Mare a Colt, though not by your best horse; you may suffer that horse to run amongst your Mares, three weeks or a month. But if you turn him into your studd, putting no Mare in with him ready to be covered, he will at his first entry bear all your Mares, and so happily hurt all your Mares which had conceived before, and fo do more hurt than good.

What time of the year is best for your Mares

He best time of the year to have your Mare covered, is, from the end of May to the end of July, and then shall your Mare, which alwaies goes with foal one year lacking a month,

IV. For the Flapps in an Horses mouth.

To know this, you shall perceive his Lips to be swell'd on both sides of his mouth, and that which is in the blisters is like the white of an Egg; you must cut some slashes in it with a knife, then rub it once with Salt and it is cured.

Proved.

V. To rot a Sore or Swelling.

A Noint the Sore or Swelling with cold Bacon grease once in two days, till it be sost, then open the skin with a Penknise at the bottom of the Sore, and let out the filth; and so heal it up with your healing Salves. Proved. See the Water and Green Oyntment, 48.

VI. Directions how to lay a Wound open, and where; and how to miss the Veins under it, be it in Body or Legs.

When you cut a Sore open, lay it drayning at the bottom, or a little lower: Be sure H 4 alwayes

alwayes to do this; To miss the Master vein, if it lye lengthwise in the body, be fure to cut under the Vein; If it be a Sore upon the Leg. that lyes right over the Vein, then cut it fide. ways of the Vein right up and down. If a Son happen to be hollow a great length, be it in Bo. dy or Legs, then cut a hole at the lowest place, that the filth may drawn from the Sore the berter, then put in your finger under the Vein, and when your finger is past the Vein upwards far as it will go, cut at your fingers end another hole, and if you fee occasion, turn your finge to another place, and at your fingers end cu another hole. If you chance at any time to de a Vein in peices, put in a peice of a Hares skin with the wool on, or Cony wool, but Hare is best, and this will stop the bleeding. Proved

That Hares wool will stop bleeding sooner than most things: See 3. To stop bleeding in Veins that be cut.

VII. The way to put in a French Rowel.

Hat is, upon the lowest part of the Horse breast to that side that is lame, you shall with a sharp knife cut the skin through, not cross the breast but right down, half the length of your singer, then put your singer between the skin and the slesh, and raise the skin from the slesh round about the hole the breadth of a six pence, then take a peice of the upper leather of

a shooe, and cut it in manner of this of Figure here prescribed; cut the peix of Leather round, and then cut out a hole of

XIII. For a Horse that hath his Fundament fallen out: or for a Cow that hath the Mother fallen out.

Take an armful of Willow boughs, and dry them on a hot Hearth, when they are dry fweep the hearth as clean as you can, and fet them on fire and burn them to ashes, then take the ashes and searce them through a fine boulter, and before you strow on the powder of the ashes, wash the Fundament with warm water to make it as warm as the body, then strow on the finest of the ashes, and put the Fundament up into its place, then tye a line to the Horses tayl and bring it between his hinder Legs, and faften it to a Suffingle under his belly pretty ftraight; using this means his Fundament will be kept up, and in a very short time, it will be knit firm and strong again. If the Mother of a Cow come, use but the aforesaid means, and you will find it a perfect remedy. both Proved.

White Pepper beaten finely and searced through a fine searce, the Fundament being well warmed with warm water or milk, and after warmed with a warm cloth, and then this beaten Pepper strowed upon it, and so put up, and his tayl tyed close between his Legs, as before, you

will find it very good.

A Marrow-bone of a Bullock burnt in the fire and beaten to fine powder, is, for a Wound, a great and good dryer and healer, and will skin a Wound.

Proved.

The inward and outward bark of a Willow-

tree,

fv

G

it

2

y

h

W iii tree, first dryed and afterwards, the hearth being swept very clean, burnt to ashes, and the ashes sifted through a fine boulter: the finest of these ashes is good to dry up any Sore, nothing like it. These ashes are likewise a great binder for a loosness in horses or Cows bodies. Proved.

XIV. To kill Lyce of Horses and Cows.

Take a quantity of Hogs greafe and anoint the Horse underneath the Mane, and upon the ridge bone of the back; it will burst them all presently.

XV. For a Stub or other hurt in or about the Foot.

Take Bees wax, Pitch, Hogs grease and Turpentine, boyl them together in an earthen
pan, but put in the Turpentine a little before
you take it off the fire, and stir it well together,
make the wound clean and pour it in scalding
hot, dip hardes or tow in it, and stuff the place
where it is hurt full with it, and it will heal it
in a short time; this will last a year. Proved.

XVI. To Cleanse any Wound old or new.

Take the Roots of Elder and beat them to powder, and boyl them with English Hony: It is good to cleanse any Sore old or new. But take this for a general observation, that before you dress any Wound, let it be where it will about the Horse, wash it clean first with white-wine

white Wine, boyl in it a quarter of Roach Allum, and when it is boyled, and coole, it must be fquirted in with a Syringe, as far into his Yard as you can, this will cure him in a few times do. ing. Proved.

XXVII. A pretious Oyntment, that will cure any Wound, Old or New.

TAke half a pint of refined Sallet Oyl, and put it into a Skillet, and put to it a quarter of a pound of Rolin, boyl these together, and when it is boyled, put in three pennyworth of Verdigrease beaten to a fine powder , fin them well together, and keep it for your ule; if the wound be hollow and deep, put in a tent of this Oyntment to the end of the wound; 1. nointing it beside: Proved. Train Oyl and Verdigrease melted together, will heal and skin any wound well and quickly.

XXVIII. For a Farcyn.

Ou must first give him the drink that is made I with Running water, in that Receipt which you are to give once in three dayes; For this Farcyon you must in the morning before he hath drunk, give him that drink made of the Running water, the same morning sear the head of every bud with a hot Iron, then take yellow Arfenia and beat it to powder, and mix it with blad Sope, as much Arsenick as a Hasel-nut, to a much black Sope as a spoon will hold or a little on l more, then lay on a little at a time for once and no more, lay it on no where, but just on the top par

it i

Wo

hay

or head of the bud of every Farcyon, as much as contain to a peafe will ferve, being laid upon the top or head of every Farcion, and within one Week you shall fee them all drop out; then do nothing but anoint the hole with Sallet Ovl once a day till it be whole, and it will cure him; be fure to do as I have directed and no otherwife, for Arfenick is rank Poyfon, and a great eater. Proved.

XXIX. For Solebatted with going without Shooes.

Or a Horfe that is Solebatted by going without Shooes, you must first pare him pritty dose towards the Toe, then take a Pen-knife, and with the point cut a little hole through the bottom of the Hoof, a matter of half an inch from the Toes end right over the vein, and let the vein bleed a quarter of a pint, then fet on his Shoes pretty hollow vithin the feet and boyl Tar, Tallow, and Turpentine together, and pour made it into his foot or feet scalding hot, and stuff in Wooll or Hards after it, to keep and make it this this span and the between his hat Shoes, and the bottom of his Hoof, and it is cured with once putting in. Probatum.

XXX. For Pricking in the Foot.

black to 5 Hen a Horse is pricked in the Foot, when he standeth still he will mostly stand upon his Toe: And if at any time a Smith prick a horse, then before you take off his Shooe to pare his foot, take your pincers and try by nipping

ning very

enick

ping him with them where the ailment lyes, or by Knocking the Nail upon the Head with your me Hammer; as foon as you fee vyhere the ailment ros is, take off his Shooe, and pare him by degree it with the butteris and your drawing Knife, when bat you have found the bottom of the vyound, and have made it clean to your mind, then take Tur. pentine, fresh Butter, with a little black Pitch boiled together, and pour it in scalding hot then dip some hards or Towe in the same, and stuffit well between the Shooe and Foot, you may. take a piece of upper Leather or Sole-Leather and do it between the Shooe and the Hards, or lea you may splinter it in with sticks: But if it bea ha long Channel Nail that struck into his foot on ful the Road as you rid him, or as you wrought in him, then pluck the Nail out, and heat it pre he fently red hot, and put it into the hole fo farm an it went in at the first ; when you have thus fer aff red it with the red hot Nail, which will keepit bu from rankling and festring, then melt Turpen. tine and fresh Butter, with a little black Pitch together, and pour it in scalding hot; then cla on the Shooe, and stuff the foot with Towe of Hards, keeping it in as before you were dire eted, this will cure certainly. Proved, of 251

X

roud by me Dw. Tilmer

XXXI. An Ointment to skin or heal any

Take two spoonfuls of Dogs grease, on the Allum burnt and be sope, and as much some Allum burnt and beaten to powder as a Hale a Nut, put the burnt Allum in when the other are melted l

melted and taken off the fire, and ftir them well rogether in an Earthen Vessel, and you may keep it a year or more : not tried, but it is very provhen bable.

Tur. XXXII. To take down any Swelling being new, whether it be broke or not broke.

TAke two Pints of Red Wine Vinegar, and ather 1 boil in it four handfuls of Foles-foot s, or leaves, not cut but wrung a pieces with your the hand, when it begins to boil, put in two handt on fuls of Bay-Salt, and when the Salt is melted ought init, take it off the fire, and when you use it, pre. heat it as hot as you can endure your hand in it, far a and with it anoint the place once a day till it be fee. asswaged: This also is a very likely medicine, eepit but by me not tried.

XXXIII. For a Quitterbone, though far gone and hard to cure.

Take off a quarter of the Hoof right under the Quitterbone, that it may drain the better, you may do it after this manner that this figure directs. Take a drawing Knife, and draw it down after this manner, to the quick on both sides and below, according to , one the figure, then take hold with a pair of Pinfers Road presently below the peece of Hoof, and pull it Hale away, when it is off, lay a peece of Hares skin er are to it lightly to stanch the blood, and do not nelted look to it in twenty four hours, then take all the Hares

. 251

719

Hares skin away, and wash it once with Wine Vinegar, and scald it with Butter and Salt boi. led together as hot as may be, to kill the rank. ling, and to keep it from dead flesh, do this three times once every other day: And then take Verdigrease as much as three Hasel-nuts beaten to powder, then take a quarter of a Pint of Wine Vinegar and as much Honey, boyl them together with the Verdigrease, and keep it continually ftirring the time it boils, which must be half an hour, then take it off the fire, and put it into Pot or Pipkin, and anoint the wound withit once a day till it be whole, when it is whole, then anoint the Hoof to make it grow, with Tar, Tallow, Turpentine, Doggs Grease boiled together, put in the Turpentine a little before you take it off the fire, and stir it well, keep him dry in the house the time of the cure : forbear to pull off the Hoof if you think you can cure him vvithout, for that will take a long time the curing, to make the Hoof compleat; this is a certain vvay, but it is none of the readieft, this yvay is when all other vvays fail. Proved.

XXXIV. For a Foundred Horse.

To take out the Soals of his Feet you must pare the Foot thin, then at the end of the Frush you must cut the Hoof after this manner, as this Figure shews. Cut the middle of the Soal just at the Frushes end, in the fashion of a Hens tongue, and raise it a little with the point of your Knise, as you may see in the midst of this Figure, which I have made near the fashion of a Horse hoof, vyhen you have

you ave

Chapter I vvill give you the practife of another, which in my judgement is far more easie for the Beast than to fester the Foot; vvhich is, first to cord the Foot-lock hard, that it may not bleed, then to draw round about the Soal to the quick, and so to pull out the Soal without sessing, by cording of it; it will not bleed at all after you have pulled out the Soal, so that you need not to take care to stanch the blood, but as soon as you have pulled out the soal, you may wash it with Chamber-lye, and then put in the aforesaid materials: After you have set on the Shooe, stuff it as you were before directed. Proved.

XXXV. For a Splent.

Ou must cast the Horse first, then you must beat the place with a blood-stick or other flick till you feel it foft; then fleme it in three or four places upon the splint, and squese ou the blood with your stick, your fingers and thumb, then take as much Hoggs greafe as Walnut, as much Bolearmoniack, and Brimstone as much, beat these two last to powder, and mixe them with greafe, and spread it upon a sheet of gray Paper, and lay it upon the Splent, then heat a Brick very hor, and dry the Medicine in , then melt some black Pitch in an Iron pan, and dip some flocks in it, and dab it on all over the splent close, that it may lye on fure, and when the flocks come off, the splent will come out, but if the flocks come off before the fplent, then lay on more flocks till the splent come out, and as foon as it does come out, wash it with

U

litt

wit

the

and

gri

ha

W

It

Ha

little white Wine Vinegar, and then anoint it with Sallet Oyl and Turpentine melted together; anoint it cold till it be whole once a day, and in a Weeks time the splent will come out and be whole: This you may do, but it makes a great blemish, it takes away hair and slesh, and sometimes the hair comes no more: You shall have a Receipt hereaster for this purpose, that will not take off the hair nor break the slesh; It is a very gallant one, that will lay the Splent shat in a few hours.

XXXVI. For a through great Splent.

Beat it and fleme it, as you were directed in the other, then take as much Crown Sope as an Egg, and mixe it with as much Bolearmoniack, on purpose that none may know that you use any thing but Sope, lay it on a piece of gray Paper, and heat a Brick hot and dry it in, as you did the former, this is much of the nature of the former. Proved.

XXXVII. For a Splent great or small, an Excellent one.

If it were never medled with before be it great or small, this will cure it: First, take a peece of Leather as broad again as will cover the Splent, then take of Cantharides which is a slye that you may have at the Apothecaries, and beat them to Powder or very fine, take of them half a quarter of an ounce at a time, mixed with as much Nerve Oyl, as contain to half a Wallnut, bray them well together, and lay them upon

little

upon a peece of Leather, and binde it on for far Eight or Ten hours, and then take it off, and an ftroke it down with your Fingers and Thumb ter twice or thrice a day, till you fee it quite faln: di This Medicine will dissolve the Splent into 1 Pi Water, and you shall see it sweat out drops of in water, doing it with your Fingers and Thumb every day : If it be a great thorough Splent lay vv it on twice, if it be a little one, but once doing will ferve ; he must stand in all the time of the ter Cure ; you may ride him after you have taken the Medicine off, take a piece of Tape to binde Bi it on: Make no more at a time than you shall we afe, it will not last as to do good. This will not diminish a hair, but fink it flat. This Me. dicine is not to be laid to a Splent that hath been formerly medled with , where the fwelling fill remains, and the hair is come off, and the skin it very thin; this Medicine is too ftrong, and will soon eat the thin skin a pieces in such a case. Proved to be right good.

XXXVIII. A Water to cure any old Wound or greeen, in Man or Beast.

TAke half a pound of Bolearmoniack, a quarter of a pound of white Copperis, two ounces of Roach Allum, beat your Roach Allum and Copperis small, and put them into Pipkin, and melt them together, and when they are cold, put them with the Bolearmoniack into a Mortar, and beat them all together to a fine Powder, then take a pottle of Runing Spring water, where the Spring boyls with a blew fand

8

for land at the bottome, if possible, rather than in and any other Spring, fet this pottle of Spring-waumb ter on the fire with a close Skillet, till it be scalaln: ding hot, and then put it into a clean earthen Pitcher, and put two spoonfuls of this powder s of into the water, and ftir it up well together, before you let it stand to settle, and when the t lay water hath stood two or three dayes setling, oing then skum off the uppermost froth, put the vvater into an other Pitcher clean from the dreggs, and afterwards use it when you have occasion: But vvhen you use it either for man or beaft, warm the vvater as hot as can be endured either will by man or beaft: When you wash any vyound of a man, let the cloth lye a while vvet upon the vyound, and vvet a double cloth in the same water, and binde it on plaister-wife, renewing it two or three times a day: For any wound, old or new, alwayes vvash it first vvith this vvater, and then apply the green Ointment to it afterwards, which you shall finde in R. VIII. Pro- p-105 ved.

XXXIX. A Receipt to cure a Horse Pestilence.

Take of Wormvood a handful, of Rue a handful, of Salendine roots a handful, to be cut small, then put them into a quart of Aloes Milk, boyl it till it comes to a Pint, then frain it, and put to it half a pound of fresh Butter, then give it the Horse in the morning fasting, pretty warm, and keep him from drinking two dayes, and if he does drink, let it be cold vvater; and if grass may be had let him eat grafs.

An other Receipt for a Febula, or Horse.

Pestilence.

Take one Ounce of Storax, one Ounce of Benjamine, one Ounce of Betony, a quarter of an Ounce of English Sassron, these being beaten all to a powder, put them into a quart of new Ale, and give it to the Horse to drink; Let him not have any warm water, but keep him as before, from any drink two dayes, and let him eat grass, if to be had.

XL. For the Yellowes.

Tou shall know this by his faint sweating at the roots of his Ears, and the whites of his Eyes will be yellow; you must first let him blood in the Neck veins, or on both sides of the Neck, then take Elder Leaves, Cellendine, and Camomile, of each a handful, cut them small, and give them to the Horse in a pint and a half of the best Bier being heated lukewarm fasting, you may run your Cornet-horn into the third roof in the pallate of his mouth, keep him warm, and give him warm vvater to drink for a day or two, and this drench will certainly cure him.

Proved.

XLI. For a Cheft-Founder.

TO know this, he will go crimpling, and stand stradling, and cover to lye down: Take fix penny-worth of the Oyl of Peeter, and bath

T

21

bi

it well into his brest, rub it well in at the first, then dry it lightly with an hot iron; this with once doing will be a perfect Cure: Not tried, but very likely.

XLII. For a swelling under the Jawes, when a Horse hath the Strangling.

TOr a swelling of this Nature, take nothing lelfe but Bacon greafe and anoint it, which will if it be hard, fuddenly foften it with twice anointing, and when it is full ripe let it out; some use to burn the swelling with a Candle before they anoint it, and it will cause it to break the fooner; let it out with the point of a Penknife, and fometimes there will come out a pint of filth, when it is clean out, put in some vyhite Salt : vvhen any fore is foft, let it out with the point of a Pen-knife, lay it drayning as much as you can, with all the advantages you can : If it be a fore in any other place than the Throat, rot it with Bacon greafe, and open it, and put it out, and heal it with the green Oynment mentioned in R. XXXVIII. You must lave a care of veins, that you do not cut them.

Proved.

XLIII. For a Sore.

If a Horse have a Sore in his side or else-where, rot it first vith Bacon grease, then open it in the midst, and let the hole be low enough, that you may put your finger in from the middle of the vound downwards, cut it in the midst, and slash it quite down to the bottom,

it

stand Take bath it

negar, and work them up together, and put them one half into one Ear, and the other into the other Ear, and Wool, Flax, Lint, or Wrags, which you have at hand after it, and stitch up his Ears close with a Needle and Thread for 24 hours, and it is a certain Cure. Proved.

In the time of the Cure, let him stand in the House; give him it fasting, any Water cold or warm, any meat, only let him stand in the house

three or four dayes after it.

LIII. For the Wind-Collick.

IT comes by means of long fasting, and then the Winde gets into the Bag-gut with one end, and then when the Horfe comes to meat, he feeds so hungerly that he never chews his meat, and it goes down unchewed and undigefled, and stops the winde in the gut, that it puts the Horse to abundance of misery. It causeth the slime in the gut to be so extreamly hot, that the Horse will do nothing but Tumble and Wallow, and cover much to lye upon his back, with all four feet right up : The cure is , First , to prick him in the Mouth and let him bleed well, then rub his Mouth well with a handful of Salt, then give him this Drink. Take a pint of Brine and boyl it, but do not fcum it, and put thereto a handful of new Hens dung, and give himit luke-warm , at any time when this difeafe happens; then ride him an hour before the drink, and three hours after it. The Signes : He will stand crimpling with all four together, and lay himself down very easily, and will rather look full than empty: If he be cold in the Mouth no Cure,

Cure, if he be warmin the Mount, there is hope in four or five hours to abate the pain : Either prefent Cure, or prefent Death. Proved and a

2014 LIV. For a Film in an Horses Eye. danow

Take a peice of the saltest Beef you can post lible get, dry it in an Oven, and beat it to powder, take as much of Licorish-sticks, dry them, and beat them to fine powder, and searce it through a cloth, blow the powder into his Eye once a day, and it will take off the Film in three or four times doing: If a Rheum attend the Eye at the same time, to stop it, dip a little Flax or Hards in some melted Rosin, and lay it in the hole of the Horses Eye; I was told it would stop any Rheum, but have not tried it.

LV. To Cure a Mallender.

a barciere inci

First rub it dry with a Cloth, then anoint it with Crown Sope and Red Mercury precipitate mixed together, when you have anointed it once, pluck the hairs which grow in it, and upon the edge of it out, then dress him three times more; once in two dayes dress it, then moint it with Sallet Oyl, and it is cured, but alwayes before you anoint it you must rub it dry. Proved,

LVI. For an Apoplexy, or Palfey.

hele bas tale a or sman tille

TO know this Palfey the Signes are thefe; It either will take him in the Neck, that he K 4 cannot

cannot put down his head to the ground, or in the After-parts that he cannot rife, the Sinews of his flanks will behard, if you feel them with your hand. The Cure is thus : Take fix peny. worth of the Ogl of Peter, and anoint the place grieved with it at one time, and dry it in with a hot Iron, if you anoing the After part of him then lay upon him the Litter of a hot reeking Muckhill, and lay a Cloth over that to hold it on renewing it four times a day : If it be in the Neck, after you have anointed it and dried it in, make a Thumb band of the longest hot teft Dunghill Litter that you can get, and wind it round about his Neck something loose, that he may eat and drink; let the Thumb-band be fo long, that it may go fo often about his Ned that it may reach from his Shoulders to his Probatum eft. Ears.

LVII. For a Farcine that lyes all over the

Them with the water that you have for any old Ulcer, and this will cure them and kill them; wash them once a day, then take a pottle of running water, and boyl in it two spoonfuls of Hempseed beaten to powder, and two handfuls of Herb-grace cut small; boyl all these together, till it come to a pint and a half, and give it the Horse fasting; do this once in three days, or three times in nine dayes, let him stand in the night before and not drink, you may give him three or four hours after it a Mash, or warm water,

ter

2 (N

it

thi

an fe ter, and then Hay. This very drink, given to a Cow or Bullock after letting Blood in the Neck, will make them thrive exceeding fast if it be given them at the Spring of the Year, and then turned out to Grass. If a Cow or Bullock do not thrive, but is lean, scurvey, hide-bound, and her hair stand right up, do but let Blood, and give her this Drink, and she will mend prefently upon it. Proved.

LVIII. For a Farcion only in the Neck, or Head of a Horse.

Tirst, Let Blood in the Neck veins, then take two spoonfuls of the juyce of Hemlock, and two spoonfuls of the juyce of Houselick, and mix them together, and put the one half into the one Ear, and the other half into the other Ear; you must mix two spoonfuls of Sallet Oyl with the Houselick and Hemlock, and then put them all together into his Ears. Put a little Wool, Flax, or Tow after it, stitch up his Ears, and at the end of twenty four hours, unstitch them and take out the stuffing; give him a Mash two or three hours after, and warm Water to drink: You may give him any meat to eat, only wash the Buds with the water for an old Ulcer, till he be whole.

Take a broad Woollen List, as broad as your hand that will go round about his Neck, then wet the List well in Train oyl, and sow it about the Beasts Neck, and the Lice will come to it, and it will kill them if there were never so many? Daub some about the Beast in several places, and they will come to it, and it will kill them. No slies in Summer will come near any Wound or Sore wherewith this is applied, for it will kill them. Proved.

LXII. To make Hoofs that are brittle grow quickly, and to make them firm and strong.

Three handfuls, of Allom beaten to powder 7 Ounces, of old Hogs-greafe two pound, of Asses Dung, or for want of it Cow Dung an handful; beat and cut them all small, and mix them all together, and boyl them all together well; then with this Oyntment stop his Foreseet, between his Shooes and the bottome of his feet, and keep it in vvith a peece of Leather, or Soal-Leather of a Shooe, Let it be betwist his Foot and Shooe. And besides, you should do well to anoint the out-sides of his Hoofs all over; do this till you see his brittle Hoofs to grow tough and strong, you will find the effect to be great. Proved.

LXIII.

THE I

LXIII. To beal a Navil-Gall, Sore-back, or a Set-fast.

Take a quarter of a pint of Train oyl, and boyl in it as much beaten Verdigrease as half a Wal-nut, put it into a Pot and keep it for your use: This very Medicine will heal any Navil-gall, Set-fast, or Sore back suddenly: And no Flies will dare to touch or come near it, if they do they dye presently. Proved.

LXIV. For a Sinew-strain in the Fore or After-Leg.

Sinew-strain, is alwayes upon the Sinews which grow behinde on the Fore-leg, and behinde upon the Sinews on the After-Leg above the Foot-Lock joynt, upon the back part of the Fore-Leg, and upon the back part of the After-Leg, much about the Anckle bone; it wil be swelled and knotted when it is thus overstrained, you may fee and difcern it by his going, and by the swelling; if you nip it between your Fingers and Thumb, he wil quinch at it very much : For the Cure, Take Nerve oyl and Turpentine of each a penny-worth, and mix them together, and lay it on at two or three feveral times or more, till it be wel; And always dry it in wel with a hot bar of Iron when you lay it on, anoint it two or three days idiffance, you must rest him in the time of the Cure: Probatum.

LXV

LXV. A Scowring Drink.

When you let a Horse blood, save the blood with a Bowl or Dish, and put thereunto a handful of Salt, take the Blood as it comes from him, and stirre it and the Salt together with your hand, that it may not clot, and give it him again to drink with a Horn fasting; whether it be the blood, of another Horse, or his own blood it matters not much. Proved. Give him warm water to drink once.

LXVI. For Brittle Hoofs.

A Noint them with an equal proportion of Dogs grease, Turpentine, and Tar, all boiled together a little while, and it will make them grow strong and tough; put in the Turpentine but a little before you take it off the fire. Proved.

LXVII. For a Horse that is Moulten, and breaks out.

When you see Swellings appear like Bagy, about the Girting-place under the Horses shelly; First, anoint it with Bacon grease once every day till it be rotten; then lance it in one place to make the filth come out, with the point of your Pen-knife, stroke your hand presty hard upon it, squeese out all the filth, then anoint the swelling with Train oyl all over, and winde a Linnen cloth about a sticks end, and dip

him

For the burning of the Lime in the vvater. does kill the Ring-bone even unto the Root thereof: with this Receipt I have cured not fo few as an hundred Horses. But when you are thus to dress your Horse, let him be brought dose to the vvater wherein he is to be ridden. that fo foon as you have applied the Lime unto the Ring-bone, you may presently put him into the vvater. Proved.

LXXIII. Observations concerning the ordering of Cattle; as Cowes, &c. in the time of feeding, when there is great fulness of Grass: As in the Months of May, June, and July.

T Hen in those Months, must be your care to I let them blood; For at that time of the year they never digest their meat so well as in Winter: And those raw digestions, do hinder many inward passages, which causeth bad blood. Which to help, you must let them blood in the beginning of the Month of May, and let them stand in some close yard the night before; And the Night after, give them a hardful of Hempseed a peece : Now for the Pestilence, is Gargil, and Murrine, they are infectious, conder, tagious Diseases, none like them; they proceed of a many times from hard driving, heats and colds, hunger, or any other thing breeding corrupt humors; as by drinking when they are hot, or feeding upon gross, foul and corrupted foods,

as in low grounds after floods, when the Graft is unpurged, and the like. And fometimes it cometh from some evil influences of the Planets, corrupting the Plants and Fruits of the Earth: And fometimes from Cattle too: And from di. vers fuch like causes; but howsoever when these Difeases beginneth, certain it is that they are most infectious, and if there be not great care taken, they will leave but few alive of a greu many, for the one infect the other. These Dif. eafes are eafily known, they will hang down their heads , and run Atter at the Eyes , will fwel on the Lips, and all on one fide of the an Cheek, and under the Tongue, and sometimes at the roots of the Ears : The Cure, is to fepaplace from the Air where the fick breatheth, then let them blood on the Neck veins, and give ere or ry one a spoonful of Diapente in a pint of Verjuvce : If you cannot get Diapente, take 1 spoonful of Treacle-Jean, and give it in a Li pint of Verjuyce : Thus give them a good quandung, stir the Urine and Hens-dung well tog tity of old Urine, and a handful of new Hensther, and give it to the beaft Luke-warm, keep him in the house a Week after: These for Com tha or Bullocks be prime Receipts. Proved.

LXXIV. For a Bite, blow, or film in the Eye.

proved

TAke as much white Copperis as the bignes tow of half a Wal-nut, and beat it very fine, ath the same quantity of Verdigrease beaten to pow and der: Bray these two vvell together upon an I lind ron Spade, or in a Mortar, then mix them with ing

fes the awa LXXXIV. For a strangling in the Guts: the Cough of the Lungs: For clearing the Pipes, and giving much breath.

IF you be to run your horse for a wager, give him two of these Balls a vveek before : I make them thus. Take as much of fresh or falt Butter as to the bigness of an Eg and an half, part it in the midst as near as you can, hollow it in the fashion of a Pye, mix and braid together with your Butter half an ounce of Anniseeds beaten to powder, then make a Pye of your Butter and Annifeeds thus mixed, and put into it three quarters of a spoonful of Syrupe of Horehound into ach Ball, and close up the Ball close that the Syrupe may not come out; Make your Balls no bigger then a Barbers Wash-ball, or but a little bigger if you do, for it is not good to give Balls too big; then warm a pint and an half of strong Beer lukewarm, and fill the Horn with Beer, and before you put it in, put in one of the Balls, having pull'd out his tongue with your left hand before; when his tongue is out, put in the Ball into his mouth as far as you can, then hasten two Horns full of Beer after it to wash it down, do the like with the next Ball as you did with the first, then take his back, and ride him for three or four miles a hand gallop, till he sweat well, for this reason; Because the Diseales in this Receipt, as they come with a heat, so the speediest and best Remedy is to drive them away with a heat: The second reason is, That Drink will take no more place in a Horse for heats

you or t

heats and colds, than to give a Horse a Drink and walk him about the Yard. Therefore for Diseases of this nature, ride him till he sweat foundly; a mile before you come at home, ride him but a foot-pace, that he may be fet up fome. thing cool, then tye him up to the Rack, cover him with two cloaths, stuff him and litter him very yvarm, cover his head and body to keep him from the cold, let him stand four or five hours before he eat or drink; then when you unbit him, give him a Mash, or some water luke. warm, or some clean Hay, and take off one cloath, and keep him warm: If this will not do, a vveck after give him the same again, and give him yvarm water but two dayes after it, and then cold vvater; a week before your Horse goes to grass give this, and a vveek after he comes from grafs; give it three or four times 1 year, and it will keep your Horse in gallant health, it will fat a Horse : It will make him fick, but fear nothing: But if you give your Horse too much at a time, that it makes him ex. traordinary lick, give him a pint of Milk as it comes from the Cow, or heat the Milk luke warm. Proved many times. This is a rare Recript.

LXXXV. To wast the Kernels under a Horses Throat, cheaply and suddenly.

Irft, fear the Kernels with a Candle, then take of fresh or salt Butter, and laya peice upon a red peice of Cloth, and rub it well in, and in a Fortnights time the Knot will be quit

0 A gone, and if his Nose run, it will stop when the Kernels are gone; Anoint the Knots once a day, for a vveek in the time of his Cure. If it be in Summer let him run out, and in Winter Stand in. Proved.

LXXXVI. For a Cough of the Lungs.

TO know this, the Horse will cough hollowly and gruntingly, he will hang down his head when he coughs, his flancks will beat, he will fetch his breath short : For Remedy, Let him stand in the night before, the next day in the morning fasting, give him a spoonful of the Syrupe of Horehound, and a spoonful of the flower of Brimstone, and put these two into a pint and a half of strong Beer heated Lukewarm, and give it him fasting; take him and ride him three or four miles presently upon it, till he fweat well, ride but a foot pace within a mile of home, be careful to fet him up warm; Litter and cloath him yvarm ; Let him stand in not above two or three nights, if it be in Summer, after that, turn him out from ten a Clock to 10 % 3 three a Clock, for two or three days, and then turn him out for altogether; the more moderately you work him, the better he will thrive : It will take away his Cough, clear his Pipes, and make him thrive much after it. If there be a a white, thick, clayey water near, let him drink there, it is a yvarmer and more fattening water than any other; give warm water not above twice, this Drink will clear his Pipes, and drive it from his Lungs : You may put in as much of the powder of Mechoacan, as will lye upon a hilling at three times. Proved.

LXXXVII. For a Broken: winded Horse.

The Bores dung and dry it to powder, and put a spoonful of it into two pints of Milk as it comes from the Cow, or otherwise heat lukewarm, and give it him; If you see that this proportion will not make him sick the first time you give it, then give him two spoonfuls more of the powder, and in four or five times giving it will perfectly cure. This Drink must be given every third day. A spoonful of the powder of a Hedge-hog, by some called an Urchin, doth infinitely help in this case. Proved.

LXXXVIII. For a Cold in a Beast, either in Winter or Summer.

TAke an Egg-shel full of Tar, half an ounce of red Stone-fugar, half an ounce of Annifeeds beaten small, half an ounce of Tobacco beaten, half an ounce of Liquorish cut & beaten very small, 2 ounces of Brimstone beaten small, 1 quarter of a handful of Herbgrace cut smal;after that thefe things are thus beaten and ftirred up together, make them up into three Balls of a like bigness, then put two pints of strong Beer lukewarm, and the first Hornful of Beer that you give him, put a Ball into it, and do so likewise to the fecond, and third; and then give him the remainder of the Beer. Let him not drink for four or five hours after, give him a Mash, and afterwards Hay to eat; Let him stand in for three or 4 nights if it be in Summer, after the first days giving,

h

T

'n

P

giving, work him every day moderately, and the Beast will thrive the better. If once will not take away his Cough, and cause him to belly, give him another; keep him yvarm, and it is a Cure. Proved.

LXXXIX. For the Scratches.

They are upon the After-heels of a Horse in the Pastern and above; For Remedy take two pennyworth of black Sope, as much as an Egg, of the newest Hens dung as you can get Oyster shels put into hot Embers five or six, they must be put in over night, and raked up so, that they may be well dried by the morning, then beat them to powder, and bray them altogether like an Oyntment, and apply it to the Horses sore Heels every morning and evening, the Horse must not come in the voater till you see he is cured; Alwayes rub his Heels very clean before you rub in the oyntment, and you shall find it a certain Cure in two or three times dressing. Proved.

XC. For the Scratches.

Well in Beef broth, the next morning rub his Legs clean, and then apply this oyntment to heal it. Take two penny-worth of Gilts greafe, two penny-worth of Speck oyl at the Curriers, made of shreds and cuttings of Leather, two peny-worth of Verdigrease beaten small, two peny-worth of Train-oyl; put all these into a Pipkin, and set it on the Coles to melt, but stir them

them till they be melted; then once a day anoint him with this ointment, till his Heels be well, which will be whole very suddenly; Chafe it, and rub it in with your hand very well, let him come in no vvater nor dirt till he be whole, when Horses have been so swelled, crannied and stiff, that they could not go, but fall down; this hath cured them. Proved.

XCI. Another for the same.

F at any time a Horses Leg swell, but especially in the Month of March, ride him into a River vyhere the vyater runs swiftly, up to the mid-Leg, and there let him stand not above a quarter of an hour; then vyhen you set him up into the Stable, take a Wisp and a Payl of vyater, and dash the vyater against his Legs, till they be clean: This is a Cure for swelled Legs in a very short time, this is when they are not broken out, but only swelled. Proved

XCII. For Foot foundring.

That Foot which is foundred, he will fet before the other: For Remedy, pare him
down to the quick, if he bleed it matters not,
then fet on his Shooe very hollow, then take
Plax or Tow, and make a pretty thick Cake therof, and spread Venice Turpentine thereon a good
thickness; then lay it all over the bottom of
the Hoof, and put a peece of the upper Leather of
a Shooe to keep it in; at 3 days end lay on a new
Plaister as before; if his Foot grow again, pare

him

he

fo M

th

h

him to the quick again, and every third day lay on a new Plaister, till you see him go better; he must run abroad in low grounds, this Plaister will draw down the humours exceedingly: Continue thus doing, and if he have not been foundred too long, this vvill cure him in a Month or very little more perfectly: To further the Cure, you may let him blood at the Toes, nevertheless the place should not be durty that he goes in. Proved.

XCIII. For the Garget in the Throat of a Cow.

If you have an Oxe, or Cow, or Bullock, that hath the Garget in the Throat, it comes for want of water; it will cause a swelling under the sides: The Remedy is, first to cast the Beast, then cut the skin through in the midst of the swelling, and slea the skin from the slesh so far as any swelling goes, then take of the whitest wood Ashes that you can get sisted fine, mix them with some Mould Stale old Piss, stir them well together, and wash the Sore therewith.

Proved.

XCIV. Another for a Garget at the Root of the Tongue of a Cow.

A Garget at the root of the Tongue, is a certain swelling under the Root of the Tongue, which causeth his head and face to swell also, and to froth at the mouth, he will then forsake his meat, with often gulping in his throat:

The

LIMIL

int

ell,

it,

him

hen

are

The Remedy is, first cast him in foft straw, from bruising his body, then take his Tongue in your hand and pull it out as far as you can, and with the point of a sharp Pen-kife, slit down the mid. dle Vein an inch, right under the Tongue, and there will come forth black blood, and water which comes from the Gall, then rub the place with Salt and Vinegar mingled together, and it will cure. Proved.

XCV. For the Garget in the Guts of a Com, or Bullock.

THe signes are these; The Beaft will run at the Eyes, Drivel and Slaver at the Mouth, with a fad heavy countenance: For Remedy, take an Egg. shel ful of Tar and put it down her Throat, then take two handfuls of Salt, and put it into a pint of Verjuyce, and put it down the Beafts throat with a Horn, then drive her to and fro till the dung; Keep her fasting four hours after. Proved.

XCVI. For the over flowing of the Gall, in a Com or Bullock.

T He signes are extraordinary fulness of the body, and flavering at the mouth: The Remedy; Take an Egg-thel full of Tar, and put it down her throat, having before a pint of Verjuyce or Vinegar, and a peny-worth of Cloves beaten; boyl the Verjuyce and Cloves together, and when you take it off the fire, put in two good handfuls of Salt, and give it her

her Lukewarm with a Horn, immediately after the Egg-shel full of Tar, and drive her to and fro. Proved.

XCVII. For a Horse or Cow that makes Red water.

Take a Red Herring with a hard Row, and cut it as small as you can, and put it into aquart of strong Beer, and give the Beast it lukewarm, and in twice giving it is a Cure.

Proved.

XCVIII. For a Horse that is Back swancht, or for a Strain in the Kidneys, being over burthened in the Hinder part; Or in Race running, or by being over strained in the Back

The Ake a fat hot Sheeps skin, just as it comes from the back of the Sheep as soon as she is kild, mix four peny-worth of Nerve oyl, and sour peny-worth of Turpentine well together, and besmear or anoint the inside of the Sheeps skin all over, and clap it to the place of the back where the grieflyes, which commonly is in the Navil place of the back bone: In that part of the Back bone is a horse mostly swanckt of, when you have thus laid it along his back bone, make a Crupper to go under his Tail to keep it on, and a breast-plate before, and fasten them together, to girt it upon him for a Month till his back be knit and strengthened. Proved.

Here

Here followeth Nathaniel Shaw's Re. ceipts, which are all approved things: and he is accompted as a. ble a Farrier as any is in London, I have both proved my felf, and feen him prove most of them, both Inward and Outward; and although the former Receipts in this Book will do much good; Yet these go beyond them in many things, both for Cheapness and readiness of the Cure. I shall begin with a Disease in the Head called the Canker.

C. For a Canker in the Hood.

Canker is a Difease in the Head, and A sometimes will set upon the Eyes, and sometimes in the Nostrils: You shall know it by his rawness, and it will run a yellow water. For Remedy; Take half a pint of Sallet oyl, on ounce of the oyl of Turpentine, three ounces of Burgundy Pitch, and one peny-worth of Verdigrease beaten fine; put all but the Verdi-grease into a Pipkin, and let them boyl toge-ther a pretty while, then take it off the fire, and

put

to

ma ag it

ing it a kee

neg Ari it cl

eno Salv If it

the t

CI.

out in the Verdigreafe, and let them all boyl together to a Salve, but if you have not a great are, the Verdigreafe will make all boyl over, to prevent which alwayes have another Pipkin fand by in readiness, that if it boyl over you may put some into that, then put them together igain, and fet them upon warm embers, and let it gently boyl till you fee it come to a Salve, being neither too hard nor too foft; you must stir stall the while it boyls, then take it off, and keep it for your use: If you use this Medicine for Canker in the Nostrils, first tye a Rag about a ficks end, and dip it in some White wine Vinegar and some Salt, and run it up his Nofrils to do off all the scales, when you have wast t iclean, take a Feather, and if it be not long mough tye two together, and dip it in the cold salve, and run it up his Nostrils but once a day: the litbe a Canker in the Head, Face, or Eyes, ease ake a little Tow, and rub the Canker till it bleed, and when it leaveth bleeding, anoint it with a Feather dipt in the aforefaid Salve, and frew some Wheat Bran upon the Salve, it will hold on the better; dress it once a day, till you keit heal, and then once in two or three dayes, whil'st it heal up : Observe this Rule in all outward Cures for it is needful, let him stand in all the time of the Cure. Proved.

CI. For a dry scurvy Mange, although it be from the Head to the Tayl, of Horse, Com, Dog; or any thing elfe.

Dirft, scrape off all the Scurf with an old Curry-comb or peece of Knife, then take CWO

two ounces of the Oyl of Turpentine, and as much strong Beer, mix them together, and shake them well in a Glass vial, then anoint the Horse where he is pild and Mangey; a Week after dress him again, if you see any mattery running places, else not; tye him up with a strong Halter, till it hath done working, for it will sman terribly: When you have kill'd the Mange, to make the hair come again, wash it two or three times with a little strong Beer now and then, and it will make the Hair come quickly and thick. Let the Beast stand in at dry meat the time of the Cure. This is a rare Receipt. Proved.

CII. For a blow or any other mischance, which cause a Swelling about the Head, Face, James or Chopps.

the Head swels, if he swels on both sides, and let him blood on both sides: Then give him this the Drink to prevent a Farcy; take an ounce of Turmerick, and an ounce of Annniseeds, of Red Sage, Wormwood, Herbgrace, of all three but a handful, cut them small, and put all into quart of strong Beer, and give it the Beast cold for they are hot of themselves, fasting in a morning, and let him sast four or sive hours after it; give him warm Water to drink but for once the solution of solution of solution as you have given him his Drink, applying this charge hot with a flat stick, dab it on the this scharge hot with a flat stick, dab it on the this swelling, a quarter of a pint of Aqua-vitz of aft let Brandy Wine, which is the spirit of Aqua-vitz with but Brandy is best, mixed with a peny-worth of list a Crown sope, according to the bigness or small surs

ness of the swelling; make a quantity of these v.167.

we things which you apply as a charge; this charge of these two things, will take down any welling old or new whatsoever, soke it in with a red hot Iron; apply it but once, it will not come off in sourceen or sisteen dayes, it will sink the quite flat, or break it. Proved.

CIII. For a Navil Gall.

Take Brandywine cold, and dab it on with your hand, or with a Rag, it will take it lown in a few times dressing, if the skin be not worken. Proved.

Fact, CIV. For hard Kernels under the Throat.

Ix Sope and Brandywine together, and apply it to the Kernels hot, then heat it sides, with a hot Iron; it will either link them flat, a this rbreak them. Proved.

CV. For a New Sinew-Strain.

A Pply Sope and Brandy once hor, and cold. A heat them in with a hot Iron; but first, more out must clip the hair away in the Pastern right after the Shackle veins, and then let blood on once the the Shackle veins, and then apply the apply arge, letting blood will much further the Cure. In the the Sinew strain be before or behind, you are outlet blood if you will have a speedy cure:

-vitz string blood thus, and applying the Charge, rthe ill take his lameness away in eight and forty sours, with once doing at the most: Do not me me with the sine with once doing at the most: Do not me with the sine with once doing at the most:

hree

,and

thre

ride him in four or five dayes after you have laid on this Charge; this Sope and Brandy hear well in with a hot Iron, it will not come off in the or 15 dayes, and when you fee the fourf to rike W anoint it with Trotters oyl, which is made of Sheeps feet boiled, anoint it once in two days to ftrengthen the Sinews, till he go well ; you may ride him in four or five dayes, and for four or five dayes or a vveek keep him out of the vva ter, after you have applied the charge, and i will be a perfect cure. Proved.

CVI. For an old Sinew-Strain that is well and hard, on Fore or After-Legs.

I'Irst, clip away the hair right over the Shackle veins on the pastern, and you wil fee to strike the Shackle vein the better; when it hath bled, apply two ounces of the oyl of VII Turpentine, mixed with two ounces of ftrong an Beer, and put them into a glass vial, and shall them well together, bath most of it in with you plr hand upon the vein or swelling, and three four days after it hath done swelling and begin to be scurse. lay a Charge of Sand and begin to to be scursie, lay a Charge of Sope and brandy his heat it well in with a hot Iron, and it will take it quite down in a Week or a Fortnights time tro you may ride him in five or fix days; when you will fee the Charge to scurf and pill, you may anoin will it with oyl of Trotters once or twice. Prove him very certain,

in those veins where you see most cause, and hhim blood as discretion shall teach you, and then apply the Charge of Crown Sope and brandywine hot all over the swelling with a fat flick, and heat it well in with a hot iron. wine a hor and let him stand in the house the time of his ure, and you shall find it to be a very perfect f the and ready cure. Proved.

CXI. For a Swelling that comes by reason of Wind or Cold getting into the Wound, how to take it away; whether it be in the Head or any part of the Body.

If the swelling in the Head cause a thick film quit over the Eyes, then follow the directions under written : If the swelling comes by reason of Wind or Cold getting into the vyound, to take out the heat and ranknesse of the swelling, you must anoint it all over with an ounce of the syntment of Populeon, or more if the swelling to be great; anoint it twice a day at first, and as e to stalls fewer times evill ferve; in the mean time in the sone of the vound, till the swelling be most sone or down; wash the vound vith Chambrake sone or down; wash the vound vith Chambrake sone or down; wash the vound vith Chambrake and Salt, or Vinegar and Salt, and will salt up vvith your healing Salves: If he get is a vound in his face or head, and the Wind get is and cause it to swell, vvhen you have taken any way the swelling by anointing it with this Poster is a vay the swelling by anointing it with this Poster is a vay the swelling by anointing it with this Poster is a vay the swelling by anointing it with this poster is a vay the swelling by anointing it with the swelling nust anoint it all over with an ounce of the

M 4

Slit

well cur

d the

t firf Beer

ind

Slit a little hole upon the bone of the Cheek with a sharp pointed Pen-knife, and then put in your Cornet-horn, and vvork up the point thereof between the skin and the flesh, close up to the Eye, then take a little bit of new Canvass, and cut it three square, and roul it up round the length of your Thumb, mix some Salt and fresh Butter together, and strow some salt upon the Butter although the Butter be falt, and spreadit on both sides the Canvassithen roul it up round, and thrust it up into the hole, and there let it be, over it lay a little peece of Canvass, with some Burgundy Pitch spread upon it, to keep out the cold and vvind, and it will draw and drain the Eye very clean and clear; this being done, put a little peece of fresh Butter, with a corn or two of Salt into the Eye, and put in a peece of Butter into the hollow hole above the Eye, a noint and rub it well in, that it may drain down the Eye: For a blow with a Cudgel, Whip Stick, or a Haw in the Eye, though you think the Horses Eye would go out, this course taking will remedy it in a short time.

Let blood in the Temple vein for a hot Rheum and likewise vvhen a Horses eye-sight fails with hard riding or much straining; nevertheless you must strike the steme cross the vein, and the the Rheum will stop, and the vein will knit up of it self; this is a main means to stop a hor Rheum that comes down to a Horses Eye: who you let a Horse blood on this vein at any time you must cord him about the Neck, and when hath bled as much as you think good, to kee the cold and wind out of the vein, you should do well to pitch and slock it: For a hot Rheum har

hard riding, or over much straining, Give this Drink fasting, to clear the Stomack, and cleanse the Blood and Lights (viz.) One ounce of Turmerick, half a quarter of Aquavitæ or Brandy, wo or three spoonfuls of White wine Vinegar, aquart of the best Beer, give it Lukewarm ; but ifthere be a kind of white glass in his light, then it can be no cure.

Likewise, if you have a young Horse that you think will be Moon-blind, then you must take up the Temple vein in the wane of the Moon, doing with your Corner horn as before you were taught, and put a peece of Butter in his Eye, and a peece in the hole of his Eye: If it be ahot Rheum, his Eye will vvater and look red done, below the Eye, let him come into the cold rn or Wind as little as you can: If it be a film, if it be thick white blew, though it hath been for half ayear, then do as you were just directed in this down Receipt, and no otherwise. Proved.

CXII. For a hot Inflamation or foft Swelling, that is new done , whether broken or not broken.

Noint it with the oyl of Populeon, and rub I it in cold with your hand once a day, or twice at the most, till it be down.

CXIII. For a Bruise or Bite upon the Cods of an Horse, that cause them to swell much.

First, Bath them well in evarm Whey or Milk, but Whey is best, let it be as hot as the

the Horse can endure it, bath it for thre or four dayes together; then make a Bag to put his Cods therein to keep them warm, anoint his Cods with the oyl of Populeon cold, once or twice a day, till you see the swelling of his Cods abate, which when you see, apply the Charge of Crown Sope and Brandywine, to take down the rest of the swelling, and to knit the veins and strings of his Cods again; Lay it on hot, and heat it well in, three or four dayes after, ride him into a River, if you can, or Pit, up to the belly, and you shall see it fall in a short time. If the Cods be swell'd much, and have been long done, and is hard, then do not meddle vvith it. Proved.

CXIV. To keep in your Medicine, and keep out the Wind.

Over your Medicine, lay a Plaister of Burgundy Pitch, and it will keep in your Medicine and keep out the Wind, whil'st you take down the swelling with the oyl of Populeon, but Culpepper saith, that the ointment of Populeon is better.

CXV. Directions.

If at any time a Horse come to you with swelled Legs, and that hath been poysoned with other Farriers Medicines: First, before you apply any thing of your own to it, bath his Leg or Legs with Whey as hot as he can endure it, to wealh off the poyson of their Medicines, and to make his Legs clean, Whey will not take off the hair

hair if it be not off before, it will cool gallantly, it is better than Milk : But if you cannot get Whey then take Milk, after you have thus bathed it in warm Whey or Milk; you may fall to work according to your judgement, as it is in hardness or softness: This Book will tell you, whether you shall take it away by Drinks or Ointments, or by both: Look the Receipts for a dry Surfet, and the Receipt for a Pockey Farcion Horse; Look the following Receipts for a dry Surfet, and there you shall fee the purge of Aloes to be given inwardly, and other things to be applied outwardly to the hard swelling : If it be a Surfet that comes down out of the body, and falls into the Legs before or behind, and breaks, and runs moist, warry, or Attery, stinking filthy matter, then look the following Receipts, for a foul, rank, pockey Farcion Horfe. And give him the first Drink there mentioned at the beginning of the Receipt, one or two of those Drinks will dry up the moist humours, that fall out of his body into his Legs. Note , That where the filth breaks out of the Chapps, if the Crannies be very great, and if you fee that the filthy matter that comes out of those Crannies, are like to rot the Sinews of the Legs, then use the following Receipts which is for Pains and Scratches, made of Honey, Pepper and Garlick. The Drink given inwardly, & this Receipt applied outwardly to the Crannies of his Legs, are incomparable; for the Drink at once or twice giving, wil dry up the humors in his body, although never so many or so violent, and the Salve will heal up his Legs suddenly and to purpose. This is enough to direct you, especially for dry Surfets

the

fets that fall out of the body into the Legs, and there fettle and become very hard; And like. wife for Surfets that fall out of his body and break, stink and run, watry, yellow, whick, and fometime thin mattry filth in the Legs : If after you have made a Cure of thefe, and fee your Horse gaunt and do not fill well, then give him the Purge of Aloes to fcour and cleanfe him; and after that your Cordial, White vvine and Honey, all mentioned in the following Receipts in this Book, which is for a dry Surfet. when a Horses Cods are subject to swell oft, give him this Purge of Aloes that is for a dry Surfet, which is vvhen the Greafe is melted, and afterwards fetled and dried in his body. It is good for a Horse that is gaunt and will not fill, and we fay is gut-foundred, and his hair stands right up. The Cordial of White wine and Honey, is marvellous good to beget and continue a Stomack to his meat, being given after his Purge, as you are fully directed in the Receipt for a Horse that is swelled in his Cods, and that hath a dry Surfet, and runs at the Nofe. I fay in the following Receipts you shall there find them altogether in order.

CXVI. For a Shoulder Strain

First tye up his sound Leg very sure vvith a List or Garter, then walk or drive him upon three Legs, that he may lay the vveight of his body upon the lame Leg, till he begin to sweat at the Ears and Cods with pain; this is, because you may see the plate vein the plainer appear; then let down his lame Leg, and you

ou

you shall fee the vein yet plainer then you could when his Leg was tied up : If you cannot fee the vein plain enough when his Leg stands upon the ground, then heat but a little vvater, and clap it on with your hand upon the vein, and then you shall certainly fee the vein appear a great deal bigger, that you may let it blood, then when you fee the blood is come into the plate vein, and that the vein is plain enough to fee and feel, tie up his lame Leg again, and let him blood in the plate vein, on that side the bottom of his Cheft his lame Leg is on ; let him bleed a quart or two or more, the greater the lamenels is, the more let him bleed; after he hath bled 2 about a quart upon the ground, presently put into a Bowl, a good handful of Salt, and let him bleed a quart or more into that Salt; you must ftir the Salt and blood alcogether, all the while he bleeds into the Bowl, because it may not clot, then fet the Blood and Salt by, and stop the plate vein with a peece of Lead, that may nip the mouth of the vein together again that it may not bleed; You must have in a readiness an 3. ounce, or an ounce and a half of the oil of Turpentine, and as much strong Beer, put them both into a Glass Vial, and shake them well together; when you have thus shaked the Oyl and Beer together, bath it well in with your hand about his Breast, and all his Shoulder over, and the bottom of his Breast, between his Legs, and half way down to his knees; bath it & clap it well in with your hand, presently after take the Blood A. and Salt, and bath and clap that upon the former ; then fet him up into the Stable to meat, 5. and with a List or Garter, tie both his Fore-legs

toge-

together as close as you can, a Girt or Surlingle will ferve to tie his Legs. The next day untie his fore-legs, take him out and walk him, and if you fee he go any thing well, take his back and ride him gently a Mile, & fet him up again, and tie his fore-feet again, as close as you did before; If he go not well the first day, do but walk him the 2d day and not ride him; and the third day after his first dreffing, do not only tie his Legs, but flat a flick on both sides in the fashion of a wedg, about the bredth of a lixpence, take it and drive it in between the Toes of his Shooes, and the Toe of his Foot fast, fo that it may not come out, and alwayes whil'ft he stands still in the Stable, tie his Legs close, and peg him with a Wedge, and when you walk or ride him abroad, untie his Legs and take out the Wedge; do this every night and day till he grow found, which will be within two or three dayes, if it be a Strain newly taken, To let blood once, and anoint it once with the oil of Turpentine and Beer, and once with the Blood and Salt is enough, with the help of tying his Legs together, and driving in a woodden Wedge as you vvere before dire. Red : For a vvrench in the Shoulder, or vvhen a Horse hath pulled his Shoulder out of his place, and the Shoulder is faln the breadth of a mans hand or more, or if he be splayed on the Shoulder, do nothing contrary to what you vvere directed before in this Receipt, either for matter or manner; for if it be but lately done, it is as speedy a Cure for the one as for the o-And if you do as you are here directed, I am perswaded there is not a better or more speedier vvay to be taken under the Sun. I can-

th

tle

the

of

ın

W

not give praises sufficient to the vvorth of it.

CXVII. For an old Strain in the Shoulder.

The fore going directions in the last Receipt, is most incomparably certain, for an old hurt in the Shoulder, and is for this as absolute a cure in one Weeks time as any is under the Sun. Proved.

CXVIII. For the Hurl bone out of Joynt, or a little miscarried.

This Hurl-bone is much about the midst of the Buttock, and is very apt to go our of the Socket with a slip or strain. The Oil of Turpentine and Beer is marvellous good, used as before you were directed, for a Horse that has gotten a mischance in the Hurle-bone: After you have shaked them together in the Glass, take of it, and as near as you can, powr a little of it right over the Socket of the Hurl-bone, the bredth of the palm of your hand, and rub it in with your hand. It will make the skin to purse up and be very fore, and you must anoint him on the brawn and thick part of the in-side of the Thigh, and so down to the Stisse, and moint him down to the very

In the time of the Cure, drive in a vooodden Wedge in the contrary foot between the Toe and the Shooe, and so let him stand day and sight; If you see your Horse mend and go bet-

no

ter, you may then ride him every day, so as when you set him into the Stable, you peg him with a woodden Wedge, this course being taken, will in a very sew dayes Cure him, and make him go compleat. Proved.

CXIX For a stifle in the stifling bone.

IF your Horse be stifled that you see the stifling bone is out of his place; then first, swim him in a Mill Pool for half an hour, till he sweat behind his Ears, in which time or before, the bone will be in his place again; then lead him gently home cloathed, and keep him in the Stable warm, as foon as he comes into the Stable, peg him on the contrary foot behind, all the time of his Cure whil'it he stands still in the house; and as soon as he is dry, take Sope and Brandy mentioned in the fore going Receipts, and lay it hot to the grieved place, and hear it well in with a hot Iron, it will swell a little at first, but it will soon fall; it will strengthen the grieved place much, and in a short time it wil be a perfect Cure : Or thus, you may for a ftifle after swimming, peg him as soon as he comes into the Stable, and so do alwaies when he stands in the house, and when he is dry rub in half an ounce of the Oil of Turpentine, and as much ftrong Beer shaked together in a Glass. It will cause it to swell something more than Sope and Brandy, but it is admirable for a Stifle, and 1 speedy Cure. Observe, that swimming is not good for any strain, but only to bring a stiflebone right into place again, and you may try it

th

te

th

co

He

cu

di

be

hir

For the Cure of borfeg.

177

for that, but not for a strain. The Beast must fand in the house all the time of his Cure.

Proved.

CXX. A speedy Cure for a Sinew Brain, old as forth whome or new.

TIrft, Let blood in the Shackle-veins, which are in the Paftern, for it will much further the Cure; Then take the fattest Cat you can get, kill her, and flea her as foon as you can possible, then bruise the flesh, and bones of the Cat small, and lay it upon a cloth, and bind it dose to the Sinew-strain, from the Pastern up the Legs, as far as it will go, and as warm as you can; you must take out her guts before you bruise her flesh, or lay it to ; and you must after you have let blood in the Shackle-vein, bath the Sinew-strain with Aqua-vitæ, and rub it in cold with your hand, & then afterwards lay the flesh of the Cat on a cloth to the place: Of all thres for a Sinew-ftrain this is the best and speediest, wind a cloth 2 or 3 times about the Leg, when you have laid the Cat on, to bind it on, because a Cat drawes and knits mightily : Let him not come into the water till he be cured. Proved.

CXXI. For a Poll Evil in the head of an Horle.

IF you take it at the first swelling, then do thus; Take half an ounce of the oyl of Turpentine,

for

pentine, and anoint the swelling therewith, fo far as it is swelled, and let it link in and take its course for four or five dayes, in which time the skin will be shrunk up like a purse; At the four or five dayes end, if you fee the swelling begin to fall, then take Burgundy Pitch, and Black Pitch of each two ounces, and one onuce of Mastick, put them into a Pipkin and melt them; then take a flat stick and spread it all o. ver the swelling, then take the shearings of cloth or flocks, and do them thick on with your hand upon the Pitch till it be hot, when your plaister comes off, which it may be will be: to Fortnight or a Month. If then you fee the oyl and the plaister have killed the venome of it, and I taken down the swelling, then do no moret y it: Again, if you fee when your plaister comes off that it is much fwelled , or that there ke proud fiesh in it, then if it be not broken Land it, and if there be any dead or proud flesh init cut it out, then fill the hole or wound with fine Tow, Flax, or Hards, to dry the blood up, and there let it lye five or fix hours, then take itway, and put in some of the Medicine which you use for a Canker in the Head, Face, Eys, or Nostrils of a Horse, vide R. C. With this Medicine dress it once a day at first, and as it begins to heal, dress it once in two dayes, this Medicine will heal it suddenly ; cut a hole # the edg or lower part of the swelling, to lay it a draining, and it will heal a great deal fooner, Bl dab & throw on: good store of Wheat bran upon it vohen you lay it on, vohen your plaister comes off, look upon the top of the Poll-Evil, to fee how far the dead, proud, white, jelley fleh goes,

C

0

fo

th

E

br

th

It.

ha

goes, cut it all out with your Incifion-knife, till you come at the red flesh which is found \$ take time the veins will bleed much, and spin again when you come at the quick; but let not that hinder you from cutting out all the dead proud flesh, which if you cut all out clean, you cannot do amils, only take heed you do not cut the white paxwax, which runs along the top of the Neck, which some call a Cress, it is vvhite, and you may easily see it, if you cut that, his Neck will fall and look basely, therefore have a care: There is a white pith in a Poll-Evil near the top of the Neck by the paxwax, take your Nippers and pull it out, it will come out like a Plug, there is no fuch thing in a Fiftula; when you have pulled it out, put some of your Medioreto cine to it, and it will heal it apace; Let not the comes dead flesh be left in the wound but cut it clean out, although the wound feem never fo broad. anch init The same Cure and the same way is to be used home for a Fistula, the Beast must stand in the time of The fame Cure and the fame way is to be used the Cure. Proved. and

CXXII. For a through Splent on both fides of the Leg, by some called a great bone Scrupin.

First, Tie the Horses head close to a strong Post, then tie up his contrary Leg, then bruife and beat the Splent on both fides with a Blood-stick, or Bed-staff, beat it till it be someomes thing foft, if he will not endure the beating of fee it standing, catt him with a Rope; after you have beat it foft, take of the oyl of Riggrum 13 N 2

small, mix them together, and give it to the Beaft at any time cold, but in the morning fasting is
the best; give him vvarm water for three or
four dayes after, give him bursten Oats, boyled
Barley, and Mashes made of ground Malt, keep
him well Littered, and clothed warm. If he
a Cordial to forsake his meat, and you see he hath lost his

bring a horfestomack, to bring him to his stomack again, give to his stomackhim two ounces of Honey, and half a pint of

Whitewine mixed together, and heated Luke. warm; in the morning, after he hath drank cold water, you may give him it with a Horn; h will make him pifs, clear his Bladder, and bring him to his stomack again. After you have given him it, ride him a mile or two gently, and fi fet him up warm, at night ride him a mile or two again, and litter him well, and keep him warm; Thus do for three or four days or a vveek, at three dayes end, give him the Wine and Honey as before you were directed; If you see, notwithstanding all these means used, that he will not fall to his meat, and that he is bound in his belly, and dungs very small; then give him this Cordial two or three times, in two or him this Cordial two or three times, in two or three dayes; betwixt each Cordial giving, Take tir three pints of stale Beer, houshold brown Bread the quantity of half a peny Loaf, boil these two well together, then take it off the fire, and put into it a quarter of a pound of Hony, and a quarter of a pound of fresh Butter, give him this Cordial Lukewarm fasting, and ride him a mile or two every Evening and Morning, as well in when you do not give it to him, as when you his do ; ride him fairly , and cloath and Litter bin up warm; this Cordial will bring him to h ftomack &

1

10

20

on

182

Romack, and cause him to be loofe bodied, and dung foft, although he be weak, and have little or no flomack, four or five hours after his Cordal, the first thing you give him, boil him half speck of Oats, and a pound of Fenigreek to- v194 gether in vvater till they be burft , and the wa- funique ter wherein these were boiled, powr it from the Oats into another pail, and put some cold water to it, and when he drinks let him drink of his vvater; for the Oats and Fenigreek throw some of them into the Manger hor, and if he be loth to eat them, then strow some wheat-bran upon it, and it is very likely he will eat altogebring ther: This course taken in every particular, will bring your Horse to a stomack, and raise him suddenly. Look the Receipt following, for a dry Surfet, and when a Horses Cods are swelled, p him and runs at the Nose, and there you shall see the purge of Aloes; a fortnight or three weeks after he is thus melted, and that you have given him the former things, to give him this purge of good at he Aloes, will do the Beast a great deal of good in this case, I am confident it is good: Or gire give him as much of the powder of Mechoacan, awill lye upon a shilling at three or four times, this is very good in a pint of Wine, or aquart of firong Ale. Proved.

CXXVII. For a Foundred Horse.

n this First tye a List or Blood-cord hard about the Pastern, and that will keep the Blood up into his Leg, that it cannot come down into his Foot, when you have taken out the Sole, fet on his Shooe something hollow and broad, then o hi untie mack

ca

twenty hours till it be whole: If this quantity of Medicine be too little make more: As you feelt heal, dress it but once in two or three dayes. This Onion-falve will prevent a Quitter bone, if you lay it to before it break. This salve is good to heal and cure all these hurts.

Proved.

CXXXI. For a Horse that is prickt in the shooing, and afterwards festred.

First, open it well, and take out all the corruption to the very bottom, so far as the Nayl did go, then take three or sour house Snails, a little Salt, as much Sope as a Walnut, beat them altogether, and lay it to the place that was pricked sour and twenty hours, till you see it begin to heal, then dress it but once in two dayes; and in three or sour dressings it will be whole: When you lay this Medicine to the bottom of the foot, lay some Flax, Hards or Tow over it, and over that a peice of Leather or Splinters to keep the Hards and Medicine in: And if it break out or be soft above the top of the Hoof, lay some of this Medicine to, and bind it on with a Linnen rag. Proved.

CXXXII. For a Horse that is prickt with a long Channel Nail.

First, search it with your Buttris and drawingknife, till you find where the Channel Nail went in, open it well and give it all the ease you can; search it to the bottom with a little Tow

CXXXV. When a Horse doth not thrive, and when his Coat Stands Staring and doth not lye smooth: For an inward dry sur feit, that causeth the Cods to swell some times continually, and sometimes betwin times. When the Greafe is melted , and afterwards fet and dried in his body, and smir bis Legs Sometimes Swelled. For an in Horse that is Gaunt and will not fill, or he is Gut foundred, when he is costive in bo. dy and dungs small. To procure a stomack The following directions areadmirable good for all these following Di lea fempers. provid by Dr. Trowel

First, make your Purge thus. Take an ounce and glifters, an ounce will cost you a shilling beat it to powder, take a quarter of a pound of lav fresh Butter, bray and mix these two well together, and put a handful of Wheat bran to it,0 make it stiff like a peice of Dow or Paste, then Con fharp at both ends, this quantity will make four or five Balls; then hold up his head with a tale Drenching-stick, and take his Tongue in your of he to the root of his tongue if you have the root of his tongue if you have had a supplied to the root of his tong to have had a supplied to have had a sup Tongue if you can, that he may swallow it the old better; put your finger under his Tongue, the give him a Horn-full of strong Beer cold after oge it; then give him a second Ball, and a Horn full imit

of Beer to wash it down, and so do in like manner by all the rest, then ride him a mile gently, and and fet him up warm; Let him not eat nor doth drink for hie or lix hours after it, then give him Suralittle clean Hay at night, not before, land fome. omewarm water to drink, with some Wheat Bran. wixt put into it; the next morning give him warm 2 water to drink in the same manner, and ride and him a mile gently, and tye him to the Rack for and in hour after, then you may give him what meat - an he wil eat, at night warm water and Bran again; 2 01 the third day in the morning after he hath done 3 n bo. purging give him cold Water, and before you Storide him atter his cold Water, give him two e adounces of Honey, and half a pint of White wine Honey & Di heated a little warm, to make him pifs and to W.Wine. dear his bladder, and to beget a stomack; then to get as bores ride him a mile or two gently, and at night ayr bunce him again, and fo do morning and evening till hines be be well, litter him well, and keep him warm; illing If you fee that after his Purge, and after you and of lave given him the Honey and White wine, he 1 to do not fall to his meat. but is ftill bound in his it, then Cordial fasting two or three times, and let there Cordial and betwo or three dayes betwixt each Cordial gifour ving; it is thus made. Take three pints of ith a fale Beer, course Houshold bread the quantity your of half a peny Loaf, when these two are well of his loyled together, take it off the fire, and put inthe trof a pound of frelh Butter, give him all thefe after ogether as a Cordial Lukewarm, then ride him of ful mile after it, and fet him up warm, and tye im up to the Rack for three or four hours after

F.F Ervorg with old Side

ir, then give him a Mash of bursten Oats or

Barley, and warm water with Wheat bran in it, till the Horse be come to his stomack and be loose bodred again, which in two or three times giving he will be: The fore-going Purge is admira. ble good for a dry Surfet, and for a Horse that is bound in his body and dungs small: The Cordial with White wine and Hony, is admirable good for a Horfe that is weak and hath little stomack, to bring him to a stomack again: When at any time for the fore-going diseases, you give a Mash of burften Oats, to half a peck boyl a quarter of fenugrafa pound of Fenigreek with them, and put some of them into the Manger hot, if he be loth to eat them, because of the tast of the Fenygreek, throw some Wheat-bran over them and he will eat them; this is the only way to bring your Horle to a stomack, and raise him suddenly : Concerswedid Logs ning his swelled Cods, and swelled Legs, as foon as his Purge hath done working, take the Charge of Sope and Brandy, and dab it on his fwelled Cods, or swelled Legs with a Flat-stick as it comes boyling hot off the fire; three or four daves after it hath taken its course, whil'ft he stands in the house, take and ride him into the River up to his Saddle-skirts, with the stream and against it, half a quarter of an hour at a time, walk him thus once every day, or twice, till you fee the fwelling quite down his Codsor falls Legs, which will be in very few dayes, one noif laying on the Charge is enough. If it be a dry ler o Surfeit, give the Purge first, and afterwards the will cordial of White wine and Honey: But if he well

v.166.

have Cold, and run at the Nostril, then firth break give him the following drink made of Anniseeds a hi Turme-

ride

Stable, but will bold up his Leg to his mid. ribs, and although this disease be never so vio. lent in breaking out, or cauling his Legs to fwell and run, yet you need not fear Remedy for him, if you observe these Directions following . First, keep him fasting all the night before, or give him but a very little meat, to keep his jaws from falling; the next day in the morning be. fore he drink, let him blood on both the Neck Veins, and let him bleed well, then uncord him, and give him this Drink following, which will much purge and dry up his gross humours in his A.Drinkbody, and cleanse his blood : Take one ounce of Aristolochia, one ounce of Turmerick, one ounce of Anniseeds dry, and beat the Turmerick and Annifeeds small, and grate the root of Aristolochia; put all these together, with one handful of Rew, and a handful of Wormwood green or dry, and one handful of Red Sage, one handful of green Fennel, if it be Winter that you cannot get green, then take two ounces of Fennel feeds, and beaten small and put to the rest of the things, and all put into an earthen pot or pan, and put to them three pints of running and Spring water, and there let them lye in steep all night; the next morning before you give it to him, ride him a Mile till he be a little warm, and give it to him cold as it stood all night, then after that ride him a Mile again, and let him fand upon the bit fix or 7 hours, and then give him a little Hay, and after that warm water and bran; the next morning ride him to the River, let him drink but once a day, and

ride him two or three miles after it : At three 3 dayes end give him the former Drink fasting. and follow the Directions before named in this Receipt; and so continue doing, by giving the former Drink at every three dayes end, till you fee you have dried up the gross humours in his body, and caused them to cease running and fwelling; you may work him three or four hours in a day to get him a stomack; let it be in Winter or Summer, keep him in the house with dry meat: when he is cured you may turn him out : V Vash his Legs clean in some River up to the Hams, and keep his Legs as cool as you can all the time of the cure : One or two of these Drinks given at three dayes distance; will dry up the humours in his Body, which feed the swellings in his Legs, Cods, or elsewhere, these Drinks will make him run at the Nose white or yellow : If he fall from } his meat, you may the third day after his Drink give him a Cordial, as it is fet down in the foregoing Receipt, and then a Drink, and then a Cordial of White wine and Honey: Now if there be great Chops or Crannies in his Legs, as it is a hundred to one but there will, by reason of the extream heat, and continual running of the moift fretting humour, to heal them up although never so big, yea though the Sinews were almost rotted with the filth; to prevent which and to heal it also, take this gallant Receipt following, which is for Pains and Scratches, and if it were never foill, in a short time it will heal it. The way to order the Horse and make the Salve Salve for is thus : In this case you must not ride him into y Scratches the River or Water at all, but you must first take two or three payls of fair water and wash

going Receipts, to bring him to his stomack again, then and not before give the purge of Aloes: But if your Horse be gaunt and gift-up in
his body, if he be in any heart and will eat his
meat; in this case give the Purge first, and then
your White wine and Honey, and your Cordials, as you are directed in the fore-going Receipts, to bring him to his stomack: If you do
as you are here directed, all along throughout
the whole Receipt in every particular, you need
not question but through Gods blessing, you
shall have the desired success you look for. All
Proved.

CXXXVII. To make a Horse Stale free, and constantly.

Ake half a pint of White wine, one ounce of Ivy berries beaten to powder and put to the White wine, let it lye in fleep all night, then give it to the Horse next morning fasting, do not heat it at all, but ride him after it a mile or two, then tye him up to the Rack, two three or four hours after it: This is very good for the vvind Collick, and to make a Horse piss freely, do this every morning till you fee him pils free; this will cleanse the Kidneys of all fand and filth, it is very good for the Stone and Gravel. These Berries you must gather when they are black-ripe, which is about Lent or Shrovetide, if you gather them green, or when they are full ripe, put them in a platter and dry them in the Sun till they be fit to beat to powder, and give them as you were directed; It is

0 4

as good for a Christian as for a Horse : Nettle feeds is a great provoker of Urine, you may put a handful to the Berries and Wine. Proved.

CXXXVIII. To Cure the Vives under the roots of the Ears.

Irft, Let him blood on both sides of his Neck, then clap a pair of Barnacles upon

his Nose, and take a red hot Iron, with the edge as thick as the back of your Knife, and with it make a ftrike from the root of the Ears upon the middle of the Swelling', downwards to the lowest part of the Swelling in this manner . As this Figure directs you, Three frikes from the long, burn it till the skin be yellow, and then fear it no more, when it is thus feared, anoint the Swelling with a little Butter or Hogs Greafe, if

you anoint it once or twice, it is enough; if you fear him deep, you must anoint him the oft-

Proved. ner.

CXXXIX. For the Squinsey, or Strangling, or Cold that breaks out at the Nose, and bathrun a year.

He Squinsey breeds the Canker in the Mouth, and at the roots of the Tongue: At that time the Horse hath in his Wesand Pipe, and Stomack, a great deal of tough thick flegm, and when he cougheth much as he will, thinking to void it; it will come in lumps into his mouth, and

ning of the Receipt, give him this Cordial; Three pints of state Beer, Houshold-bread a peice as big as a great Tost and crum it in, a quarter of a pound of Butter, put them into a Skillet together, and heat them a little upon the fire, and when you take it off, put in a quarter of a pound of Honey, stir them together, and give it him blood-warm fasting; then ride him a Mile, and fet him up warm cloathed and Littered. Three or four hours after, give him warm vvater and bran to drink : Every two or three dayes for a Cold, whether it cause the Beaft to run at the Nose or no, or be in glanders. In course of Phylick, after his drink give him this Cordial to bring him to a flomack, it will help to kill the Canker in his mouth or throat, clear the Guts, and cleanfe the Lights; with one Drink of White vvine and Honey, and these Cordials, he will be in a very short time cleared and cured. If in the time of his Cure, he hath hard Kernels between his Jaws, apply the Charge of Sope and Brandy, which will either quite fink them or break them : Again, if fiel there be not Kernels, but hard Swellings in the hin Jaws, as most part there is when he hath the ton Strangling. In this case also, apply the Charge Spe of Sope and Brandy, and heat it well in: If Dr this Swelling do break in the time of the Cure, this Swelling do break in the time of the Cure, Iro let it run and heal up of it felf : If the Swelling between his Jaws be fost all over, and in the midst of the Swelling, the hair begins to scale off, you may then put in the point of your Knife a little way through the skin, and let it out; if it be not full ripe, it will heal up with proud rank flesh, and there will be a knot between his Jaws,

Drink given, you shall see the Horse within two or three dayes, to void at the Nose yellow glanders, or some other colour; ride him moderately twice a day, and keep him warm in the Stable. And two or three dayes after you have 4 given him this last Drink and warm water, then and not before water him at the River, and prefently after it give him every morning two ounces of Honey, and half a pint of White wine mixed together heated luke-warm, you may give it him abroad or in the Stable it matters not where; once in three or four dayes fasting, you may give him a Cordial, made of Beer, Honey, Bread, and Butter, the very fame, and you must lo order it, as you were directed in the foregoing Receipt. And these Drinks, Honey and White vvine, and your Cordials, will make him come to his stomack in a short time, and thrive very much, put the water wherein the Oats and feeds were burst into a payl of cold water, and let him drink of that as much as you can : vvhen an Horse is fat, and the grease set in his body, ifhe have a stomack then give the Purge of Aloes first, but if he be fat and fick and hath no stomack, then give him Honey and White wine, and his Cordials first, and afterwards his Purge of Aloes. Proved.

CXLI. For the Yellowes.

He Signes are, his Eyes will be ftrip'd with red, and be yellow, and his Lips will be pimpled and look yellow: The Cure is, Let him blood on both his Neck-veins, after that, give him this Drink; one ounce of Turmerick and Anni-

Annifeeds beaten small, a quarter of a pint of White wine Vinegar, halfa quarter of a pint of Aqua-vitæ, put them all into a Skillet, and heat it luke warm and give it to the Beaft; put a spoonful of the flower of Brimstone, into the first Horn-full that you give him, pour it down his Throat, and then give him all the rest of the Drink, one Horn-full after another; tye him up to the Rack for three or four hours, and then give him wet clean Hay, and at night vvater and bran or a Mash: If you have not the afore. faid things in a readiness by you, then give him an ounce of Horfe-spice, which you shall find mentioned in the following Receipts, and there you shall find how to make it, and for what to give it, and when, and likewise how to keep it by you: If one Drink be not enough, give him the second; if he do not fall to his meat at three dayes end, give him a Cordial or two, vvarm yvater for the first day and no more, and cold yvater afterwards: Two or three dayes after his Drink, work him moderately; If you cannot get Turmerick, take an handful of Selendine: if one Drink will not, two will Cure him. Proved.

CXLII. For the Staggers.

IT comes at first of some corrupt blood, or gross or tough humours oppressing the brain, from vwhence proceedeth a vaporous spirit, dissolved by a vveak heat, which troubleth all the head: The Signes be these, dimness of Sight, reeling and staggering to and fro, who vvita very pain will thrust his head against the walls, and forsake his meat: For Remedy, do these things

led together, and give him this Cordial fasting luke warm, the fourth day morning, give him this Drink, one onnce of Polypodium, one ounce of Bay berries, an ounce of Polypodium, one ounce of Bay berries, an ounce of Long pepper, one ounce of brown Sugar-candy, beat them all fmall and put them into a quart of mild strong Beer, heat it luke-warm, and before you give it him, ride him a Mile, and then give it him, and ride him two or three Miles after it, cloath and litter him up warm; after he hath fasted fome four or five hours, give him bursten Oats, with two ounces of Fenygreek, and two ounces of Coriander, as before; if you have no Coof Coriander, as before; if you have no Co. riander, then take two ounces of Caraway C. Seeds, and give him that night of the Oats and feeds, and put the water where the Oats and Seeds were boyled, into some cold water, and let him drink that and no other; when you have rested him a Week, then give him the first Drink his mentioned in this Receipt, and follow him as you are directed every day; in the 3d Week give him the same things again, in the same manner spi and at the same distance of dayes, in all points as you did the first Week, and in three or four his weeks it will be a Cure: The first Drink doth in Weeks it will be a Cure in the Cure and Honey will keep him to his stomack, help into him to avoid filth at the Nose and Mouth, and old will much nourish him within, they do cleanse a yethe stomack, breast and bowels, and do much his wast the Squinsey in the Throat, they do cut har the tough thick slegme. If you order these ti things as you are in many places directed, and are ayr him moderately once or twice a day, the spul Horse afful orfe will foon be found again. The last Drink polypodium, Long-Pepper, and Bay Berries, polypodium, Long-Pepper, and Bay Berries, are a purger of the Veins, Blood, and Liver, will flay the wasting of the Body: That morning you give him the first Drink, apons the Charge of Sope and Brandy, made in a live we to the Kernels between his jawes, and in the Charge on scalding hot, and heat it well fled if you see the yellow matter to become ats, lite, there will be the greater hopes of the lites addings of the Cure. Proved.

Way CXLV. For a Canker in the Month.

and TOu shall know it by these Signes; He will and flaver at the Mouth, and the Roots of his have ague will be eaten with the Canker, the sides have ague will be eaten with the Canker, the sides rink his Mouth will be hot, raw, and yellow: If Canker have eaten any holes in his Mouth, give caused many sores, then take a pottle of runspring water, an handful of red Sage, a dozen hoints is of Rosemary, an handful of unset Hysop:
his disease happen in Summer, then add five doth ix Walnut leaves, and a quarter of a pound loch Allum, put all these into a Kettle, and wine hem boyl till they be half consumed, then put help hold, you need not take out the herbs, but easile a you use it, take ten or twelve spoonsules. eanse ayou use it, take ten or twelve spoonfuls much his Liquor, then pull out his Tongue vith o cut hand, and have in a readiness a Linnen these hied at a sticks end, dip it into the Liand and wash his Mouth and Throat all over, the spull out his Tongue again, and throw a Horse stul of Salt into his Mouth; then presently after

after it, dip an other sticks end tied with a Re into Tar, and put it all over his Mouth whe the Sores are ; and once in three dayes givehing a Cordial, and White-wine and Honey, ma of as you may see before, and the same quantity his Ride or work him upon it. This V Vater, Salou Tar, V Vhite-wine and Honey, and Cordia be will bring the Horse to a stomack, cleanse his stomack, loosen his body: It will take away to the heat of his stomack, and comfort his stomack, and cut the tough slegme there; it what cure the Canker in a very short time, except dri Tongue and Mouth be very much eaten inder ind you need not wash his Mouth afterwards withe the Water and Tar, for the Wine, and Hone feet and the Cordials, will heal it alone, and wound the aforesaid effects. Let the Hay and Provenin der you give him , be clean and moift , it wig be the better. Give him no Chaff, for that w him flick in his Mouth and fester it. Proved. ride

Jonnel-20. CXLVI. To Cure a Foul, Rank, Pocky Fa him cion, which runs all over an Horse, or lan unb any particular part of his Body.

> N Horse that hath the Farcion, if his breat A fmell very strong and stink, then do no day meddle with him, for his Lights are rotten, at there is no Cure for him, for he is as full of the within as without. But if his breath be sweet there is no question of the Cure : First, for knotted budded Farcions, separate the sour bim from the fick, for this disease is infectious, the will take it one of another. This Disease of

the stable which you please; when he is cold, wash him twice a day up to the back, foak him well in the river, and at 3 or 4 dayes distance, if you see need require, give him 2 or three Drinks more, ordering him as before: As foon as you have given him the first drink, with the end of your Cornethorn, let him blood in the third furrow in the top of his mouth. These Drinks will make him run at the Nose much white or yellow matter, and they will make him fpew at the Mouth much filth; these Drinks will much purge and dry up all the gross humours in his body, and cleanse the blood : After these Drinks given, you shall fee the Farcion to appear with red heads, and they will drop out of themselves, and where you fee them ready to drop out, apply this Medicine; Take a quarter or half a pound of Roch Allum, and put it into the fire, and you shall fee it run and be all of a Cake, then take it out and beat it to powder; and mix as much as you think you shall use with your fasting-spittle, till it be like an oyntment, and there where you fee they are ready to drop out, lay a little of this upon the head of the bud, which is the head of the Farcey, and where you fee they are hard in the flesh let them alone, for some will dye, and the rest will drop out of themselves; ride him up and down in the River twice a day, as far as the swelling goes, a good while after the Al-Jum and spittle have taken place : These Drinks will kill and dry up any pockey Gangrene Far- th cey, let it be in the head, body, legs, yea although it be run all over him, it will dry them quite up. These Drinkswith the Soak in the River, and D the Allum and Spittle, will make a speedy Cure. Proved. CXL VII.

CXLVII. For a Farcey in the Head.

IF it be in the Head and no where elfe, then I blood him in both the Neek veins in the morning before he hath drunk, then give him the former Drinks for a pocky Farcey, and no Drink elfe, and after that with your Cornethorns point, let him blood in the third Furrow of the roof of his Mouth, and tye him up to the Rack for five or fix hours, then give him a little clean Hay, and at night some warm water and Bran: I fay if it be in his Head and no where elle, and that some certain small buds do there appear; then do nothing but blood him in the Neck veins, and give him the Drink, aud bleed him in the pallat of the Mouth, and at the very same time apply the Charge of Sope and Brandy, ashot as you can, and heat it well in ; lay it not upon the head of the buds, but lay it all over the swelling, and in short time, with the Drink using the Farcey will dye, and the swelling will fall. Proved.

CXLVIII. For a swelling in the Fore legs, or After-legs.

Al. IF the Beast have a great Surfet, that falls nks I down into his Fore or After-legs, if you arthink it will come to a Farcey, and you fee it grow very hard, or two or three buds appear, 1gh ite you shall prevent it by giving him two or three Drinks for the pockey Farcion, at three dayes p-212 distance between every Drink, and by charging ire. p-166 the swelled Legs with Sope and Brandy, if it be not broken before: If you fear a Farcey, or see a few buds, do thus three or four dayes, aster the Sope and Brandy is laid on, ride him into the River half a quarter of an hour at a time, twice a day. Proved.

CXLIX. For a Swelling in the Brisket, below the Chest.

If it be a Surfet that swells in the Brisket or in any other part of the Beast, if you think it will come to a Farcey, and you see two or three buds to appear; then give him two or three Drinks for the pocky Farcey, at three dayes distance between each Drink; Let the swelling be broke or not broke, lay the Charge of Sope and Brandy hot on, above the buds and heat it well in; after the buds appear, lay the Allum and Spittle upon it: These Remedies are enough for Diseases of this nature. Proved.

CL. For a Swelling with a Blow upon the Chest or any other part.

If the Swelling comes by means of a blow, be it where it will, be it hot or cold, if it be not broken, lay nothing to it but the Charge of Sope and Brandy, and heat it well in, and in 4 or five dayes it will either quite link it, or break it: If it break, fee from Pag. and there you will meet with directions for the purpose. Proved.

LI.

CLI. For a Farcey that is broken out in the Legs.

IF you see it to be thus, then do not Charge it except you fee it to swell above those buds up to the body-wards, and then in fuch a case lay on the Charge of Sope and Brandy to stop it from running higher, as you are in many places in this Book taught before upon the swelling all over above the buds, but not upon the buds below, only let him blood on the Neck veins, and in the third Furrow in the roof of his Mouth, and then give him one or two of the pocky Farcion Drinks, at three dayes distance, till you fee all the Swelling killed and dried up, with the Charge of Sope and Brandy, and the Drinks. Those buds that are broken, lay the Allum and fasting Spittle upon them, and they will dry and heal up, for those that are in the Helh, some will dye in the flesh, and some will drop out. This a certain Cure. Proved.

CLI. For a Water-Farcey.

The Signes to know it from a Pockey Farcey, are these; he will swell in great Bags as big as your head, sometimes most along under the Belly, and fometimes about his Chaps and under his Jaws, the Remedy; Take a Nail Rod, and make it bending at the end the length of a flegme, so as it may a very little more than go through the skin, at this end make it red hot, and with it strike many holes all over the swelling,

ling, and you shall see the yellow water come out pouring, and the swelling, whether in his Jaws or Chaps, or under his Belly, suddenly sall quite down; this done, to qualifie the heat of the Iron, rub a little Sope upon it, and give him but one Drink for this, which you give for the Pocky Farcion: The more you work any Farcey horse, the sooner the Cure will be done, and the better he will thrive. If your Horse be poysoned with any poysonable Medicine, your often putting him into the cold vvater, will destroy the working of it, that it will not go any further; Give him warm water to drink, and let him stand in the House the time of the Cure.

You may work any Farcied Horse with an other, but let them neither stand together, nor feed together; And to make all sure, give the sound Horse one or two Drinks at three dayes distance, which you give for a Pockey Farcied Horse, and those Drinks will prevent a Farcey of the sound Horse.

CLIII. For a Button Farcey.

The Horse will be full all over of Bunches and Knots, some as big as Pease, some as big as Nuts, they lye in burbles in the skin, and are easie to be seen: First, let blood on both sides his Neck, and let him bleed well; The next thing is, take a little Housleck and beat it and strain it through a fine Linnen cloth, and put it into his Ears, then take an ounce of Aristolochia,

chia and grate it small, the tops of Rew an handful, as much Hogs greafe as an Egg, beat thefe three last together till they be like a Salve, as foon as you have put in the Housleek into each Ear alike, divide the other into two parts, and put the one half into one Ear, and the other half into the other Ear, and put some Wool after it to keep it in, then stitch up his Ears with a Needle and thred, and tye a List hard about his Ears that he may not shake it out, then tye the List of both Ears together a little straight, when you have done thus, with the point of vour Pen-knife make a little hole in his Forehead, and after that, with your Cornet horn raise the skin from his Fore-head the bredth of your hand, round about the hole with your Knife, then take a Red Dock root, and flice it, and put into the hole three peices of it, which will be enough at once, it will draw a great deal of corruption out of it, the corruption that comes out will scald the hair off; after the strength of the Root is gone, it will drop out of it felf; when you fee it is dropped out, anoint it with a little fresh Butter, after you have put in the Rood, lay a plaister of Burgundy Pitch over it to keep out the wind and cold; Let him fast seven or eight hours, and let him stand upon the Bit, you shall fee him slaver, champ and foam as if he were ridden, give him warm water and bran at night, let it be in his Ears two dayes before you pull it out. Taking this course, you shall see the Knots and Bunches to fall in a short time, and the hair will come again upon his forehead. Proved.

CLIV.

CLIV. To cure the Cords; which is when an Horse can neither lift his Head to the Rack, nor put his Head to the Ground, no not to his Knees.

7 Ou may know this Disease by the Signes a. bove, the cause thereof cometh by reason of an extream cold wich lodgeth in the stomack, and cause the Cords to set and shrink quite up, so that the Beaft can neither lift his Head up nor down, but only to eat meat out of the Crib; in this case a Horse is afraid to lye down, and if he be laid, he cannot rise. The Remedy. First, make him a comfortable Drink of these things; Take half an ounce of Diapente, one ounce of Anniseeds beaten small, three peny-worth of English Saffron, dry it by the fire in a paper, and crumble it small with your fingers, two ounces of Honey, two ounces of freih Butter, a pint and a half of strong Beer, a quarter of a pint of White-wine Vinegar, put all these things together, and fet it on the fire till the Butter and Honey be melted, and no longer; then take it off, and give it the Beast luke-warm fasting, then walk or ride him till he be warm, then fet him up, and tye him upon the Bit five or fix hours, cloath and litter him up warm, after it give him a little Hay, and then a Mash, and no warm water that night but the water in his Mash; give him the next day in the morning another Mash, and about nine or ten of the clock warm water and bran, and thus keep him for four or five dayes; look where the Sign is,

it be in the Head or Stomack, do not cut him. for it will not be fo well, yet you may cut him although the Sign be there, but it will not be fo well: In cutting observe this: You must cut him at the very bottom of the Breaft, you shall fee the Vein, and under the Vein lies the great Sinew as big as a Tobacco pipe steal, just by the in-fide to the top of his Leg, when you fee where the Vein lies, draw the skin aside which lyes over the Vein, and cut that part of the skin an Inch or more, which may just fall upon the Vein again, this being cut with your Cornets horn point, make a little way and you shall see a blew film lye over the Vein; chafe it a peeces till you come to fee the Vein, with the point of your Cornet-horn, then draw the Vein alide with one hand, and put your Cornet-horns end under the Sinew, and raise the Sinew up above the skin with your Cornet-horn, and cut it quite asunder, let it go, and put a little Butter and Salt into the Wound, and afterwards heal it up with some of the afore-named healing Salves; walk him an hour at a time twice a day for a Week together. If you find that with the first Drink, the Cold breaks at his Nostrils. then give him the same drink again at three or four dayes distance between each drink, and order him as you are at the beginning of this Receipt directed. If need require, give him a third Drink. It is an extream Cold that shuts the Cords, this Drink will break the Cold, and in a short time the Beast will do well, and stir his Head again. Proved.

CLV. For a Stumbling Horse.

Irst, tye him up with a Halter close to a Post your Knife and cut a hole length-wayes down to his Lips, end-wards in the midft of his Nofe, between his Nostrils the length of your Thumb, when you have cut through the skin, then do off the red film with your Cornet-horn's end. and you shall see a white flat Sinew lye before your Eye, take the point of your Cornet horn and put under it, and raife it above the skin, then pull it hard out with your Cornet horn, and turn your Cornet horn about, then pull it the fecond time and turn your Horn again, and fo the third time; in this doing, you shall fee him bring his hinder-Legs to his fore-Legs almost, when you have thus pulled and turned the Sinew two or three times about the Cornet-horn, then cut the Sinew under the Cornet to the Lips end, but cut not not the Sinew upon the Cornet nor about it ; when you have cut it let it go, and put a little Butter and Salt into the Wound, then over it lay a playster of Burgundy Pitch to keep out the wind, and you shall see the Horse go very well, and never stumble afterwards.

Proved.

CLVI. How to make Diapente.

dr ef

horn, the round root of Aristolochia is better than the long, cut the outward Rind, and then grate it small, do not dry it, but after you have grated it beat it small by it self, or with the other things in a Mortar; then put them into a sine Sieve, and searse the sinest out, then put the biggest into the Mortar again, and beat it as small as you can, then searse the sinest from that, and beat the rest again, and so do and searse it, till you have done all very sine, then put it into a Bladder and keep it for your use: Of this Diapente you may give an ounce at a time, although you give other things with it. An ounce of Diapente is a good Drink alone in apint of strong Beer for a new taken Cold.

Proved.

CLVII. How to make Horse-Spice.

T Ake a quarter of a pound of Anniseeds, 2 quarter of a pound of English Liquorish, aquarter of a pound of Grains, a quarter of a pound of Fennel feeds, a quarter of a pound of Flower of Brimstone, more or less these are the proportions to make the Horse Spice, slice the Liquorish and dry it, and beat them altogether. If you will you may put in half a pound of Elicampana in, first dried, and then beaten small in a Mortar with the rest of the things; you may either put all these together, or else keep them feverally by themselves. An ounce of this Horfe-spice, with a spoonful of Sallet oyl, and alpoonful or two of Jean Treacle, is a good drink (for a Countrey man who will give but shilling or eighteen pence) in a quart of strong Beer,

Beer, this Drink is for a Cold, and to make a Horse thrive, and to prevent diseases; if any man upon letting his Horse blood, will have him likewise to have a Drink, give an ounce of this Horse-spice in a pint of strong Beer heated luke-warm in a morning fatting, let him fland in the house, and give him warm water to drink, and a Mash. Proved.

CLVIII. To cure a Ring Bone.

T His Ring-bone alwayes groweth upon the In-step a little above the Hoot on the After-leg, about the bigness of a Walnut, sometimes bigger, fometimes leffer, in a hard long crushy substance, the Cure is ; First, take up the Vein of the infide of the same Leg where the Ring-bone growes, then to make a certain Cure of it, burn it with a hot Iron that is of the thickness of the back of a Knife, upon the top of the Ring bone fo far as the Swelling goes, and with fith your hot iron make 3 ftrikes downwards, and 3 frew ftrikes cross them, as you may see in this Figure: there

burn it but till it look yellow and hear no more, then take a Horsenail, and addive it through a pretty big stick, ath fo that the point may come through walled as much as may go through the skin, ork and make it just to bleed; strike the lagt

point of the nail into the feared Lines in every for fide 3 or 4 holes, then take an handful of Salt, and Ince rub it hard in with your hands, a quarter of an lace hour after, lay this Charge to the Ring-bone, as much much Burgundy Pitch as a Walnut, and as much mor black Pitch, half an ounce of Mastick, boyl them

LXI. For the Pains and Scratches, or rotten broken Cuts, putrified Sinews, this Receipt will cure in a wonderful man. ner.

the air, IF it be the Pains and Scratches do thus; Take up-lis Legs clean, and clip away the hair close to than he skin fo far as his Legs are crannied or scab-fore ky, then with a pail or two of fair water wash hto is Legs clean again, and let him stand till he then tedry, then take half a pound of English Ho-tar, ty, one ounce of beaten Pepper, ten heads of ister Sarlick, put all these into a Boul or Cup, and anotat them together till they come to a Salve: If the Pains and Scratches be on both Legs, then on wide the Salve into two parts, and lay one half onth pon one sheet of paper, and the other half up-the manother half of gray paper, and take a broad ould sice of Linnen cloath, and lay it over the pa-But er, and lay the plaister to the hinder part then this Legs, where the fore always is, and hre twe them on with a Needle and Thread pretty found, so as it may not come off, sowe it shall be in the Footlock, and all the way up so far oul his Legs are scabby, and let it lye on two 01

dayes, you must make a small Thumband of fine Hay, and wind all over his Legs, and over the plaister, and let it remain as long; at two day end, take a Linnen cloth and wipe the Chopso every Cranney and Crack in his heels clean, then lay on a fresh plaister, and do as you did before in every particular; and at two dayes end, take away that plaister, then lay on another, and let it lye on three dayes, and when you take that off and fee, if need require lay on another plaifter, and let it lye on three dayes more, and in three or four times thus dreffing, it will be quite dried up and whole. Let him not come in the water all the time of his Cure. If his Sinews be rotten, broken, cut in pieces, or much putrified then apply this Medicine as before, and let it ly on the same time as before, and as it heals dreft it the feldomer, and bind a Thumband of Ha over the plaister, and keep him out of the vva ter, and in the house all the time of the Cure This Salve will draw clean, and manner. It is together again in a wonderful manner. It is together again in a wonderful manner. It is together again in a wonderful manner. This Salve will draw clean, and knit the Sinew ture, the best Cure in the world. If one or two 15 of the Pockey Farcies drinks were given in this H cafe, I am confident it would much further the the Cure, and dry up those humors in the body which feed the Scratches in his Legs.

CLXII. For the Strangullion in an Horse.

The Signes to know it are; It much differeth from that, when an Horse cannot Stale, and

co

it

yo

to

0

it

01

bi

and it differeth from the Disease called the Gripe or Fret in the Guts, which will put an Horse to abundance of pain, and make him to tumble and wallow: This Disease called the Strangullion, if a Horse have it he will look gaunt and cannot pils, he will offer, and stand fraining to piss, but cannot, his Bladder will be ready to burft, with extream fulness and heat of his water, for present Remedy do this : Take spint of Claret wine redded well, and put into it an ounce of Ivy-berries beaten small, one ounce of Parsley seeds beaten small, and give it him at any time; once doing is enough.

You may likewise see for the Gravel and Stone what is given to a man, and you may give it him.

CLXIII. For Fretting or Griping in an Horses Belly.

His Disease will make the Horse to tumble and wallow with all four feet upwards, with two i griping wind in the Guts, you shall fee some this Horses in such extream pain, that they will swell r the therewith as if he would burft, and will endanbody ger the breaking of their Bladder, and in this cafe they cannot dung. For Remedy, Take a quart of cold Salt-beef or Pork Brine, if you cannot get a quart get a pint, put it into a Horn and pour it down cold : After this brine is down, anoint your hand & arm with Sallet oyl or Butter and rake him, and pull out as much Dung as you can to give him all the ease you can, then take a good

good big Onion, and peell off the outward rind, then cut it length-wayes and crofs-wayes in many places, then roul it up and down in a handful of Salt, and what Salt it will take up, put it into a hollow pye of Butter, but before you put it into his fundament, anoint your hand and arm with Butter and Sallet oyl, and run up the Onion thus rouled in Salt and put into the Butter, as far as you can, and there leave it; then tye up his tail close to his rump as you can, being tied with a Cord, faften the Cord to his Girts, that it may keep in the Onion and Butter, then lead him out and walk him, and in a quarter of an hours time it will purge exceedingly. It will cleanfe his Maw much, and cleanfe his Guts, and kill the Worms, let his Tail be tied but a little while that he may purge freely, prick him in the Mouth with your Cornet horn, the first thing you do. The next day morning give him a comfortable Drink, made of an ounce of Horse. spice, a quarter of a pint of Whitewine Vinegar, with a pint and a half of frong Beer, put them together, and give it the Beaft Lukewarm fasting, and he will do very well after it; Give him burften Oats or a Mash for two dayes after it, and warm water the day you give him this Drink, Proved.

CLXIV. To kill Botts or Worms.

You shall know whether your Horse be troubled with Botts or Stomack worms by these Signes, he will squitter and dung them, and all of a sudden he will dung very small; in this case he will void small white worms of him self,

felf, he will be much knotted under his overlip, the roots of his tongue will be fiery and vellow, his breath hot, sweat much as he stands in the Stable, and will be very faint; Now if you fee him to sweat in the Stable, then know for certain that he is for certain far gone, and is in great danger. For Remedy, Take Turmerick and Annifeeds of each an ounce, one peny. worth of the Flower of Brimstone, half a quarter of a pint of Brandy or Aqua-vitæ, beat the Annifeeds and Turmerick small, and then put all together into a pint and a half of strong Beer, except the Brimstone, and that lay upon the top of the Horn, when you are ready to give him the Horn into his mouth, give this Drink fasting, and let him fast four or five hours after it and stand upon the bit; give him to drink warm water at night, the next day cold water, ride him after it, this Drink will work pretty strong. If he have not been lately let blood before, let him blood in the Neck vein, and in the third furrow in the roof of his Mouth, with the end of your Cornet horn. This Drink at once giving will kill the Botts, and take him off his faintness, and much cleanse and purge him of tough gross bumours in his body, upon which the Worms do breed. Culpepper faith, that Box-tree leaves are excellent good to kill the Botts in horses, they are hot, dry, and binding, you may put in a handful of them into his Drink and try conclusions. Proved.

CLXV. For a Feaver in a Horse.

The Signs are, the Horse will fall suddenly fick, and be very weak, he will go heavy and fad, as if he would tumble down, and be gaunt in his belly, fall from his meat, and look weakly in his Eys, hang down his head, and fland drooping : when this fickness first takes him, he will tremble and quake, as if he had an Ague:, For this Difease take no blood from him by any means, it is death if you do. The Reme. dy is, Take half an ounce of Diapente, one ounce of Bay-berries, half an ounce of Long-pepper, beat all these together; then take half an ounce of Diascordium, and put all these into a pint and a half of strong Beer, heat it luke-warm. and give it to your Horse at any time of the day, for this Disease is dangerous, and will admit of no delayes; cloath and litter him up very warm; the Diascordium in the Drink will cause him to lye down and fleep, after the Drink hath done working, and the Horse done sweating, then give him half a pint of White-wine, and two ounces of Honey, mix them together, and heat them luke-warm, and give it him in the Stable, and after you come to ayr him, you may give it him abroad; three or four hours after, give him a Cordial made of three pints of Stale beer, and a quarter of a pint of Honey, and a quarter of a pound of Butter, and a good peice of Houshold Bread, boil them a little together, and give it him luke-warm, and fet him up for that night; gve him warm vvater and bran at night, next

next morning fasting give him the Cordial again, and at nine or ten a clock, warm water and bran, at two or three a clock, White-wine and Honey, and at night warm water and bran. and afterward, now and then a Cordial, and and White-wine and Honey, and moderate ayring will foon bring him to his stomack, when you fee he is able to wealk abroad, ayr him once or twice a day, it will do him much good. Thefe Cordials, Wine and Honey, and ayring of him, will cause the beast to mend apace: After he come to eat his meat prety handsomely, take some blood from his Spur-veins, the Frets from im, fweating will do him much good: If he ve down and fleep it will bring him down to his lenfes, and the Horse will mend much in twenty If Diascordium do not make him four hours. take rest according to your mind, then you may take as much Poppy-feeds as vvill lye upon a ixpence, in two half Hornfuls of any Beer, if you cannot get Poppy-feeds which some call Red-weed feeds, then buy white Poppy vvater at the Apothecaries, and give at each Nostril a spoonful, and that will make him sleep heartily. Proved.

CLXVI. For a dry inward Mange.

The Signes are these; his hair vvill come off by plats, and sometimes it will come all off from head to tayl, and there will be a dry scursie Mange, as well where the hair comes off, as vvhere it stayes on, it is an extream heat of the blood vvhich causes the hair to scale off, and causeth the dry Mange in his body. If his body be

be dried up and vvafted , that the Horfe be mi! ferable lean and overcome with it, then give him this one Drink and no more, not elfe, viz, One ounce of the flower of Brimftone, 2 ounces of Rolin beaten small, one ounce of Turmerick beaten small, one ounce of Anniseeds beaten small, put all these except the Brimstone, into a quart of strong Beer heated lukevvarm, and give it him fasting, and put the Brimston at the mouth of the Horn, to put it down with the other thing;, tye him up to the Rack for four or five hours, then give him yvarm vvater and bran, at night burften Oats ; the next day after, give him in his Provender two spoonfuls of Rosin bearen to powder, at night the like; the next day the like, and then no more; This is to cleanse and purge away the Mangy furfet that is in his body, and causeth the outward Mange. Also do thus, two or three dayes after his Drink, scrape off all the Scabs and Scurf clean with the back of your Knife, or some other thing for that purpose, till the blood and vvater appear. Then presently mix an equal proportion of ovl of Turpentine and Beer together as will serve and shake them well together in a Glass Vial, and anoint the Horse all over but once, and it is an absolute Cure. It will smart terribly, tye him close up for an hour, till it have taken its courfe. But if you be merily disposed, as soon as you bave dreft him all over with it, bid the the fellow go home with him and fet him up, but believe it he will not hold him long, for the Beaft will run away with him, and kick and wallow, and rub in a most strange manner, that one would think he vvere stark mad, but it will have

have done smarting in half an hour. It is a gallant Receipt. If the Horse be not much pined and shrunk of his slesh, do nothing but anoint him once outwardly, and give him this Drink, and the oyl of Turpentine and Beer, will kill the Mange of a Beast, Dog, Bullock, or any thing with once dressing. Proved.

CLXVII. To ftop bleeding at the Nose, or in the Mouth, where the Flegm or Knife hath cut a great Gash: Or when you have cut the Vein in a Quitter bone, and it bleed that you knot how to stop it.

Or any of these, when nothing will stop it this following will; First, take a Chafingdish of hot Coles, and burn three or four Linnen Rags upon the Coles, laying them one upon another, and let the Horses Mouth be over the smoak all the vyhile, as the blood doth fall out of the Horses Nose and quench them, so you must blow them up with your breath again, till the Coles have burnt the Rags as black as a Cole, which when you perceive, take them as they are burnt black and bled upon by the Horse, and put them up into each Nostril an hand high. then hold up his Head, and have in readiness three or four quarts of strong Beer, and pour it down his throat, to wash down the smoke and dotted blood which lies in his throat. If he mort the burnt Rags out, have other burnt hot Rags in a readiness to put up his Nostrils : And you must remember as well when you fume him, so when you have stopt his Nostrils with burnt Rags,

Rags, to be often pouring down his throat cold Beer, because the blood returning a contrary way will choak him: This courfe taken will ftop bleeding at the nose of a Man. If an Horses · mouth be cut with a fleam at any time, when you let him blood in the Mouth, and the fleam glance and cut a gash in his mouth, and that it bleed so that you know not how to stop it, then take some of these burnt Rags and lay them as hot into the wound as you can, and afterward take another clean Rag and lay it over the wound to keep in the burnt Rags, and tye on each fide his Teeth a small ftring overthwart to keep it close to for 24 hours, at the end of which time you may take off the Cloth, but let the burnt Rags lye in the wound as long as you please, for they will draw and heal mightily, when they come out you may put in more and do as you did before: and so for a Quitter-bone if you cut it till all the Veins bleed and you cannot stanch the blood, then take of these hot burnt Rags and fill the hole full, and they will stop the blood in a very hort time, and let it lye there for 24 hours, and they will draw it as white as can be, fo that you may fee what to do afterward: This will stop the blood either at Nose, or in any Proved. wound.

CLXVIII. For a Cold new or old, or a Cough Wet or Dry.

Take of Rue one handful chop or stamp it very small, and put to it a penyworth of Anniseeds beaten to very fine powder, make it up in Pills with sweet Butter, and so give it to your

your Horse in a pint and an half of Ale or Beer fasting, ride him upon it and let him fast four or five hours after it: do this every third morning till you see his Cough quite gone. This hath been found to be most Soveraign for an Horse that hath a Cold, whether newly or formerly taken; or for a wet or dry Cough: It is also most excellent for an Horse that hath been over ridden, or any waies wronged by Labour.

Preved.

CLXIX. For a young Horse that hath taken a New Cold.

Take Water and Salt as much as will suffice, brew them well together, make it bloodwarm and give it him, and do after as is necessary. This I find to be singular good to be given to a young Horse, that hath newly taken Cold.

Proved.

CLXX. For a new-taken Cold with a Coughing.

Take of Bayes, of Anniseeds, and of Liquorish, of each half a penyworth, of brown sugar Candy one penyworth, make all these into powder and sow them up in a fine linnen Rag, and so tye it to the Bit or Snasse of the Bridle, and so ride a Journey and travel him: If it be a Cold newly taken it will cure him in a short time. This I have tryed and sound to be good, for it will cure both Cold and Cough, if it be thus used with riding and exercise.

Proved.

CLXXI.

CLXXI. For the Botts.

Take as much black Sope as a Wall-nut, as much flower of Brimstone and a little Garlick bruised, put these into a pint and an half of strong new Beer or sweet Wort, steep it all night and give it the beast the next morning fasting, and tye him up to the rack three or sour hours after, then give him warm Water and what meat you please.

Proved.

CLXXII. For a Blood Spavin.

First, take a strong Shop halter, and put the Noose or Head stall about his neck close to his shoulders, then take the other end of the halter, and take the contrary After-foot from the ground, which the blood-Spavin is not upon, and put the other end of the halter about his Pastern, and draw it with the halter from the ground, and tye it to the head-stall of the halter, that he may not fet it down ; by doing thus, you may take up the vein and fear him as he stands, but the best way will be to cast him, and to tye his other three legs, and let that be at liberty, then before you take up the vein half a foot above the Spavin-place, in the small of the ham in the infide of his Leg, you must first draw the skin crofs with your fingers on one fide of the vein, then cut a whole in the skin an inch and an half long down his Leg thus | in that part of the skin which will lye right over the vein, then let the cut go, and the skin | will lye over the vein, then with the point of your Cor-

net horn length-ways as the wound is cut, chafe and fret the thin skin or film a peeces, that you may fee the vein lye blew, then with the point of your Cornet horn, by degrees run it between the vein and the skin, and raise the vein above the skin, and after that put two short Shoomakers ends between the vein and the flesh, a little distance one from the other, to tye or take up the vein after it hath done bleeding; then and not before, with the point of a pen-knife, flit a little hole length-wayes in the vein, not cross the vein by no means, for fear of cutting the vein a peices, you must open the vein as it lyes upon the horn, and when it hath bled enough, tye the ends that you before put under it, above the flit of the vein pretty hard, and tye the other bonds end below the flit of the vein pretty just, and leave the bonds end an inch long hanging without the skin to keep the hole open, that the matter may come out at it, and that the skin may not heal up, before the wax threds have eaten the vein a peices, which will be within a Week; when you have tied up the vein as is hewed you, then put into the hole or wound a little piece of Butter and Salt mixed together, to heal it up: after all this, before you

let down his Leg (in case you do it standing) but whether you do it standing or lying this you must do, take a nail-rod at the same time, and make it with a thick edge bending or hookt back, heat it hot, and make in the bent of the Leg with it one long strike downwards, sear it besides the sinews till the skin looks yellow, make the searing thus

个个个

in the bent of the Leg besides the sinews, but not upon the sinews, as the foregoing figure shews you, and thus you must sear him on the inside and on the outside of the Knee; where you see the swelling appear, there you must sear him likewise with one Line and two crosses, cross it in this manner:

After you have thus seared it, then apply this Charge; A quarter of a pint of Brandywine, or for vvant thereof a quarter of a pint of Aqua-vitæ, and a penyworth of Crown Sope, boyl them together till they come to a white Salve, then

lay it all over the Swelling as hot as you can, with a flat-flick, and heat it well in with a bar of Iron, once laying on this Charge is e. nough; when this hath lain on a Week, then ride him, whether he halt or not fo you ride him moderately, then take an ounce of the oyl of Swallowes, and rub it well in with your hand upon the finews of the bent of the Leg, to retch and give liberty to them, use of this oyl every four or five dayes, and in four or five times dreffing it will be a Cure. After he come from work or riding at any time, and his Legs be washt and dry, then rub on this oyl upon the bent of his Leg, and upon the Sinews, you need not heat it in now with a hot iron , but rub it well in with the palm of your hand, and within a fortnights time the blood Spavin will not be feen, and the swelling will be quite gone: If you take a blood Spavin at the first coming out of a young Horse, then do but fire it lightly, and lay the former charge to, and in once dreffing it will be a compleat Cure. Proved.

CLXXIII. For an old Cold. provid by & Trovel an hour or better, and the

IF you fee cause, take blood from the Neckvein, otherwise not, then instead of giving him Oats, give him Wheat bran boyled in water after this manner. (Viz.) Set a Kettle over the fire almost full of water, and when it begins Bran prepar to boyl put in your Bran, and let it boyl a full De Grey. quarter of an hour, then take it off, and let it fand till it be almost cold , and about four or hve of the clock in the Morning, give it him as hot as he can eat it, and for his Drink give him the same water, and at Night give him Oats and white vvater to drink, and let him be covered and littered up warm. If it be in Summer, let not the Stable be too hot, for that will take avvay his Stomack, and make him faint; And when you give him his vvater at night, alwayes give him as much of this powder as an Eggshel will hold amongst his Oats, to which you must keep him eight dayes together, or longer if you shall fee cause; the boyled Bran is that which drieth up all his corrupt and gross humours, which was the cause of his cold: Now the Powder is this. (Viz.) Take of Cummin feeds, Fenygreek, Sileris Montani, otherwise called Sifilers, Nutnegs, Cloves, Ginger, Linfed, of each of these two ounces: Quick Brimstone six ounses, make all these into fine powder, and mix them all well together; it must be given him in his Oats the quantity that was prescribed betore, but he must first be watered with white water, and then prefently let him be well rubbed all over, and cloathed and littered warm,

R

and

and an hour before you give him his Oats, put it into his Rack a little fweet Wheat ftraw , and h let him eat thereof an hour or better, and then and not before give him his Oats mixed with this powder, which having eaten give him Hay it your pleasure, and with doing thus his Cold will be gone in a fort time, and the fooner if you avr him an hour before Sun-fet, and an hour after Sun-rifing, if the Sun fhine mark that keep up his Stomack with White wine and Ho. ney, and the Cordials, or with what elfe you think best of. Proved.

Now if this Cold bring with it a violent Cough, as is often feen, then use this

Receipt following.

CLXXIV. For a Cold with a violent Cough,

Irft, give him the vyheat Bran boyled, together with the Powder with his Oats, as is directed in the fore- going Receipt , but not above three or four dayes, or till you fee he hath purged sufficiently, for that the faid Powder difperfeth the corrupt and grofs humours that are in his body which do occasion the Cough; and when you perceive that he hath purged sufficiently, keep him norwithstanding tohis vehite veater, which is no other thing then vvater made hot in a Kettle, and then put in some vvheat Bran, or barley Meal, let him eat the Bran as hot as he will ; and drink the vvater a little warm : But alwayes an hour before you water him, take a flick a little big. ger than your thumb, of wel-nigh a foot long, and wrap a Linnen cloth about it four or five times,

Y

i

This Curb alwayes groweth upon the backpart of the heel of the knee of the hinder
Leg, in a hard substance; I shall give no more
signes, for it is easie to be seen: The Remedy is
this, first tye up the contrary Leg as you do for
a blood Spavin, then vvith an hot iron sear it
length-wayes down his Leg upon the Curb, till
the skin look yellow, then draw your hot iron
cross it, as you did for a blood Spavin, in two or
three places, then presently take an Horse-nail
and

and drive at through a flick, fo that the point of the nail may come a little through the flick, the bredth of a ftraw, or a little more, then fet the point of the nail to the fired places, and strike it in some ten or twenty times, according as the burning goes in feveral places, and as you fee occasion, then take a handful or two of falt, and rub it well in with your hand to stop the blood, and half an hour after wipe the falt off, and apply the Charge of Sope and Brandy hot on, and heat it well in with a bar of Iron, and as your Iron cools, flake it over it to dry it in the better, let the Charge lye on till it comes off of it felf; you may ride him every day after three or four dayes, in the mean time let him stand in the Stable. Proved.

CLXXVII. For a Quitterbone, Old or New.

This Quitterbone always growes just above the top of the Hoof on the hinder Foot, and sometimes on the Instep just above the Hoof, and sometimes above the Hoof on the side of the Foot, but be it in any place this is the Cure: First, take up the vein in the small of the Leg, if the quitterbone be on the inside of the Leg above the Hoof, then take up the vein on the inside of the Leg: If it be on the outside of the Leg, then take up the vein on the outside, this is the way to surther the Cure, and make all sure by taking up the vein which does feed it. You may see how to take up a vein, if you look into the Receipt for a Blood-Spavin.

For the taking up of a vein is all alike, beit where it will be, after you have taken up the vein let it bleed well, and put into the wound some Butter and Salt : Then with a little Towe. or Hards, or a Linnen cloth wound about your Instruments end , fearch the quitterbone to the bottom, and where you fee the matter come out there put in your Instrument; when you have fearched the wound and made it clean; put into it a peice of white Arfenick as big as a smal Bean, and put a little Tow after it and lay a little Tow upon the top of the quitterbone, with a Linnen cloth next, and a Woollen cloth over all, tied on fast that it may not come off; then tyehim up to the Racke with a strong Halter one day, till the anguish of the Arsenick be over, for fear he come at it with his Mouth; let the Arfenick lye in forty hours, then take out the Hards, and you shall see the hole in the quitterbone look very black, and swelled more than it was before, It is the effects of Arfenick, therefore you need not fear, but as foon as you have pulled off the Cloaths and Hards from the place, you may put his Foot into a pale of cold water, for a quarter of an hour, and let it foak ; or if the River be near that you can lead him into it, if it be clear water, fo that no fand or dirt get into the wound, and let him ftand and foak his Leg there for a quarter of an hour, for his Leg mult be once a day foaked, either in a pail of clean water or in the River, for a Week together, take off his wet hard clothes, and tie on dry ones, this is all you have to do till you fee the Core of the quitterbone come out, which when you fee, make this Medicine to heal it up : Take

mi la

C

penyworth of good Honey, put it into a Pipkin, and when it begins to be hot, put in a penyworth of Verdigreafe, and three or four spoonfuls of White-wine Vinegar, boyl them all together for half an hour, then take it off the fire, and when it is rold, take a little fine Towe and dip into it, and put it into the wound, and day a little dry Towe or Hards over that, and a Linnen cloath over them, and bind them on with a string, and so dress it once aday, till you fee it begin to heal, and then dress it but once in two dayes, and as you see it heal dress it the fewer times, till it be whole: There will be a little place bare where no hair will come, put in Arfenick but once, and although you tye him up to the Rack because his mouth hould not come at the Arfenick, yet give him meat for all that, do but remember these two last cautions, and you need not question the Cure, for it will be speedy. Proved.

Now suppose you meet with a Quitterbone that hath been a long time in other Farriers hands, that have so corroded and poysoned it, that it is much swelled about the Pastern and Leg: In this case, you must first take up the vein on that side the Leg that the quitterbone growes on, to keep the humour back that feeds it, then put in as much Arsenick as a Bean, as you were directed before, and so doing as it is there express, soaking his Leg as you are therein taught, and when the Core is out, heal it with the same Salve that is there prescribed, but if there growes proud sless in it, whil'st you are a healing of it, then scald it with Butter and Salt, and that will keep the proud sless down:

The Cure of that in the Sole of the Foot, from that which breaks out above the Hoof, and ap. ply each Cure to each difeafe; In this cafe the Pouleis must be first applyed above the Hoof, becaufe when the Sole of the Foot is taken out, you must not lay the Poultis to the Sole of the Foot till it be a little grown, and further, with the great pain and continual holding up his Foot from the ground, his Sinews in the bent of his Sinew show Leg will be fhrunk; to remedy which, use the ovl of Swallowes, as you may fee for a Blood-Spavin in Receipt CLXXII. But if you cannot get the oyl of Swallowes, if his Sinews be knit or ftiff, then rub in some Trotters oyl, which is made of Sheeps feet, it is to be had at the Tripehouses, but for want of either of these, boyl fome Hogs greafe and Aqua-vitæ together, and rub it in with your Hand cold, which Receipt is incomparable for fhrunk finews.

Proved.

CLXXXII. For a Strain in the Coffin-joint, or a Sive bone in the Socket of the Hoof.

Or Remedy, Take off the Shooe, and then pare the bottome of the Foot as thin as you can, till the blood do almost appear, you shall know in what place the Strain is in , by taking the Foot in your hand, and wrying it to you and from you, if it be there he will fhrink at it much when you thus turn his Foot. when you find where it is, make this Poultis and lay it to hot. Take a pint of powdred Beef or Porkbrine.

these as you did the former, and your hand also and so put it up into his Fundament the length of your hand, then tye his Tail between his Legs, for half an hour, in which time the Suppository will be dissolved, then ride him and order him as before. This is very good, especially in case of Surfets or inward Sickness, rake him first and teep him warm. Proved.

CLXXXIX. A Suppository to purge Flegm.

Take a peece of Castle-Sope, pare it and bring it into the fashion of a Suppository, put it mo his Fundament and order him as before.

Proved,

CXC. A Suppository to purge Choller.

Take Savin as much as will suffice, and stamp it to Mash, and stamp with it Stavesacre and lik, of each two ounces, boyl them in common honey, as much as will suffice to make it thick, and so make it up into Suppositories, and Admitter one of them like as you are before shewn, and order him accordingly.

CXCI. A Suppository to purge Melan-

Take a Red Onion and pill it, and jagg it cross-wayes with your Knife, and so admiller it, and order him as before.

CXCII. An other Suppository.

Take a pint of common Honey, and boyl it till it be thick, and make it up into Suppositories as it cooleth; and administer it as before, and order him also in the like manner: This Suppository purgeth evil humours, it cooleth and comforteth the body very much, and causeth a good appetite to meat. Proved.

CXCIII. Directions for Suppositories.

fo

ir

n

Ь

B

h

lo

Ы

be

re

m

01

First observe this: When at any time you do administer either Potions, Glisters, or Suppositories, you must do it in a Morning fating: Except necessity urge the contrary.

Secondly, you must not at those times suffer him to drink cold water, no not with exercise,

but either sweet Mashes or White water.

Thirdly, it is very needful before you administer any of these, that you Rake him; and be

fure you keep him warm.

A Suppository is but a preparative for a Glister or Purge, to make that way that they may purge the better.

CXCIV. To kill Worms.

Take Bears-foot and Savin, Lavender Cotten, the flower of Brimstone, give it him in sweet Wort; it will kill the Worms and turn them into slime: Ask for the powder of Caroline at the Apothecaries, it is as admirable a thing to kill Worms as can be, you may give

three or four peny-worth at a time, in a pint and a half of sweet Wort. It is a very safe thing.

Proved.

GXCV. To purge by Grass in Summer.

IF your Horse be surfetted, or hath been o-I ver-laboured the Winter before, then turn him out when the Grass is in the best heart : Now that Grass that will purge most and best, is a new mowen Meadow, for that will rake his Guts very well, nor will he in such a place gather flesh; therefore let him go there not above fourteen or eighteen dayes, and then put him into fome other Pasture, where the Grass hath not been touched with a Syth, and there he will belly well, and in a short time recover much flesh, and be very fat and lusty; This purging will fcour him bravely, and fend away all ill humours and furfets, and eafe his limbs marvelloufly well, and do his legs and feet much good, and refine his corrupt blood, and make him nimble and full of spirit. Also to mowe green Rye before it be eared is most wholsome, for it scowreth, cleanseth, and cooleth the body very much, fo do the leaves of Sallow, and the leaves of the Elm-tree.

CXCVI. A Glister for a Sick, Surfetted difeased Horse. De grey

IF your Horse be newly taken from Grass, and that you hold it needful his body should be cleansed from bad humours, which either his S 3 Grass

Grafs or former Surfets might bring : First Rake him, and then give him this Glifter fol. lowing, (viz.) Take Mallowes three handfuls, Marsh Mallow Roots cleansed and bruised two handfuls, Violet leaves two handfuls, Flax feed three spoonfuls, and as many of the Cloves of white Lilly Roots, as you may easily hold in your hand, boyl all thefe in fair water from a Gallon to a Wine-quart, then strain it, and put thereto one ounce of Sena, which must be infused or steeped in the Liquor three hours standing upon the hot Embers, then put thereto half a pint of Sallet oyl, and then administer it Glifter-wife blood-warm, and caufe him to keep it half an hour or longer if you can ; and the best time to give this Glifter, is 3 or 4 days before the full or change of the Moon, but if occasion be, you may give it at any other time; this Gliffer is to be given to a foggy fat Horse, which otherwife cannot be kept clean. It purgeth the Guts abundantly, and it is chiefly to be given an Horse that is newly taken from Grass. And the next day after you have given him this Gliffer, give him this Drink following.

CXCVII. A Purge.

Take the strongest Ale-wort one quart, of Honey a quarter of a pint, of London Treactle two ounces, mix and brew them all together, and give it him blood-warm; then keep him upon the Bit six hours after, warm clothed and well littered, and give him a sweet Mash, and White water, and Rack him with sweet Wheat-

Wheat-straw, Oats, and Bran, this both purgeth and comforteth; two or three dayes after, give him this Drink following.

CXCVIII. Another Purge.

TAke a pint of White-wine, and put into it one ounce of Sena, and let it fleep all night, next morning betimes strain it, and put into it one ounce of the best Aloes made into fine powder, half an ounce of Agarick, and a spoonful of powder of Liquorish, mix and brew them all together, and so give it to your Horse blood-warm, and ride him gently a quarter of in hour after it, and so set him up warm, well cloathed and littered, and let no cold ayr come to him, nor let him eat or drink of fix hours after; and at night give him a sweet Mash, or White water, and let his Rack meat be sweet Wheat-straw, Oats and Bran; the next day let him blood, and prick him in the third Furrow of his Mouth, and if his blood be bad, take two quarts from him, but if good scarce a quart ; keep him warm, and give him sweet Mashes or White water, and put into his Drink either the powder of Brimstone or of Fenygreek, or Turmerick, or of Elecampana, one or more together, according a he will be brought to like and take them; which being well mixed, put thereof into his Drink a spoonful at a time. And this is very good to cool the blood, purge Choller, and other peccant humours, and to purifie and refine the Blood. And this is not only good for Horses newly taken from Grass, but for other Ack, furfetted , difeafed Horfes.

5 4

CXCIX.

CXCIX. An other Purge.

Take one ounce and a quarter of Gentian, slice it thin, boyl it in a quart of Beer till it come to a pint, and give it him blood-warm; It will make him very sick for a short time, but you need not fear, for it will do him much good; let him fast after it five or six hours, and then give him a Mash or White water, and the next

day give him this following.

Mingle Honey with his Oats, and rub the Hony and Oats well together between your hands, and continue thus doing till you fee him quite cured, which will be when he hath done running at the Nose. This is one of the best Cordials I know, for it dispierseth all Flegme and Choller, it purgeth the Head and Brain, it purifieth the Blood, it venteth evil Humours, it causeth good Digestion, and freeth an Horse from Glanders, Colds, Catarrhs, Rheums, running at the Nose, and the like, as you may fee fet down before, which is the same with this; this and the Purge before going, you must give one after another, And for the Hony and his Oats mixed together, I conceive you may give them in other causes ; as when an Horse is troubled with cold Rheums, running at the Nofe, Glanders, Flegme, or Choler, or fuch like.

CC. Of Glisters and their use. De gray

A Glister is given as a preparative to a purging Drink, and a Glister by cleansing the flice

ng

the Guts refresheth the Vital parts, and prepareth the way before; wherefore I advise every Farrier before they give a Drink, whether purging or otherwise, if the Horse be not at that time soluble in body; That after Bloodletting, the next day he give a Glifter, this done he may the better give what is requifite ; otherwise if he give the Drink before the Glifter, he may stir and provoke the evil humours, which by reason of much costiveness and Wind, and other impediments in his Guts. do attempt to make their passage by a contrary way, which cannot be done without great hapard to the life of the Beaft. I therefore advise if the beaft be costive and bound in his body, to give a Suppository or Glister first, and after his Purging drink.

CCI. What a Decoction is. Que gray

A Decoction, is a Broath made of divers Endent Herbs; as Mallowes, Marsh-Mallowes, Pellitory, Camomile, and sometimes white Lilly roots, and such like things, which we do boyl in water to a third part, and sometimes we use instead of herbs and water, to take the fat of Beef-broth, or the Broth of a Sheeps head, Milk, Whey, or some such kind of Liquor.

CCII.

esneth the Vital parts, and propa-

CCII. What quantity of Broath or Decoction is put in to make a Glister. 9e gray

to the Age, strength and greatness of the Horse; for if he be of a strong and able body, of large growth and stature; fat and lusty, in this case we put in three pints; but if he be of a small growth, weak, sick, seeble, or lean, in this case a quart is enough; we use to put in half a pint of oyl, of Salt two or three drams, and sometimes we put in Verjuyce; and sometimes Hony, as we see cause: Drugs we use, as Sena, Cassia, Agarick, Anniseeds, oyl of Dill, oyl of Comomile, oyl of Violets, Sugar-candy and such like.

CCIII. For the quantity of Drugs put into a Glister. De gray

Por the quantity of Drugs, you ought not to exceed the quantity of three ounces in one Glister at the most, neither put in above four ounces of Butter, and let it be but bloodwarm when you administer it.

CCIV. What time is fit for an Horse to keep his Glister. De grey

W Hen you give it him let him be empty, and before he do receive it Rake him: After you have given it him let him keep it half

an

he keep it the more good it will do him, hold his Tail clove to his Fundament all the while.

CCV! The length of the Glifter-Pipe. De fray

The best Instrument wherein to give an Horse a Glister, is a Pipe made of purpose, which ought to be twelve inches in the Shank, which must also be put home: And when the Glister is put into his body, then draw away the Pipe by degrees not all at once.

CCVI. A Glister for a Horse that is bound in his body and cannot dung. De yay

Ake the fat of Beef-broath, (if he be fick. weak and lean) a pint and a half is enough, if he be big, fat and lufty, you may put in two or three pints, put to it half a pint of English. hony, and two drams of white Salt, mix them well together, and administer it Clister wise blood-warm, then clap his Tail close to his Tewel for half an hour or longer, and if then it do not work as I am confident it will, ride him up and down a gentle trot for half an hour more, but not till he sweat, then set him up warm cloathed and littered; and let him stand upon the Bit four or five hours, in which time he will purge kindly, then unbit him and give him fweet Hay, and an hour after after that, give him White water, and he may drink any cold water in a day or two after, and this is the best cure for this Malady. This Glifter will open and loofen the body,

ON

ng

he

In'

2

n.

lf d

d

dy, bring away all offensive humours, remove all obstructions ingendred in the body by means of excessive hear, it cleanseth the Guts, and purgeth away all slimy substance. And this you will find to be the best remedy for a Horse that is co-stive and bound in his body, and that cannot dung. This hath been often Proved.

CCVII. For another Glifter. 90 fry

TAke two handfuls of Melilot, two handfuls of Pellitory, if you can get neither of them, then take two handfuls of Camomile, but Pellitory is the best if it can be gotten, boyl any one of these in a Decoction of water to a third part, then add to it of Sallet oyl and of Verjuyce of each half a pint, of Hony four ounces. of Caffia two ounces, mix all these together and administer it luke-warm, and order him as in the first Glifter. It will open the Gut and Body very well, and will take from him all hurtful and offensive humours. It will carry away all Spungy matter. It will alay the billioufness and sharpness of humours , cleanse inward Ulcers , and much refresh and comfort the vital spirits : But if you find that by giving too great a quantity, your Horse purgeth and scoureth, longer or more violently than you think is meet and good, or for fear it should ftir up in him more bad humours upon the fudden, then you may eafily allay it with this following Glifter.

CCVIII.

CCVIII. A Glister restringent to stop De grey looseness.

Ake of the Decoction in the Glister aforegoing a pint, and put thereto as much Cows
Milk as it cometh warm from the Cow, and put
also thereto the yolks of three new laid Eggs,
well beaten and mixed together, and give it
blood warm: This Glister is only to be given
to a Horse that is very laxative or doth empty
himself too much, which is occasioned oft times
by over much debility or want of strength, or
when nature is very much offended; You may
give this Glister as often as need shall require,
and till you see his looseness stop.

CCIX. A Glister for a fat foul-bodied Horse, that is newly taken from Grass, or for as ny sick, surfetted, diseased Horse. Delay

Take three handfuls of Marsh-Mallow roots cleansed and bruised, Violet leaves of each two handfuls, Flax seed three spoonfuls, the Cloves of white Lilly roots a small handful, boyl all these together in fair water, from a gallon to a Wine-quart, then strain it, and put thereto of Sena one ounce, which must be steeped in the Liquor three hours standing upon the hot Embers, then put thereto half a pint of Sallet oyl, and being blood-warm administer it Glisterwise, causing him to keep it above half an hour. And the best time to give this, is three or four dayes before the Full or Change of the Moon,

of

or-

rd

rs,

ie.

y

)-

d

t

yet it may be given with much benefit at any other time. This Glister purgeth the Guts abundantly, and is chiefly to be given to an Horse that is newly taken from Grass.

CCX. A Glifter for Melancholly. 9 hy

This purgeth Melancholly, it caufeth a good Appetite which before was wanting, it refresheth the dulled Spirits, and caufeth a good Digestion, if the Horse be kept warm and well tended.

CCXI. A Glister to be given in case of a desperate Sickness: It helpeth Feavers; is
good against the Pestilence and all languashing Diseases, most excellent against
Surfets either by Provender or otherwise:
And will give great strength in short time,
if it be rightly made and carefully given.

newly taken from Craft, or for as

TAke of the oyl of Dill, oyl of Camomile, oyl of Violets, and Cassia, of each half an ounce, of brown Sugar-candy in powder three ounces: Then take of Mallow leaves a handful, and boyl them first to a Decoction in fair water, then strain it and put thereto the before-named

ingre-

in

m

Si

ingredients and give it blood warm. This is most soveraign to be given in case of a desperate sicknes, and for all the Diseases afore-mentioned.

CCXII. A Glister for the Pestilence and all

Take half an ounce of the pulp of Coloquintida the feeds and rind taken away, of Gum dragant three quarters of an ounce, boyl all these in three quarts of water to a quart with Centory and Wormwood, of each half an handful, and a quarter of an ounce of Castorium, strain it and dissolve it into the Decoction of Gerologundinum three ounces, and of white salt three drams, and of Sallet oyl half a pint, and then administer it Glister-wise blood warm, this hath been often proved to be most excellent good for the Diseases above mentioned.

CCXIII. A Lenative Glister. De groy.

Take the Decoction of Mallowes and put to it either of fresh Butter four ounces, or of Sallet oyl half a pint, and give it Glister, wise blood warm; this is the gentlest Glister of any before prescribed, for it is both a loosener, and a great cooler of the body, and doth infinitely tase pain. Also is good for Convulsions or Cramps, and most singular against costiveness, proceeding from any sickness or surfer by Provender or Foundring in the Body.

CCXIV.

CCXIV. A Glifter for the Collick or any Sickness or Gripings in the Gits or Belly. Deling

Take Salt water or new made Prine two pints, dissolve therein a pretty quantity of Sope, and administer it Glister-wise blood warm; this is averred to be the most excellent for the Collick, or any Sickness or griping in the Guts.

CCXV. of sickness in Horses. Defray

CIcknesses in general are of two forts; One O offending the whole Body, the other a particular Member ; The first of them not visible; The other apparent, and known by its own demonftrations. Of the first then, which offends the whole Body, as Feavers of all forts , the Quotidian, Tertian, Quartan, and Hectick, Feavers Pestilential, Feavers accidental, or the general Plague, are known by these signes ; much trembling, panting, sweating, and fallow countenance, hot breath, faintness in labour, decay in homack, costiveness in the body, any or all of which when you perceive; First let the Horse blood, and then give him Treacle; Take of Celendine roots and leaves a good handful, as much of Wormwood, as much of Rew, wash them well and then stamp them in a Mortar, which done boyl them in a quart of Ale, then ftrain them, and add to the Liquor half a pound of fweet Butter then being luke-warm, give it to the Horse to drink.

00

C

ce

CCXVI. Of the Head-ach, Frenzy, or Staggers.

The Signes to know these Diseases, which are all of one Nature, and all of one effect Mortal, hanging down of the head, reeling; The Cure is, to let the Horse blood three mornings together, after walk him a while, then cloath him, cover his Temples over with a plaister of Pitch, and keep him exceeding warm, let his meat be little and his Stable dark.

CCXVII. Of the Sleeping evil.

The Sleeping-Evil or Lethargy in Horses, proceeds from cold Phlegms, moist humours which bind up the vital parts, and make them dull and heavy: The signes are, continual sleeping or desire thereunto. The Cure is, to keep him much waking, and twice in a Week to give him as much sweet Sope as a Ducks Egg in the nature of a Pill, and after give him to drink new Milk and Honey.

CCXVIII. Of the Falling Evil, Planet struck, Night-Mare, or Palsey.

A Lthough these Diseases have several faces, and look as if there were much difference between them, yet they are in nature all one, and proceed all from one offence, which is only told Phlegm, thick humours ingendred about the Brain, and benumming the Senses, weakning the

the members sometimes causing the Horse to fall down, and then it is called the Falling-Evil, fometime weakning but one Member only, and then it is called Planet-struck, sometimes oppressing a Horses stomack and making him sweat in his sleep, and then it is called the Night-mare, fometimes spoyling one special Member by by some strange contraction, and then it is cal-The Cure for any of these inled the Palfey. firmities, is to give the Horse this purging Pill: Take of Tar three spoonfuls, of sweet Butter the like quantity, beat them well together with the powder of Liquorish, Anniseeds and Sugar-candy till it be like a Paist, then make it into three round Balls, and put into each Ball two or three Cloves of Garlick, and give them to the Horse, observing to warm him both before and after, and keeping him fasting two or or three hours both before and after.

CCXIX. Of the general Cramp, or Convulsion. of Sinews.

Ramps are taken to be the contracting or drawing together of Sinews of any one member, but Convulsions, are when the whole body, from the setting on of the head to the extreamest parts, are generally contracted or stifned. The Cure of either, is first to chase and rub the member contracted with Vinegar and common oyl, and then wrap it all over with wet Hay, or rotten Litter, or else with woollen Clothes, either of which is a present remedy.

CCXX,

h

275

or dry, or for any Confumption or Putrifaction of the Lungs what soever.

A Cold is got by unnatural Heats and too fudden cooling, and these Colds ingender Coughs, and these Coughs putrisaction, and rotteness of the Lungs: The Cure therefore for them all in general, is to take a handful or two of the white and greenest Moss, which growes upon an old Oak, or any old Oken Pale or Wood, and boylit in a quart of Milk till it be thick, and being cold and turned to a jelly, then strain it and give it to the Horse luke-warm every morning, till his Cough ceaseth.

ing of the Chine. Maylor Perice

Ake of Auripigmentum two drams, of Tuf-Auripigmentum two drams, of Tuf-Auripigmentum two drams, of Tuf-Auripigmentum two drams, of Tuf-Auripigmentum two making them together with Turpentine till they Justante be like Paift, and making thereof little Cakes, and the them before the fire, then take a Chafing-dish of Coles, and laying one or two of the Cakes thereon covering them with a Tunnel, and when the smoke ariseth, put the Tunnel into the Horses Nostrils, and let the smoak go upinto his head, which done ride him till he sweat; do this once every morning before he be watered, till the Running at his Nostrils cease, and the Kernels under his Chapps be lessened.

UMI

IATINIQ:

of the Flesh.

I Ide-bound or Consumption of the Flesh, proceedeth from unreasonable travel, disorderly Diet, and many Surfets. It is known by a general dislike and leaness over the whole body, and by the sticking of the skin close to the body in such fort, that it will not rise from the body: The Cure is, first to let the Horse blood, and then to give him to drink three or four mornings together a quart of new Milk, with two spoonfuls of Honey, and one spoonful of coarse Treacle; Let his food be either sodden Barley, warm Grains, and Salt or Beans splitted in a Mill, his Drink Mashes.

CCXXIII. Of the Breast-pain or any other sickness proceeding from the heart, as the Antocom and such like.

These diseases proceed from too rank seeding and much fatness, the signes are; A faltering in his fore-legs, a disableness to bow down his neck, and a trembling over all his body: The Cure is to let him blood, and to give him two Mornings together, two spoonful of Diapente in a quart of Ale and Beer, for it alone putteth away all insection from the heart.

CCXXIV.

CCXXIV. Of Tyred Horses.

If your Horse be tyred in journeying, or in a-ny Hunting-match, your best help for him. is to give him warm Urine to drink, and let him blood in the Mouth to Suffer him to lick up and to swallow the same; then if you come where a. ny Nettles are, to rub his Mouth and sheath well therewith, then gently to ride him till you come at the resting place, where set him up very warm, and before you go to bed give him fix spoonfuls of Aqua-vitæ, and as much Provender as he will eat, the next morning rub his Legs with Sheeps-feet oyl, and it will bring fresh nimbleness to his Limbs.

CCXXV. Of Diseases in the Stomack, as Surfets, loathing of Meat or Drink.

IF your Horse with the glut of Provender, or eating raw food, hath given fuch offence to his stomack that he casteth up all he eateth or drinketh, you must then give him comfortable things, as Diapente or Trephenicon in Ale or Beer, then keep him fasting; Let him have no food but what he eateth out of your hand, which would be Bread well baked, Oats, and after two or 3 bitts, a Lock of sweet Hay, and his Drink should be only new Milk, till his stomack have gotten strength, and in a bag you shall continually hang at his Nose, sower brown bread steeped in Vinegar, at which he must ever smell, and his stomack will quickly come again to his first strength. CCXXVI. of Foundring in the Body.

Poundring in the Body is of all Surfets the mortallest and soonest gotten; It proceedeth from intemperate riding an Horse when he is fat, and then suddenly suffering him to take cold, and there is nothing sooner brings this infirmity, then washing a fat Horse: The signes are sadness of Countenance, Staring hairs, stifness of Limbs, and loss of Belly: The Cure is only to give him wholsom meat, and bread of clean Beans, and warm drink, and for two or three mornings together, a quart of Ale brewed with Pepper and Cinamon, and a spoonful of Treacle.

CEXXVII. Of the Hungry-Evil.

The Hungry Evil is an unnatural and overhasty greedines in an Horse to devour his meat faster than he can chew it, and is only known by his greedy snatching at his meat as if he would devour it whole: The Cure is, to give him to drink Milk, and Wheat meal mixed together a quart at a time, and to feed him with Provender, by little and little till he forsake it.

CCXXVIII. Of the Diseases of the Liver, as Instantions, Obstructions, and Consumptions.

The Liver which is the Vessel of Blood, is subject to many Diseases, according to the distem-

distemperature of the Blood; and the Signes to know it, are a stinking Breath, and a mutual looking towards his body. The Cure is, to take Aristolochia longa, and to boyl it in running water till half be consumed, and let the Horse drink continually thereof, and it will cure all evils about the Liver.

CCXXIX. Of the Diseases of the Gall, and specially of the Yellows.

Rom the over-flowing of the Gall, which is the Vessel of Choller, spring many mortal Diseases, especially the yellowes, which is an extream faint mortal Sickness, if it be not prevented in time: The Signes are, yellowness of the Eyes and Skin, and chiefly underneath his his upper Lip next to his fore-teeth, a fuddain and faint falling down by the high-way, or in the Stable, and an universal sweat over all his body : The cure is, first to let the Horse blood in the Neck or Mouth, or under the Eyes, then take two peny-worth of Saffron, which being dried and made into fine powder, mix it with fweet Butter, and in manner of a Pill, give it in Balls to the Horse three mornings together; Let his drink be warm, and his Hay sprinkled with Water.

CCXXX. Another for the same-

pint or more, take off the Curd clean, then take two ounces of Castel-sope, pare it in thin small slices, and boyl it in the Posset drink about a quarter of an hour, then when it is but lukewarm give it the Horse to drink, then take his back and ride a gentle pace an hour together, set him up warm: This hath been often tried upon Christians as well as Horses, they taking and walking and stirring upon it an hour or more, taking it but two mornings together; it never fail'd of curing those that had been so far spent with it, that they have been given over by all men.

CCXXXI, Of the sickness of the spleen.

The Spleen which is the Vessel of Melancholly, when it is over-charged therewith, groweth painful, hard and great, in such sort, that sometimes it is visible: The signes are, much groaning, hasty feeding, and a continual looking to the lest side onely. The Cure is, take Agrimony, and boyl a good quantity thereof in the water the Horse shall drink, and chopping the leaves small, mix them with sweet Butter, and give the Horse two or three good round Balls thereof in the manner of Pills.

CCXXXII. Of the Dropsie, or evil Habit of the Body.

The Dropsie is an evil Habit of the Body, which is ingendred by Surfets, and unreafonable labour, altereth the colour and complection Aion of the Horse, and canngeth the hairs in such an unnatural sort, that a man shall hardly know the Beast with which he hath been most familiar. The Cure is, to take a handful or two of Wormwood, and boyl it in Ale or Beer a quart or better, and give it the Horse to drink Luke-warm morning and evening, and let him drink his water at Noon.

CCXXXIII. Of the Collick, Belly-Ach, or Belly-bound.

The Collick or Belly-ach, is a fretting, gnawing, or swelling of the Belly or great Bag, proceeding from windy humours, or from eating of green corn or pulse, hot grains without Salt or Labour, or bread Dow-baked: And Bellybound is when a Horse cannot Dung: The cure of the Collick or Belly-ach is, to take good store of the herb Dill, and boyl it in the water that you give the Horse to drink, but if he cannot dung, then you shall boyl in his Water good store of the herb Furmitory, and it will make him dung without danger or hurting.

CCXXXIV. Of the Laskor Bloody: Flux.

The Lask or Bloody-Flux, is an unnatural Looseness in a Horses body, which being not stayed, will for want of other Excrements make a Horse void blood only. The Cure is, to take a handful of the herb Shepheards-purse, and boyl it in a quart of strong Ale, and when it is Lukewarm take the Seeds of Woodroof, stamp

stamp them and put them in, and give it the Horse to drink,

CCXXXV. Of the falling out of the Fundament.

This cometh through infinite mislike and weakness. The Cure is, take Town Cresses, and having dried them to powder, with your hand put up the Fundament and then strow the powder thereon, after it lay a little Honey thereon, and then strow more of the powder with the powder of Cummin, and it helpeth.

CCXXXVI. Of Botts and Worms of all forts.

The Botts and gnawing of Worms is a grievous pain, and the Signes to know them are; the Horses oft beating his Belly, and tumbling and wallowing on the ground, with much desire to lye on his back: The cure is; take the seeds bruised of the herb Ameos, and mix with it honey and make two or three Balls, and make the horse swallow them down.

CCXXXVII. Of Pain in the Kidneys, pain to Piss, or the Stone.

A LL these Diseases spring from one ground, which is only Gravel and hard matter gathered together in the Kidneys, and so stopping the conduits of the Urine: The Signes are, that the Horse will only strain to piss, and that often, but cannot, The cure is to take a handful of

of Maiden hair, and steep it all night in a quart of strong Ale, and give it the Horse to drink every morning till he be well: This will break any stone whatsoever in a Horse.

CCXXXVIII. of Piffing Blood.

This cometh with over travelling a Horse, or travelling him fore in the Winter when he goeth to grass. The Cure is, take Aristolochia Longa and boyl in a quart of Ale, and give it the Horse to drink Lukewarm, and give him also rest.

CCXXXIX. of the Strangullion.

This Disease is a soreness in the Horses Yard, and an hot burning when he pisseth: The Signes are, he will piss oft yet but a drop or two at once: The cure is, to boyl in the water he drinketh good store of the herb Hogsennel, and it will cure.

CCXL. Of the Colt-Evil, Muttering of the Tard, Falling of the Tard, shedding of the Seed.

A LL these Evils proceed from much Lust in a Horse, and the Cure is the powder of the herb Avens, and the Leaves of Betoney, stamp them well with Whitewine to a moist Salve and anoint the Sore therewith, and it will heal all impersections of the Yard: But if the Horse shed his seed, then beat Venice Turpentine

284

pentine and Sugar together, and give him every Morning a good round Ball thereof, till the Seed stay.

CCXLI. Of the particular Diseases in Mares, as Barrenness, Consumption, rage of Love, casting Foles, bardness to Fole: And how to make a Mare cast her Fole.

IF you would have a Mare barren, Let good ftore of the herb Agnus Castus be boyled in the water she drinks : If you would have her fruitful then boyl good store of Motherwort, in the water: If the lose her Belly, which sheweth a Consumption of the Womb, you shall then give her a quart of Brine to drink, Mugwort being boyled therein : If your Mare through high keeping, grow into extream Luft, fo that the will neglect her food through the violency of fleshly appetite, as it is often feen amongst them, you shall house her for two or three dayes, and give her every morning a ball of Butter and Agnus Castus chopt together : If you would have your Mare cast her Fole, take a handful of Betany and boyl it in a quart of Ale, and it will deliver her presently: If she cannot Fole, take the herb Horse-mints, and either dry it or stamp it, and take the powder or the juyce, and mix it with strong Ale, and give it the Mare and it will help her : If your Mare from former bruifes or strokes, be apt to cast her Foles, as many are, you shall keep her at Grass very warm, and once a Week give her a warm Mash of drink, this fecretly knitteth beyond expectation. CCXLII.

CCXLII. Of drinking Venome, as Horse-Leeches, Hens. Dung, &c.

If your Horse have drunk Horse-leeches, eaten Hens-dung, Feathers, or such like venemous things, which you shall know by his panting, swelling or scowring; you shall take the herb Sowthistle, and drying it beat it into powder, and put three spoonfuls thereof into a pint of Ale, and give it the Horse to drink.

CCXLIII. Of Suppositories, Glisters, and Purgations.

d

c

of

d

d

d

f

11

e

X

t

IF your Horse by Sickness, strict Diet, and too vehement Travel, grow dry and costive in his Body, as it is ordinary, the easiest means in extremity to help him, is to give him a Suppolitory: The best of which is to take a Candle of four in the pound, and cut off five inches at the bigger end, and thrusting it up a good way into his Fundament, presently clap down his Tail and hold it hard to his Tewel, for a quarter of an hour, or half an hour, and then give him liberty to dung : But if this be not strong enough, then you shall give him a Glister. And that is, Take four handfuls of the herb Annise, and boyl it in a pottle of running water till half be confumed, then take the Decoction and mix it with a pint of Sallet oyl, and a pretty quantity of Salt, and with a Glister pipe give it him at the Tewel. But if it be too weak, give him a Purgation thus: Take twenty Raisins of the Sun stoned, and ten Figs

Figs slit, boyl them in a pottle of running water till it come to a jelly, then mix it with the powder of Liquorish, Anniseeds, and Sugarcandy, till it be like Paist, make it into Balls, and roul it in Iweer Butter, and so give it the Horse to the quantity of three Hens Eggs.

CCXLIV. of Neefings and Frections.

Here be two other excellent helps for fick Horses, as Frections and Neelings; The first to comfort the outward parts of the Body, when the vital powers are astonished, the other to purge the head when it is stopt with slegme, cold, and other thick humours. And of Frections, the best is Vinegar and patch Grease melted together, and very hot chased into the Horses Body against the bair: And to make a Horse Neese, there is nothing better than to take a bunch of Pellitory of Spain, and tying it to a slick put it up into the Horses Nostrils, and it will make him Neese without hurt or violence.

CCXLV. Of the Diseases in the Eyes, as watery Eyes, blood shotten Eyes, Dim Eyes, Moon Eyes, Strokes on the Eyes, Warts in the Eyes, Inflamation in the Eyes, Pearl, Pin, Web, or Haw in the Eye.

Nto the Eye belongeth many Diseases, all which have their true Signes, and their Names; And as touching that which is watery, blood shotten, Dim, Moon-stricken or Inflamed.

med, they have all one cure. Which is, to take Wormwood, beat it in a Mortar with the Gall of a Bull, strain it and anoint the Horses Eyes therewith, and it is an approved Remedy: But for a Wart, Pearl, Pin or Web, which are Evils growing in or upon the Eyes, to take them off; take the juyce of the herb Betony, and wash his Eyes therewith, and it will wast them away: For the Haw every Smith can cut it out.

CCXLVI. Of the Impostume in the Ear, Poul-Evil, Fistula, Swelling after Blood-letting, any Gauled Back, Canker in the Withers, Setfast, Wens, Navel Gaul, or any hollow Olcer.

These Diseases are so apparent and common, that they need no other Description but their Names, and the most certain Cure is, to take Clay off a Mud or Loam wall strawes and all, and boyl it in strong Vinegar, and apply it Plaister-wise to the Sore, and it will of its own nature search to the bottom and heal it, provided that if you see any dead or proud sless arise, that then you eat or cut it away.

CCXLVII. Of the Vives. Markhum

The Vives, which is an Inflamation of the Kernels between the Chap of the Neck of the Horse, Take a peny-worth of Pepper, Swines grease a Spoonful, the Juyce of a handful of Rew, Vinegar two Spoonfuls, mix them toge-

·

together, and then put it equally into both the Horses Ears, then tye them up with two flat Laces, shut the Ears that the Medicine may go down, which done let the Horse blood in the Neck and in the Temple Veins, and it is a certain Cure.

CCXLVIII. Of the Strangle, or any Boyl or Botch, or other Impostume whatsoever.

A LL these Diseases are of one nature, being only hard Boyls or Impostumes, gathered together by evil humours either between the Chaps or elsewhere on the Body. The Cure is, take Southernwood and dry it to powder, and with Barley-meal and the yolk of an Egg make it into a Salve, and lay it to the Impostume, and it will ripen it, break it, and heal it.

CCXLIX. Of the Canker in the Nose, or any other part of the Body.

To heal any Canker in what part soever it be; Take the Juyce of Plantain, as much Vinegar, and the same weight of the powder of Allom, and with it anoint the Sore twice or thrice a day, and it will kill it, and cure it.

CCL. Of Stanching of Blood, whether it be at the Nose, or proceeding from any Wound.

I F your Horse bleed violently at the Nose, and you cannot stanch it, then you shall take Betony

tony and stamp it in a Mortar with Salt, and put it into the Horses Nose, or apply it to the wound and it will stanch it; but is the be suddenly taken in riding by the High-way, or otherwise, and cannot get this herb, you shall then take any woollen Cloth, or any Felt hat, and with a Knife scrape a fine Lint from it, and apply it to the place bleeding and it will stop.

CCLI. Of Pain in the Teeth, or loofe Teeth.

or any pain in the Teeth, take Betony, and fethe it in Ale or Vinegar till half be confumed, and wash all the Gums therewith; but if they be loose, then only rub them with the leaves of Enulacampana, or Horse holm, after they have been let blood, and it will fasten them.

CCLII. Of Diseases in the Mouth, as bloods Rifts, Liggs, Lampras, Camery, Instamation, Tongue hurt, or the Barbes.

IF you find any infirmity in the Horses mouth, as the bloody Rists, which are Chops or Rists in the Pallat of the Horses mouth; The Liggs, which are little Pustola's or Bladders within the Horses Lips: The Lampras, which is an excressence of slesh above the teeth: The Camery, which are little Warts in the roof of the Mouth: Instamation, which is little Blisters; Barbes which are two little Papps under the Tongue: Or any hurt on the tongue by the Bit or otherwise: You shall take the leaves of Wormwood, and the leaves of Shurewort, and beat them in a

90 Approved Receipts

Mortar with a little Honey, and with it anoint the Sores, and it will heal them: As for the Lampra's they must be burned.

CCLIII. Of the Crick in the Neck.

For the Crick in the Neck, you shall first chase it with the Friction, mentioned in Receipt CCXLIV, and then anoint and bath it with Sope and Vinegar mixed together.

CCLIV. Of the falling of the Crest, Manginess in the Main, or the shedding of the Hair.

A LL these Diseases proceed from Poverty, Missike, or over-Riding; And the best Cure for the falling of the Crest is blood-letting, or good keeping with good store of meat, for strength and fatness will ever raise the Crest: But if the Main be Mangy, you shall anoint it with Butter and Brimstone: And if the Hair fall away, then take Southernwood and burn it to Ashes, then take the Ashes and mix them with common oyl, anoint the place therewith, and it will bring Hair presently; both smooth, thick, and fair.

CCLV. Of Pain in the Withers.

A N Horses Withers are subject to many Griefs and Swellings, which proceed from cold humours, sometimes from bad Saddles, therefore if at any time you see any Swellings about

V

(

2

if

ir

h

O'

fte

about them, you shall take the herb Hartstongue, and boyl it with oyl of Roses, and apply it very hot to the Sore, and it will asswage ir, or else break it and heal it.

CCLVI. Of Swaying the Back, or weakness in the Back.

These two infirmities are very dangerous, and may be eased, but never absolutely cured, therefore where you find them. Take Coleworts and boyl them in oyl, and mix them with a little Bean flower and chase it into the Back, and it will strengthen it.

Scab or Manginess; or of the Farcy.

Tor any of these Diseases, take fresh Grease and yellow Arsenick, mix them together, and where the Manginess or Itch is, there rub it hard in, the Sore being made raw before; But if it be for the Farcine, then with a Knife slit all the Knots, both hard and sost, and then rub in the Medicine; which done, tye up the Horse so that he may not come to bite himself, after he hath stood an hour or two, take old Piss and Salt boyled together, and with it wash away the oyntment, and then put him to meat: Do this two or three dayes together; Provided always, that you first let the Horse blood, and take good store from him, and give him every Morning a strong

es,

gs ut strong Scouring, or a strong Purge, both which are shewed before.

CCLVIII. Of Foundring in the Feet.

There be two forts of Foundring, a dry and a wet; The dry is incurable, the wet is thus to be cured or helped; First, pare all the Soles of his Feet, so thin that you may see the quick, then let him blood at every Toe, and let him bleed well, then stop the Vein with Tallow and Rosin, and having tackt hollow Shooes on his Feet, stop them with Bran, Tar, and Tallow, as boyling hot as may be, and renew it once in two dayes for a Week together, then Exercise him much, and his Feet will come to their true use and nimbleness.

CCLIX. Of any Haulting which cometh by Strain or Stroke, either before or behind, from the Shoulder or Hip down to the Hoof.

There are many Infirmities which make an Horse halt, as pricking the Shoulder, a wrench in the Nether-joynts, splatting the Shoulder, Shoulder-pight, strains in Joynts and such like: All which, since they happen by one accident, as namely by the violence of some slip or strain so they may be cured by one Medicine, and it is thus. After you have sound where the Grief is, as you may do by griping and pinching every several member, and there where he most complaineth, there is his most pain and grief; you shall take Vinegar, Bole-Armoniack,

Armoniack, the whites of Eggs, and Beanflower, and having beaten them into a perfect Salve, lay them very hot to the fore place, and it will cure it.

CCLX. Of the Splent, Curb, bone Spavin, or any Knob, or boney Excression, or Ring-bone.

Splent is a Boney Excression under the Knee or the Fore-Leg. The Curb is the like behind the hinder Hough. The Spavin is the like on the in-side of the hinder-Hough; And the Ring-bone is the like on the Corner of the And the Cure is, first upon the top of the Exeression make a slit with your Pen-knife, the length of a Barley-corn or little more, and then with a fine Cornet raise the skin from the bone, and having made it hollow the compass of the Excression and no more, take a little Lint and dip it into the oyl of Origanum, and thrust it into the hole, and cover the Knob, and so let it abide till you see it rot, and that Nature casteth out both the Medicine and the Core : As for the Ringbone, you shall need to do no more but scarifie it, and anoint it with the Oyl only.

Scratches, Mellet, Mules, Crown Scabs, and such like,

For any of these you shall take Verdigrease, and soft Grease, and grind them together V3 to

he nd ne ne

end ng

re oft e•

k,

1.18

Then take Wax, Hogs-grease and Turpentine, of each alike, and being melted together, put this Salve into another Box, then when you come to dress the fore, after you have taken off the Scab and made it raw, you shall anoint it with the green Salve of Verdigrease, and fresh Grease only for two or three dayes; it is a sharp Salve, and will kill the Cankerous humour. Then vhen you see the Sore look fair, you shall take two parts of the yellow Salve, and one part of the green Salve, and mix them together, and anoint the Sore therewith till it be vehole, making it stronger or weaker, as you shall find occasion.

CCLXII. Of any Upper-Attaint, or Nether-Attaint, or any burt by Over-reaching.

These Attaints, are Strokes or Knots, by or ver-reaching; either on the back Sinew of the Fore-leg, on the Heels or nether-joynts, and may be healed safely by the same former Medicine, which healed the Malander or Selender in the former Receipt; Only for the over-reaches, you shall before you apply the Salve, lay the fore plain open without hollowness, and vvash it vvith Beer and Salt, or Vinegar and Salt.

CCLXIII. of Wind Gauls.

These are little Blebs or small soft swellings on each side the Foot-lock, procured by much much travel on hard and stony wayes: The Cure is, to prick them and let out the Jelley, and then dry the Sore with a plaister of Pitch.

CCLXIV. Of Interfering or Shackle gauls, or any Gaulings.

Interfering, is hewing one Leg against another, and striking off the skin; It proceedeth from weakness, and straitness of the Horses pace, and Shackel-gawling is any gawling under the Footlock: The Cure is, to anoint them with Turpentine and Verdigrease mixed together, or Turpentine alone if it rankle not too much.

Quarters, Loose Hoofs, and Hoof bound, Hoof-running, Hoof brittle, Hoof hurt, Hoof soft, Hoof hard, or generally to preserve Hoofs.

The Hoof is subject to many Infirmities; As first, to half-quarters, which cometh by pricking, and must be helpt by good shooing, where the Shooe must bear on every part of the Foot but upon the half quarters only. If the Hoof be loose, anoint it with Burgundy Pitch, and it will knit it; if it be clean cast off, then Burgundy Pitch and Tallow moulten together, will bring a new; if it be bound or straitned, it must be well opened at the Heels, the Sole kept moist, and the Cronet anointed with the fat of Bacon and Tar; if the Frush of the Foot run V 4

4

with stinking matter, it must be stopped with Soot, Turpentine, and Bole-Armoniack mixed together; if it be brittle and broken, then anoint it with Pitch and Linseed oyl moulten to a soft Salve; if it be soft, then stop it with Sope and the Ashes of a burnt Felt mixed together; if the Hoofs be hard, lay hot burnt Sinders upon them, and then stop them with Towe and Tallow. And generally for the preserving of all good Hoofs, anoint them daily with the Sward of Bacon.

CCLXVI. Of the Blood Spavin, or Houghboney, or any other unnatural Swelling; from what cause soever it proceedeth.

THefe two are Pustoles, or foft round Swellings; the first is of the inside of the hinder Hough, and the other on the very huckle of the Hough, they are foft and very fore: The Cure is, first to binde up the Vein above, and let it blood only from below, then having tied it fast with two Shoomakers ends on both fides, then flit the Vein in two peices, then take Linfeed and bruife it in a Mortar, mix it with Cow dung, and heat it in a frying pan, and fo apply it to the swelling only, and if it break and run, then heal it with a plaister of Pitch, and the Horse will never be troubled with the Spavin more. But if the Swelling come by strain or bruise, then take Patch-greafe and melt it, anoint the Sore therwith, holding a hot Iron near it to fink in the Grease, then fold a Linnen cloth about it, and it will asswage all Swellings whatsoever,

CCLXVII.

CCLXVII. Of Wounds in the Feet, as Gravelling, Pricking, Fig, Retrait, or Cloying.

IF your Horse have any wound in his Foot, by what mischance soever, you shall first search it, to see if it be clear of any Nails point, or other Splent to annoy it, then wash it very well with White-wine and Salt, and after tent it with the oyntment called Ægyptiacum, and then lay hot upon the tent, Flax or Hards, with Turpentine oyl and Wax mingled together, and anoint all the Hoof on the top and Cornet, with Bole-Armoniack and Vinegar, do this twice in a day till the sore be whole.

CCLXVIII. Hurts on the Cronet, as the Quitterbone or Matlong.

The Quitterbone, is a hollow Ulcer on the top of the Cronet, and so is the Matlong. And the Cure is, first to tent it with Verdigrease till you have eaten out the Core, and made the wound clean, then you shall heal it up with the same Salve that you heal the Scratches.

CCLXIX. To draw out a Stub or Thorn.

Take the herb Ditaney, and bruise in a Mortar with black Sope, and lay it to the Sore, and it will draw out the Splint, Iron or Thorn.

CCLXX.

d

nt

d

he

ı,
id

lt

d

e

CCLXX. Of the Anbery, or Tetter.

The Anbury is a bloody Wart on any part of the Horses body, and the Tetter is a Cankerous Ulcer like it. The Cure of both, is an hot Iron, to sear the one plain to the Body, and to scarifie the other; then take the juyce of Plantain and mixit with Vinegar, Honey, and the powder of Allom, and with it anoint the Sore till it be yvhole.

CCLXXI. of the Cords or String-balt.

This is an unnatural binding of the Sinews, which imperfection a Horse brought into the world with him, and therefore it is certain it is incurable, and not painful but an Eye sore; yet the best vvay to keep it from worse inconvenience, is to bath his Limbs in the Decoction of Coleworts.

CCLXXII. Of Spur galling, and fretting the Skin and Hair.

Por this there is nothing better then Piss and Salt, and to wash the Sore therewith daily.

CCLXXIII. Of Sinews being cut

IF the Horses Sinews be cut, take the leaves of wild Nep or Woodbine, and beat them in a Mortar with May-Butter, apply it to the place, and it will knit the Sinews.

CCLXXIV.

CCLXXIV. of Knots in the Joynts.

of.

nan

of

nd

10

n

e

PAtchgrease applied as is afore-shewed for Swellings, will take away any hard knot in the slesh, or upon the sinews.

CCLXXV. Of Venemous Wounds, or Bytings with a Mad Dog, Tushes of a Boar, Serpents, or such like.

For any of these Mortal or venemous wounds, take Yarrow, Calamint, and the Grains of Wheat, and make it into a Salve, and lay it to the Sore, and it will heal it safely.

CCLXXVI. of Lice or Nits.

This filthiness of Vermine, is bred in a Horse through unnatural dislike and poverty; The Cure is, take the juyce of Beets and Stavesacre beaten together, and with it anoint the Horses body all over, and it will make him clean.

CCLXXVII. Of defending an Horse from Flies.

Take the juyce of Pellitory Spain, and mixing it with Milk anoint the Horses belly therewith, and no Flies will trouble him.

CCLXXVIII.

CCLXXVIII. Of Broken Bones, or Bones out of Joynt.

A Frer you have placed the bones in the true place, take the Root of Osm and and beat it in a Mortar with the oyl of Swallowes, and anoint all the Member therewith, then splent it, and roul it up, and in fifteen dayes the bones will knit and be strong.

CCLXXIX. A most famous Receipt, to make an Horse that is lean, and full of inward sickness, sound and fat in fourteen dayes. Markham's Master feet

Ake of Wheat flower fix pound, Annifeeds two ounces, Cummin-feeds fix Drams, Carthamus one Dram and a half, Fenygreek feeds one ounce two Drams, Brimstone one ounce and a half, Sallet oyl one pint, Honey one pound and a half, White-wine a pottle; this must be made into a Paist, the hard simples being beaten into a powder, and finely fearced and kneaded together, and fo made into Balls as big as a mans fift, then every morning confume one of these Balls in his cold water that he drinketh Morning and Evening, for fifteen dayes together; and at first, if he be dainty to drink the water, yet care not, but let him fast till he drink it, and after he begins to take it, he will drink it with great greediness.
